Edition: October 2026 · Book Five

ONGO WEIGHT LOSS · ONBOARDING SERIES

Organic Social Media for Ongo Weight Loss

Growing YouTube, Instagram, Facebook, Pinterest and more, without paid ads

Book Five of the Ongo Weight Loss onboarding series

Prepared by	Ashish Osten, Team Lead, Ongo Weight Loss
Edition	October 2026 (first edition)
Written for	New social media team members, with designers, video editors, writers, SEO, reviewers and team leads
Read first	Book One: The Foundation (Books Two to Four explain where social traffic lands and how it is measured)
Inside	44 chapters in 4 levels · 440 MCQs · our account audit and 100-competitor social map (October 2026) · platform playbooks · metrics that matter · free tools · caption and reply libraries · calendars · case appendices · glossary · dated sources

Important

This book is internal orientation material. It is not medical, legal or regulatory advice for you or for any patient. Real medical questions go to Ongo Weight Loss's licensed providers; legal and regulatory questions go to compliance and counsel.

Platform features, algorithms, community guidelines, drug approvals and regulations change often. Every claim carries a dated source and an evidence label so you can recheck it; features and trends are marked as changeable. When this book and a newer official source disagree, the official source wins. This book covers organic (unpaid) social media only.

Wegovy, Ozempic, Rybelsus, Saxenda, Victoza, Zepbound, Mounjaro, Foundayo, Trulicity and the other medication and product names in this book are trademarks of their owners. Ongo Weight Loss does not offer these brand-name medications and is not affiliated with their makers. Platform and tool names are trademarks of their owners. They are named only to educate and to explain what can and cannot be said.

© 2026 Ongo Weight Loss. Prepared for team training and onboarding.

ABOUT THIS BOOK

What's inside

> **Before you start:** read **Book One: The Foundation** (what Ongo Weight Loss is and what the rules allow). Book Two (off-page SEO), Book Three (site architecture) and Book Four (on-page SEO and GA4 events) explain where social traffic lands and how we measure it. Book Five is **organic only**: no paid ads, boosts or sponsored posts. Paid social will be its own book.

How every chapter is built

Part of chapter	What it gives you
Trivia hook	One surprising, sourced fact that shows why the topic matters
Plain explanation	The concept in very easy English, with step-by-step "where to tap" instructions
Desi analogy (Hinglish)	Rotates between restaurant, IT office, cricket, wedding and mohalla
Ongo Weight Loss example	Real findings from our account audit and the competitor audit of October 2026
Tables and diagrams	Rules, settings, metrics and checklists at a glance
Evidence labels	Official, Google spokesperson, industry, or expert/internal
Do's and Don'ts	Quick rules
Pros and Cons	Honest trade-offs
Where freshers go wrong	Common mistake, why it happens, how to avoid it, how to fix it
Thumb rules + Notes to remember	One-line rules to keep
Glossary	Every new term in the chapter
10 MCQs	Answer key at the foot of the chapter, flipped upside down

Part of chapter	What it gives you
Sources	Every claim linked to where it came from, with dates

The four levels

Level	Chapters	What you'll learn
Level 1 · Foundation	1–7	What social media is for at Ongo Weight Loss, how algorithms work, why health is different, how social helps Google and AI answers, our audience, our own account audit, and the competitor landscape
Level 2 · Platforms	8–19	Platform priority, then YouTube, Shorts, Instagram, Facebook, TikTok, Pinterest, LinkedIn, Reddit, Threads/X and new platforms, Google Business Profile and reviews, and account setup and security
Level 3 · Content Craft	20–31	Pillars, formats, hooks and captions, visual identity and accessibility, video production, hashtags and social search, trends and holidays, engagement, brand/doctor/author accounts, creators, testimonials, AI tools
Level 4 · Compliance, Operations and Measurement	32–44	What we can say, platform health rules, privacy, community management, crisis, tools, workflow, metrics, UTMs and GA4, experiments, competitive gaps, the 30/60/90-day plan, and ZETA for social

Your questions: where to find the answers

You asked about	Chapter(s)	You asked about	Chapter(s)
Every platform and how it helps	8–18	Hashtag and keyword resources	25, Appendix B
All algorithms	2, 9–17	Free scheduling and batching tools	37

You asked about	Chapter(s)	You asked about	Chapter(s)
Social → Google ranking, traffic, referral	4	AI tool / LLM per platform	31
Each competitor's platforms and gaps	7, 42, Appendix G	Likes, comments, shares, saves, pins	27
Festivals, holidays, events, polls	26, Appendix C	Brand vs doctor vs author accounts	28
All metrics vs metrics that matter	39	Influencers: how to find them	29
Before/after and testimonials	30	Account creation and handover	19, Appendix K
Sample posts with "why it's better"	22, 30, Appendix D	Sample 7-day calendar	Appendix F
Case studies	Appendix H	Spanish-speaking audience	5

What's new compared with Books One to Four

Topic	Book One	Book Two	Book Three	Book Four	Book Five
Compliance rules	✅ Defined	Applied to links	Applied to pages	Applied to tags	✅ Applied to posts, replies, DMs, creators
Social profiles	Mentioned	As citations/links	sameAs	sameAs, OG cards	✅ Full playbook
GA4 events	—	—	Overview	✅ Dictionary	Uses it with UTMs
Competitor research	Overview	Backlinks	Site structure	—	✅ 100 mapped, ~50 audited on social
Content creation	—	Outreach content	Content map	On-page copy	✅ Video, carousels, captions, Pins

BEFORE YOU BEGIN

Front Matter

A Letter to the Reader

Welcome to Book Five.

If you've never managed a brand's social media before, this book is for you. By the last chapter you should be able to run Ongo Weight Loss's social channels on your own: plan the week, brief a designer or video editor, write captions that pass review, reply to comments safely, spot a crisis early, and report numbers that team leads trust.

Social media for a health brand is different from social media for a café or a clothing store. People come to us with real worries about their weight and their health. Platforms limit what drug and weight-loss content can do. Regulators read captions. And every reply is public. So this book teaches two things at once: **how to grow**, and **how to grow without crossing a line.**

Here is what we did before writing:

- We audited Ongo Weight Loss's own YouTube, Instagram and Facebook accounts in **October 2026**.
- We mapped the social presence of the **100 competitors** you listed, and audited about **50** in depth.
- We read each platform's own explanation of how its recommendations work, and the FDA and FTC rules that apply to us.

The headline finding may surprise you: on YouTube, Ongo Weight Loss is already **third** among the competitors we audited. Some of the platforms where competitors are weakest (Pinterest, Reddit, long-form YouTube) are the ones where honest, useful content wins.

This book is about **organic** growth only. There are no paid ads, boosts or sponsored posts here; those come in the next book.

Same promise as the earlier books: every important claim has a source, a date and a label. Trends and platform features change fast, so anything that might change is marked as changeable. Check it before you rely on it.

Let's make Ongo Weight Loss the most useful, most trusted weight-care brand in people's feeds.

How to Read This Book

The four levels

Level	Who it's for	What you can do after
Level 1 – Foundation	Everyone on day one	Explain what social is for, how algorithms work and where we stand
Level 2 – Platforms	The social media lead, with designers and editors	Set up and run each platform correctly
Level 3 – Content Craft	Social lead, writers, designers, video editors	Plan pillars, write hooks and captions, produce video, work with creators and AI
Level 4 – Compliance, Operations and Measurement	Social lead, team leads, reviewers	Post safely, reply safely, run the weekly workflow, measure and report

The boxes you'll see

> 💡 **Trivia** – a surprising fact that shows why the topic matters.
>
> 🍛 **Desi analogy** – the idea explained in Hinglish with an everyday example.
>
> 🟧 **Ongo Weight Loss example** – what we found in our audits, and what to do.
>
> ⚠️ **Where freshers go wrong** – the common mistake and how to avoid or fix it.
>
> 👍 **Thumb rule** – one line to remember forever.
>
> 📝 **Note to remember** – a key fact to keep.

Screenshots in words

Platforms change their menus often, so instead of pasted screenshots this book describes each screen in words ("Settings → Account status") and tells you what you should see. If a menu has moved, search the platform's help centre for the setting's name.

Working with your team

You're not alone. You can ask the **graphic designer**, **video editor**, **writers** and the **SEO team** for help, and the **team lead** approves what goes live, with a "full check" from the **medical and legal reviewers** for anything about treatment, prices, testimonials or creators (Chapter 38). In a clinical emergency, escalate to the clinical author/doctor (Chapter 36).

Using the MCQs for onboarding

- Each chapter ends with 10 multiple-choice questions.
- Team leads can use them after each level; 8/10 or better means ready to move on.

The Evidence Label Legend

Source labels: where the claim comes from

Label	Meaning
🟢 **Official**	The platform's or regulator's own documentation (YouTube, Instagram, TikTok, Google, FDA, FTC, HHS) or official research (Pew, KFF)
🟡 **Google spokesperson**	A public statement by a Google employee
🟠 **Industry**	Reputable trade press, law-firm summaries, tool vendors or common platform practice
🔵 **Expert / Ongo Weight Loss internal**	Expert judgment, our audits, and leadership decisions

How much to trust each label

Label	Trust	Before you rely on it
🟢	Highest	Check it's still current (dates are given)
🟡	High	Remember it's one person's statement
🟠	Medium	Prefer the original source when possible
🔵	Varies	Confirm with the team lead

Changeable facts

Platform features (hashtag limits, video lengths, free-plan limits, trends) change often. Treat any number about a feature as **changeable** and re-check it on the platform before a campaign.

Risk level: what can go wrong

Most social media risk comes from five places: **confirming patients or discussing treatment in public**, **brand drug names and "same as" claims**, **fake or edited results and undisclosed**

creators, **posting without the full check**, and **personal data in tools, links or screenshots**. Chapter 44 (ZETA) lists them all.

How the Answer Keys Work

Every chapter's answer key sits at the foot of the chapter, printed **upside down**. Try the quiz first, then turn the page around to check. All 44 keys are also collected in the back matter.

01

LEVEL 1

Foundation

What social media is for at Ongo Weight Loss, how algorithms work, why health is different, our audience, our own audit and the competitor landscape.

1 · What Social Media Is For at Ongo Weight Loss

2 · How Social Media Algorithms Decide What People See

3 · Why Health Is Different on Social Media

4 · Social Media, Google Rankings, Traffic and AI Answers

5 · Who Our Audience Is and Where They Spend Time

6 · The Ongo Weight Loss Social Audit (30 October 2026)

7 · The Competitor Landscape on Social Media

LEVEL 1 · CHAPTER 1

Chapter 1: What Social Media Is For at Ongo Weight Loss

Before you post anything, know why the brand is on social media at all. Followers are not the goal. Trust, reach and patients who arrive informed are.

> 💡 **Trivia**
>
> In a November 2025 KFF poll, **12% of U.S. adults** said they were currently taking a GLP-1 drug, and **17%** of users said they got it from an **online provider or website**. [1] 🟢 Official (KFF)
>
> Millions of people are already on GLP-1s, and many first hear about treatment, side effects and providers on social media. Our job is to be the clear, honest voice they find there.

1.1 What "organic social media" means

Term	Meaning	In this book?
Organic	Posts, videos, replies and community work that reach people **without paying the platform**	✅ Everything here
Paid	Ads, boosted posts, paid placements	❌ Next book (Paid Media)
Influencer / creator	People outside the company making content with or about us	✅ Organic collaborations (Chapter 29)
Earned	Others sharing, mentioning or reviewing us	✅ Through community and PR

> 🪔 **Desi analogy: mohalla ki chai ki dukaan**
>
> Ad dena matlab akhbaar mein poster chhapwana. Organic social matlab roz dukaan khol ke **chai banana, logon se baat karna, unke sawaalon ka jawab dena**. Poster ek din dikhta hai; achhi chai aur baatcheet se log roz aate hain aur doston ko bhi laate hain.

1.2 The six jobs of social media at Ongo Weight Loss (ranked)

Rank	Job	Why it's ranked here	Measured by
1	**Trust**	Health decisions need trust before action (Book One, Book Two)	Comments quality, saves, profile visits, sentiment
2	**Reach / awareness**	Your current priority: be seen by the right people	Impressions, reach, views
3	**Education**	Answer real questions about GLP-1s, compounded medications, nutrition	Watch time, saves, shares
4	**Website visits**	Move interested people to ongoweightloss.com	Link clicks, GA4 sessions from social (Chapter 40)
5	**Community**	Keep patients and followers supported between visits	Replies, returning commenters, DMs handled
6	**Portal entries**	The business result	`exit_to_portal` from social sessions (Book Four, Chapter 39)

Why trust comes before reach: a viral video that breaks a compliance rule can get the account restricted and damage the brand for years. A trusted account grows slower but compounds.

1.3 What social media is NOT for

❌ Not for	Why
Selling prescriptions directly in posts	Platform rules and FDA scrutiny (Chapters 32–33)
Diagnosing or giving personal medical advice in comments	Licensed providers do that in the portal

❌ Not for	Why
Collecting health details in DMs	Privacy (Chapter 34)
Buying followers, views or reviews	FTC rule; platform bans (Chapter 44)
Arguing with critics	Damages trust; escalate instead (Chapter 36)

1.4 How social fits the whole Ongo Weight Loss system

```
Social post/video  →  profile  →  link in bio  →  blog / money page  →  eligibility  →  portal
   (reach)            (trust)      (UTM, Ch 40)   (Books 3–4)          (tools)
(exit_to_portal)
```

Books One to Four built the website. Book Five brings people to it, and keeps them talking to us.

> 🟧 **Ongo Weight Loss example**
>
> On 30 October 2026, Ongo Weight Loss's YouTube channel had about **2,290 subscribers and 134 videos**, more than most GLP-1 telehealth competitors we checked. Instagram had **about 10 followers** and Facebook **1**. The brand has one working channel and two nearly empty ones. Chapter 6 has the full audit. 🔵

1.5 Your role as the social media executive

You own	You work with
The content calendar and posting	Graphic designer (visuals)
Captions, hashtags, scheduling	Video editor (edits, captions)
Replies, DMs, community	Writers and SEO (topics, links, keywords)
Weekly and monthly reports	Team lead (approval)
Spotting trends and risks	Medical and legal reviewers (claims)

1.6 Do's and Don'ts

✅ Do	❌ Don't
Start every post from a job (trust, reach, education...)	Post "because we need to post today"
Measure what the job needs	Celebrate follower counts alone
Route health questions to providers	Answer personal medical questions in comments
Keep paid ideas for the paid team	Boost posts without a plan

1.7 Pros and cons of organic social for a telehealth brand

✅ Pros	❌ Cons
Free reach and compounding trust	Slow growth at first
Real feedback from real people	Strict health rules on every platform
Supports SEO, brand search and AI answers	Needs daily attention (comments, DMs)
Builds a community that stays	One mistake is public

1.8 Where freshers go wrong in Chapter 1 topics

Mistake	Why it happens	Avoid it by	Fix it by
Chasing followers	Easy number	The six jobs table	Reporting reach and engagement
Posting sales messages only	Wanting quick results	The 80/20 content mix (Chapter 20)	Adding education and community posts
Answering medical questions	Wanting to help	Reply templates (Appendix E)	Redirecting to providers

1.9 Thumb rules

👍 Trust first, reach second, sales last.

👍 Every post has a job.

👍 Social starts the conversation; providers continue it.

1.10 Notes to remember

📝 12% of U.S. adults were taking a GLP-1 in November 2025 (KFF).

📝 Organic only in this book; paid social is the next book.

Chapter 1 Glossary

Term	Simple meaning
Organic social	Unpaid posts, videos and community work
Paid social	Ads and boosted posts
Reach	How many unique people saw your content
Impressions	How many times your content was shown
Earned media	Mentions and shares you didn't pay for

Chapter 1 Quiz

1. What does "organic social" mean?

- A) Only paid ads
- B) Reaching people without paying the platform
- C) Posting about food
- D) Buying followers

2. Which job is ranked first?

- A) Memes
- B) Followers
- C) Sales
- D) Trust

3. What % of U.S. adults were taking a GLP-1 in November 2025 (KFF)?

- A) 90%
- B) 50%
- C) 1%
- D) 12%

4. Which should NOT happen on social?

- A) Answering general FAQs
- B) Educating about nutrition
- C) Sharing provider introductions
- D) Collecting health details in DMs

5. Where does paid social live?

- A) Nowhere
- B) Book One
- C) This book
- D) The next book (Paid Media)

6. Who approves posts at Ongo Weight Loss?

- A) Team lead (plus medical/legal for claims)
- B) The designer alone
- C) Anyone
- D) Followers

7. What was Ongo Weight Loss's YouTube subscriber count on 30 Oct 2026?

- A) About 2,290
- B) 1 million
- C) 0
- D) 10

8. Why is buying followers forbidden?

- A) It's slow
- B) Followers are useless
- C) It's too cheap
- D) FTC rule and platform bans

9. What's the end business result of social?

- A) Portal entries (exit_to_portal)
- B) Emojis
- C) Likes only
- D) Followers only

10. In the chai analogy, organic social is…

- A) Closing the shop
- B) Raising prices
- C) Making chai daily and talking with people
- D) A one-day newspaper poster

Sources

1. KFF, Poll: 1 in 8 adults say they are currently taking a GLP-1 drug (November 14, 2025) 🟢
2. Ongo Weight Loss, social media audit, 30 October 2026 (internal) 🔵

Answer key, Chapter 1: 1-B · 2-D · 3-D · 4-D · 5-D · 6-A · 7-A · 8-D · 9-A · 10-C

LEVEL 1 · CHAPTER 2

Chapter 2: How Social Media Algorithms Decide What People See

Every platform has a different algorithm, but they all ask the same question: "Will this person value this post?" Learn the shared logic first, then the platform details.

> 💡 **Trivia**
>
> TikTok says that **follower count is not a direct factor** in For You recommendations. A brand-new account can reach thousands of people if viewers watch its video to the end. [1] ● Official (TikTok)
>
> For Ongo Weight Loss, with a near-empty Instagram and no TikTok, that's good news: the next video can travel further than the follower count suggests.

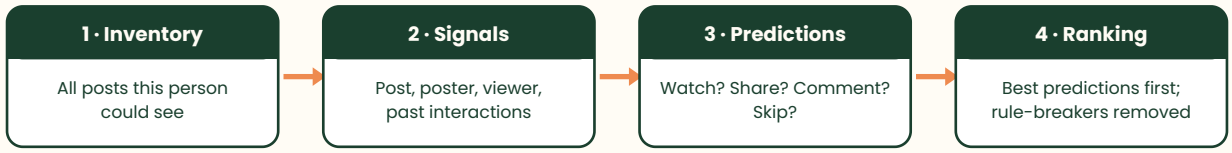

2.1 The four steps every algorithm follows

Step	What happens	Example
1. Inventory	Collect all posts this person could see	Accounts they follow + recommended posts
2. Signals	Gather information about each post, the poster and the viewer	Watch time, likes, topic, who posted, past interactions
3. Predictions	Predict what the viewer will do	Watch to the end? Share? Comment? Skip?
4. Ranking	Order posts by predicted value; remove rule-breakers	Best predictions shown first

Instagram's own explanation follows these exact steps. [2] ● Official (Instagram)

> **Desi analogy: shaadi ka caterer**
>
> Caterer pehle dekhta hai kitne dishes hain (inventory), phir mehmaanon ki pasand jaanta hai (signals): "Sharma ji ko meetha pasand hai, bachchon ko noodles." Phir andaaza lagata hai kaun kya khayega (predictions), aur plate usi hisaab se sajata hai (ranking). **Algorithm har user ke liye alag plate sajata hai.**

How Every Feed Algorithm Works

Different platforms, same four steps.

2.2 Signals that matter on almost every platform

Signal	What it tells the platform	Platforms where it's strong
Watch time / completion	The video kept attention	TikTok, Reels, Shorts, YouTube
Shares / sends	People found it worth passing on	Instagram, TikTok, Facebook
Saves	Useful enough to come back to	Instagram, TikTok, Pinterest
Comments (meaningful)	It started a conversation	Facebook, Instagram, LinkedIn
Likes	Quick approval (weaker signal)	All
Profile taps / follows after viewing	Interest in the creator	Instagram, TikTok
Relationship history	The viewer interacts with this account often	Instagram feed and Stories, Facebook
Satisfaction	Viewers say they were satisfied (surveys)	YouTube
Negative feedback	"Not interested", hides, dislikes, quick skips	All

2.3 Platform algorithms at a glance

Platform	What it optimises for	Biggest lever for us
YouTube	Viewer satisfaction: watch history, subscriptions, likes, dislikes, "not interested", surveys [3] 🟢	Titles/thumbnails that match the video; strong retention
YouTube Shorts	Short-video engagement and swipe-away rate	First 2 seconds; loops
Instagram Reels	Likelihood to reshare, watch through, like, visit audio page [2] 🟢	Shares (sends) and completion
Instagram Feed	Seconds spent, comments, likes, shares, profile taps [2] 🟢	Carousels people save and send
Instagram Explore	Likes, saves, shares; popularity and speed [2] 🟢	Saves
Instagram Stories	Closeness to the account; replies [2] 🟢	Polls, questions, DMs
TikTok	User interactions, video info (captions, sounds, hashtags), lower weight on device/settings; completion is strong [1] 🟢	Hook + full watch
Facebook	Meaningful interactions, relationships, video watch	Comments and Groups
Pinterest	Search intent, saves, fresh pins	Keywords in pin titles and boards
LinkedIn	Relevance to professional network; dwell time; comments	Doctors' and leaders' personal posts
Reddit	Community upvotes and rules of each subreddit	Genuine, helpful answers

2.4 What every algorithm punishes

Behaviour	Result
Breaking community guidelines	Removal; repeated breaks make the **whole account** ineligible for recommendations for a period (Instagram) [2] 🟢

Behaviour	Result
Reposted videos with another app's watermark	Lower Reels distribution [2] 🟢
Low-resolution, muted, bordered or mostly-text Reels	Lower distribution [2] 🟢
Clickbait that viewers skip quickly	Fewer future impressions
Engagement bait ("comment YES to win")	Demotion on Meta platforms
Fake engagement (bought likes, pods)	Bans; FTC risk (Chapter 44)

> 🟧 **Ongo Weight Loss example**
>
> The YouTube channel's food and recipe Shorts (for example a high-protein sweet potato taco at about 1.5K views) beat most medication explainer videos (often 15–150 views). The algorithm rewarded content people actually watched and shared, not the topic the brand cared about most. Lesson: lead with what helps the viewer, then connect it to treatment. 🔵

2.5 Do's and Don'ts

✅ Do	❌ Don't
Design for completion and shares	Design for likes only
Post native, clean files on each platform	Repost TikToks with watermarks to Reels
Learn each platform's signal	Copy-paste one strategy everywhere
Follow every community guideline	Test the limits with risky claims

2.6 Pros and cons of algorithmic feeds for a new brand

✅ Pros	❌ Cons
Small accounts can reach big audiences	Reach is unpredictable week to week
Quality content gets rewarded	Platforms change rules without notice
Recommendations bring new audiences	Health content is reviewed more strictly

2.7 Where freshers go wrong in Chapter 2 topics

Mistake	Why it happens	Avoid it by	Fix it by
Blaming "the algorithm" for every drop	No data habit	Checking retention and shares	Improving hooks
Believing one viral trick works everywhere	Social media myths	The platform table	Testing per platform
Buying engagement to "kick-start"	Impatience	ZETA rule	Deleting bought accounts and reporting

2.8 Thumb rules

👍 Every algorithm asks: "Will this person value this?"

👍 Completion and shares beat likes.

👍 Break rules once, lose recommendations for a while.

2.9 Notes to remember

📝 TikTok: follower count is not a direct factor in recommendations.

📝 Instagram Reels: low-res, watermarked, muted, bordered or text-heavy reels get less reach.

Chapter 2 Glossary

Term	Simple meaning
Algorithm	The system that decides what each person sees
Signal	A piece of information the algorithm uses
Completion rate	Share of viewers who watch to the end
Sends	Shares through DMs
Recommendation	Showing content to people who don't follow you

Chapter 2 Quiz

1. Is follower count a direct factor in TikTok For You recommendations?

- A) No
- B) Only for brands
- C) Only for doctors
- D) Yes, the main one

2. What are the four algorithm steps?

- A) Post, pray, pay, repeat
- B) Inventory, signals, predictions, ranking
- C) Draft, edit, print, mail
- D) Like, share, follow, buy

3. Which Reels get lower distribution on Instagram?

- A) Original high-quality reels
- B) Reels with captions
- C) Reels under 60 seconds
- D) Watermarked or low-resolution reels

4. What does YouTube say it optimises for?

- A) Only clicks
- B) Follower count
- C) Only likes
- D) Viewer satisfaction, not just watch time

5. What happens after repeated guideline breaks on Instagram?

- A) More reach
- B) The account becomes ineligible for recommendations for a period
- C) A blue tick
- D) Nothing

6. Which signal shows "useful enough to come back to"?

- A) Hides
- B) Saves
- C) Skips
- D) Dislikes

7. What did Ongo Weight Loss's best Shorts show?

- A) Nobody watches Shorts
- B) Videos must be 20 minutes
- C) Drug names guarantee views
- D) Food and recipe videos beat most medication explainers

8. Which signal matters most for Instagram Stories?

- A) Closeness to the account and replies
- B) Font choice
- C) Hashtags
- D) Video length

9. What does engagement bait lead to on Meta?

- A) Verification
- B) Demotion
- C) Promotion
- D) A badge

10. In the caterer analogy, the algorithm…

- A) Closes the kitchen
- B) Only serves sweets
- C) Prepares a different plate for each guest
- D) Serves everyone the same plate

LEVEL 1 · CHAPTER 3

Chapter 3: Why Health Is Different on Social Media

A fashion brand can post anything fun. A telehealth brand selling access to prescription weight-loss care is watched by regulators, platforms and patients at the same time.

> 💡 **Trivia**
>
> On **9 September 2025**, the FDA and HHS announced a crackdown on misleading drug advertising, including roughly **100 cease-and-desist letters**. Several went to **GLP-1 telehealth companies**, flagging claims like "the same ingredient in Wegovy & Ozempic" and "generic Ozempic". [1] ● Industry (Holland & Knight)
>
> On social media, these claims spread fastest, and they're screenshotted forever.

3.1 Who is watching Ongo Weight Loss's social posts

Watcher	What they care about	Consequence if we get it wrong
Patients and followers	Honesty, safety, kindness	Loss of trust, negative reviews
Platforms (Meta, TikTok, YouTube)	Community guidelines, regulated goods, body image	Removed posts, no recommendations, bans
FDA	Drug claims (compounded ≠ FDA-approved; "same as" claims)	Warning letters
FTC	Truthful advertising, endorsements, reviews, disclosures	Investigations, civil penalties
State boards and LegitScript	Telehealth and pharmacy compliance	Lost certification, investigations

Watcher	What they care about	Consequence if we get it wrong
Competitors and journalists	Anything misleading	Public complaints, press

3.2 The five health-specific risks on social

Risk	Example	Rule
Drug claims	"Our semaglutide is the same as Ozempic"	Never; compounded drugs aren't FDA-approved (Book One, Ch. 5, 9)
Outcome promises	"Lose 20 lbs in a month"	No outcome claims; brand trial data only with the trial named
Testimonials and before/after	Edited or fake "results"	Real, consented, typical-or-disclosed only (Chapter 30)
Body image harm	Shaming bodies, extreme diets	Platform guidelines + our values (Chapter 33)
Privacy	Confirming someone is a patient in a reply	Never (Chapter 34)

> 🪔 **Desi analogy: doctor ki dukaan vs mithai ki dukaan**
>
> Mithai wala bol sakta hai "duniya ki sabse meethi jalebi!" — koi case nahi karega. Lekin doctor agar board pe likhe "100% guaranteed cure", toh medical council notice bhejegi. **Health brand ki har line doctor ke board jaisi hai**: sach, saavdhaan, aur saabit karne layak.

3.3 Our standing rules, carried from Books One to Four

Rule	On social it means
Brand name is **Ongo Weight Loss**	Same display name and handle style everywhere
Ongo Weight Loss offers **compounded semaglutide and tirzepatide only**	Never show or name brand pens as our product

Rule	On social it means
No brand drug names in commercial content, hashtags or replies (launch phase)	No #Ozempic, #Wegovy on our posts; education only after compliance review
Never name the partner pharmacy	Not in captions, comments or replies
Self-pay	No insurance claims; prices only as they appear on the website
No PHI anywhere	No patient details in posts, comments, DMs screenshots or analytics
Medical + legal review for claims	Team lead approves all; reviewers approve anything clinical

> 🟧 **Ongo Weight Loss example**
>
> The YouTube channel description says it decodes information about "popular prescription medications like Wegovy®, Zepbound®...", and several titles use brand names ("Can Ozempic Cause Cancer?", "Switching from Ozempic to Mounjaro After 4 Months... Here's What Happened"). Educational videos about brand drugs can be legitimate, but first-person titles imply a real patient experience, and brand names sit on the brand's own commercial channel. Each needs a compliance review (Chapter 32). 🔵

3.4 The "would I say this in front of a regulator?" test

Before posting, read the caption aloud and ask:

Question	If "no"
Is every fact true and supported by a source?	Fix or remove
Would a reasonable person think we're promising results?	Rewrite
Would a reasonable person think a compounded drug is a brand drug or FDA-approved?	Rewrite
Does it shame bodies or push extreme behaviour?	Rewrite
Does it reveal anything about a real patient without consent?	Remove
Did the right reviewer approve it?	Wait

3.5 Do's and Don'ts

✅ Do	❌ Don't
Educate with sources	Promise outcomes
Say "compounded" and "not FDA-approved" where relevant	Say "generic Ozempic"
Show care and empathy	Shame or mock bodies
Get clinical claims reviewed	Post medical claims from memory

3.6 Pros and cons of a strict health approach

✅ Pros	❌ Cons
Account stays safe	Some trendy formats aren't allowed
Trust grows with every honest post	Slower approvals
Regulators and platforms leave us alone	Competitors may grow faster with risky tactics, until they're caught

3.7 Where freshers go wrong in Chapter 3 topics

Mistake	Why it happens	Avoid it by	Fix it by
Copying a competitor's hook	"If they can, we can"	The regulator test	Rewriting
Using #Ozempic for reach	Search volume	Standing rules	Removing hashtags
Posting a patient's story from a DM	Excitement	Written consent only	Deleting and apologising

3.8 Thumb rules

👍 Health posts are doctor's boards, not sweet-shop banners.

👍 If you need a source to say it, you need the source before you post it.

👍 Compounded is never "the same as" a brand.

3.9 Notes to remember

📝 Sept 2025: FDA/HHS letters to GLP-1 telehealth companies over "same ingredient" and "generic" claims.

📝 Six watchers: patients, platforms, FDA, FTC, boards/LegitScript, competitors and press.

Chapter 3 Glossary

Term	Simple meaning
FDA	U.S. Food and Drug Administration (drug claims)
FTC	Federal Trade Commission (advertising, endorsements, reviews)
Cease-and-desist letter	A demand to stop an activity
Compounded drug	A medication prepared by a pharmacy for a patient; not FDA-approved
LegitScript	A certification service for healthcare and pharmacy businesses

Chapter 3 Quiz

1. When did FDA/HHS announce the misleading-ads crackdown?

- A) 9 September 2025
- B) 30 October 2026
- C) 1 January 2020

- D) Never

2. Which claim was flagged?

- A) "Compounded medications are not FDA-approved"
- B) "Talk to a licensed provider"
- C) "Results vary"
- D) "The same ingredient in Wegovy & Ozempic"

3. Which agency covers endorsements and reviews?

- A) IRS
- B) NASA
- C) FTC
- D) FAA

4. Can we use #Ozempic on our posts in the launch phase?

- A) No
- B) Only on Reels
- C) Only on weekends
- D) Yes

5. Can we name the partner pharmacy?

- A) Only in DMs
- B) Yes
- C) No
- D) Only on LinkedIn

6. What's wrong with "Switching from Ozempic to Mounjaro… Here's What Happened" on our channel?

- A) It has no emoji
- B) It's too short
- C) Nothing
- D) Implies a real patient experience and uses brand names on a commercial channel

7. Who approves clinical claims?

- A) Followers
- B) Medical (and legal) reviewers, plus team lead

- C) The intern
- D) The platform

8. What is a compounded drug?

- A) A supplement
- B) Prepared by a pharmacy; not FDA-approved
- C) A brand drug
- D) An FDA-approved generic

9. Which test do we run before posting?

- A) "Would I say this in front of a regulator?"
- B) "Is it funny?"
- C) "Is it long?"
- D) "Does it rhyme?"

10. In the doctor vs mithai analogy, health posts are like…

- A) A cricket score
- B) A doctor's board: true and careful
- C) A sweet-shop banner
- D) A wedding card

LEVEL 1 · CHAPTER 4

Chapter 4: Social Media, Google Rankings, Traffic and AI Answers

Likes don't move Google rankings directly. But social media feeds Google, AI assistants and the website in five indirect ways that matter a lot.

> 💡 **Trivia**
>
> Since **10 July 2025**, public posts from Instagram professional accounts (for users 18 and over) can be indexed by search engines like Google and Bing. [1] 🟠 Industry (multiple reports)
>
> An Instagram carousel can now appear in Google results, so its caption and alt text matter for search too.

4.1 What Google says about "social signals"

Google spokespeople have said many times that likes, shares and follower counts are **not direct ranking factors** for websites. [2] 🟡 Google spokesperson

Social media still helps search in five indirect ways:

Path	How it helps	Example
1. Brand search	People who see us on social later search "Ongo Weight Loss"	Branded queries grow in Search Console
2. Discovery → links	Writers, creators and journalists find our content on social and link to it	A guide shared on Reddit gets cited by a blog (Book Two)
3. Social profiles in results	Our YouTube, Instagram, Facebook pages rank for our brand name	We own more of page one for "Ongo Weight Loss"

Path	How it helps	Example
4. Video results	YouTube videos appear in Google's video results and AI answers	A "how to inject compounded semaglutide" video
5. Entity understanding	Consistent profiles linked with `sameAs` in our Organization schema help Google connect the brand (Book Four, Ch. 23)	Knowledge-panel-style information

> 🍛 **Desi analogy: cricket ka fan following**
>
> Selector ko fans ke chillane se team nahi chunni. Lekin jo player har match mein achha khelta hai, uske baare mein akhbaar likhte hain, log baat karte hain, aur selectors ki nazar mein aata hai. **Social media fans ka shor hai; ranking akhbaar ki khabar hai jo usse paida hoti hai.**

4.2 How each platform contributes

Platform	Google search visibility	Website traffic	Referral quality	AI answers
YouTube	⭐⭐⭐ Videos show in Google results and video tabs	⭐⭐ Description links, cards	High (watchers are researching)	⭐⭐⭐ Often cited
Instagram	⭐⭐ Profile + indexable public posts (since July 2025)	⭐ Bio link, Stories link stickers	Medium	⭐
Facebook	⭐⭐ Page ranks for brand name	⭐⭐ Link posts allowed	Medium (older audience)	⭐
TikTok	⭐⭐ TikTok videos appear in Google results for some queries	⭐ Bio link (business accounts)	Medium	⭐
Pinterest	⭐⭐ Pins rank in Google Images	⭐⭐⭐ Every pin links to a page	High (planning mindset)	⭐
LinkedIn	⭐⭐ Company page and articles rank	⭐	High for B2B/partners	⭐⭐
Reddit	⭐⭐⭐ Reddit threads rank highly in Google for many health questions	⭐ (links often removed)	High when genuine	⭐⭐⭐ Often cited by AI

⭐ ratings are Ongo Weight Loss editorial judgment based on 2025–2026 observations. 🔵

4.3 Turning social into measurable traffic

Tactic	Detail	Chapter
UTM-tagged links	Every bio, description and story link carries UTMs	40
One link-in-bio page	A simple, fast page on ongoweightloss.com (not a third-party link tree) with 3–5 key links	11
Pin comments with links (YouTube)	Pinned comment pointing to the guide	9
Content pairing	Every video has a matching blog guide; the blog embeds the video	9, 21
Profile consistency	Same name, logo, description and website on every platform	19

4.4 Social profiles and the website's schema

Book Four's Organization JSON-LD includes `sameAs` links to official profiles. Keep that list accurate: only active, official accounts.

```
"sameAs": [
  "https://www.youtube.com/@ongoweightlossusa",
  "https://www.instagram.com/ongoweightloss.usa",
  "https://www.facebook.com/ongoweightloss/"
]
```

Add new profiles (for example TikTok or Pinterest) only after they're active and verified as ours.

> **🟧 Ongo Weight Loss example**
>
> The website footer links YouTube, Instagram and Facebook. But the Facebook page is called "ONGO Weight Loss" (capitals), lists a New York street address, and was last active in February 2025. A neglected profile that ranks for the brand name can lower trust. Either refresh it or keep it minimal and consistent (Chapter 12). 🔵

4.5 Do's and Don'ts

✅ Do	❌ Don't
Treat social as a discovery engine for the website	Expect likes to raise Google rankings
Pair videos with blog guides	Leave videos with no website link
Keep profiles consistent with schema `sameAs`	List inactive or unofficial profiles
UTM every link	Use untracked links

4.6 Pros and cons of social for SEO

✅ Pros	❌ Cons
Brand search and discovery grow	No direct ranking boost
Video and Reddit results take extra search space	Platform content can be removed anytime
AI assistants often cite YouTube and Reddit	Traffic from some apps is low (in-app browsers)

4.7 Where freshers go wrong in Chapter 4 topics

Mistake	Why it happens	Avoid it by	Fix it by
Promising rankings from social	Myths	Google's statements	Reporting brand search instead
Using a third-party link tree	Convenience	A link page on our own site	Moving links in-house
Inconsistent names across profiles	Different people set them up	The account register (Ch. 19)	Renaming

4.8 Thumb rules

👍 Social doesn't rank pages; it creates the searches and links that do.

👍 Every video deserves a page; every page deserves a video.

👍 One brand name, one logo, one website on every profile.

4.9 Notes to remember

📝 Instagram professional accounts' public posts are indexable since 10 July 2025.

📝 Social signals are not a direct Google ranking factor.

Chapter 4 Glossary

Term	Simple meaning
Social signals	Likes, shares and followers
Brand search	People searching your brand's name
sameAs	Schema property listing official profiles
Link in bio	The one link allowed in a profile
In-app browser	A browser inside a social app

Chapter 4 Quiz

1. Are likes and shares direct Google ranking factors?

- A) Only on mobile
- B) Yes
- C) Only for health sites
- D) No

2. Since when can Instagram professional accounts' public posts be indexed?

- A) Never
- B) 1 January 2010
- C) 30 October 2026
- D) 10 July 2025

3. Which platform's threads often rank high for health questions?

- A) Snapchat
- B) Telegram
- C) Reddit
- D) WhatsApp

4. What schema property lists official profiles?

- A) author
- B) logo
- C) priceRange
- D) sameAs

5. Where should the link-in-bio page live?

- A) Nowhere
- B) On a random third-party site
- C) On ongoweightloss.com
- D) In a PDF

6. Which platform links every post to a page?

- A) Threads
- B) WhatsApp Status
- C) Instagram feed posts
- D) Pinterest

7. What should every video have?

- A) A matching website page and a UTM link
- B) A pop-up
- C) A brand drug hashtag
- D) No description

8. What issue does the Facebook page have?

- A) Too many followers
- B) Verified badge
- C) Capitalised name, NY address, inactive since Feb 2025
- D) Daily posting

9. Which is an indirect SEO benefit of social?

- A) More brand searches
- B) Direct ranking boost
- C) Higher PageRank from followers
- D) Automatic backlinks from likes

10. In the cricket analogy, social media is…

- A) The umpire
- B) The fans' noise that leads to news coverage
- C) The pitch
- D) The selector's vote

Sources

1. PPC Land, Instagram content becomes searchable on Google starting July 10 (2025)
2. Search Engine Journal, Social signals as a ranking factor (summary of Google statements)
3. Ongo Weight Loss, Book Four, Chapter 23 (Organization schema), internal

---

Answer key, Chapter 4: 1-D · 2-D · 3-C · 4-D · 5-C · 6-D · 7-A · 8-C · 9-A · 10-B

LEVEL 1 · CHAPTER 5

Chapter 5: Who Our Audience Is and Where They Spend Time

Post where your patients already are, in the formats they already watch. Data first, opinions second.

> 💡 **Trivia**
>
> GLP-1 use is highest among U.S. adults aged **50–64 (22%)**, and **women (15%)** are more likely than **men (9%)** to be taking one. [1] ● Official (KFF, November 2025)
>
> Our core audience is not teenagers on TikTok. It's adults in their 30s to 60s, more often women, who live on YouTube and Facebook and increasingly on Instagram.

5.1 Platform reach among U.S. adults (2025)

Platform	% of U.S. adults using it	Notes
YouTube	**84%**	Majority of every age group
Facebook	**71%**	Majority of every age group; peaks at 80% among 30–49
Instagram	**50%**	55% of women vs. 44% of men; ~8 in 10 under 30, 19% of 65+
TikTok	**37%**	Daily use about half of 18–29 vs. 5% of 65+
WhatsApp	**32%**	Strong among Hispanic Americans (see 5.4)
Reddit	**26%**	More men
X, Snapchat	Below WhatsApp	

Platform	% of U.S. adults using it	Notes
Threads, Bluesky	~10% or less	

[2] ● Official (Pew Research Center, published 20 November 2025; surveyed February–June 2025)

5.2 Our audience personas

Persona	Who	Where	What they want
Maria, 46	Working mother, tried many diets, considering GLP-1s, budget-conscious	Facebook, Instagram, YouTube	Honest cost, safety, "will it work for me?"
Linda, 58	Perimenopause/menopause weight changes, health conditions	Facebook, YouTube	Safety, side effects, doctor credibility
James, 41	Busy professional, prefers private, online care	YouTube, Reddit, LinkedIn	Fast facts, comparisons, data
Aisha, 33	Fitness- and food-curious, already on a GLP-1	Instagram, TikTok, Pinterest	Recipes, protein, workouts, community
Current patient	On compounded semaglutide or tirzepatide	YouTube, Instagram, email	Injection how-tos, side-effect tips, support

These are composite personas built from the KFF and Pew data above, not real patients. ●

> 🍛 **Desi analogy: shaadi mein guest list**
>
> Shaadi mein mehmaan ki umar aur pasand dekh ke intezaam karte ho: buzurgon ke liye kursi aur halka khana, bachchon ke liye ice-cream, yuvaon ke liye DJ. **Audience jaanoge tabhi sahi platform pe sahi "khana" serve karoge.**

5.3 What they search and worry about

Theme	Example questions
Cost	"How much does compounded semaglutide cost without insurance?"
Safety	"Is compounded semaglutide safe?", "side effects"
Results and timelines	"How long does it take to work?"
Food and protein	"What to eat on GLP-1", "high-protein breakfast"
Muscle and exercise	"How to keep muscle on GLP-1"
Life stages	Menopause, PCOS, men over 40
Practicalities	Injections, storage, travel, missed doses

KFF found **56% of GLP-1 users said the drugs were difficult to afford** and **14% stopped because of cost**. [1] ● Cost and value content is not optional.

5.4 Spanish-speaking audience: an overview

Point	Detail
Why it matters	Hispanic adults are a large share of the U.S. population and have higher obesity rates than average (CDC data)
Platforms	WhatsApp and YouTube are especially strong; Facebook remains important
Language	Separate Spanish posts or a separate account are better than mixed captions
Compliance	Same rules, translated by a qualified translator and reviewed medically; FTC requires disclosures in the same language as the endorsement
Phase	Plan for after the English accounts are stable; start with Spanish subtitles on top videos

● Ongo Weight Loss plan; Pew and CDC data inform the platform choice.

🟧 **Ongo Weight Loss example**

Ongo Weight Loss's best-performing YouTube Shorts were recipes and protein ideas, which fits Aisha and the current-patient persona. The lowest-performing videos were news-style medication explainers. Plan content for the personas, not for the drug news cycle. 🔵

5.5 Do's and Don'ts

✅ Do	❌ Don't
Use Pew/KFF data to choose platforms	Pick platforms because they're trendy
Write for a persona	Write for "everyone"
Answer cost questions honestly	Avoid the price topic
Plan Spanish content with proper translation	Use machine translation unchecked

5.6 Pros and cons of persona-based planning

✅ Pros	❌ Cons
Content feels personal	Personas can become stereotypes
Easier topic choices	Needs regular updates with real data
Better platform fit	Real patient data can't be used (privacy)

5.7 Where freshers go wrong in Chapter 5 topics

Mistake	Why it happens	Avoid it by	Fix it by
Building for teens on TikTok	Trend-chasing	KFF age data	Re-targeting content
Ignoring Facebook	"Old platform" myth	Pew data (71%)	Reviving the page

Mistake	Why it happens	Avoid it by	Fix it by
Translating with an app and posting	Speed	Medical review	Re-translating

5.8 Thumb rules

👍 YouTube and Facebook reach everyone; Instagram reaches women and under-50s best.

👍 Our core user is 30–64, often a woman, cost-conscious and careful.

👍 Spanish content is a separate project, not a caption add-on.

5.9 Notes to remember

📝 Pew 2025: YouTube 84%, Facebook 71%, Instagram 50%, TikTok 37% of U.S. adults.

📝 KFF Nov 2025: 22% of 50–64-year-olds currently taking GLP-1s.

Chapter 5 Glossary

Term	Simple meaning
Persona	A made-up but data-based description of a typical audience member
Demographics	Age, gender, location and similar facts
Platform reach	Share of people who use a platform
Pew Research Center	A non-partisan U.S. research organisation
KFF	A U.S. health policy research organisation

Chapter 5 Quiz

1. Which age group has the highest GLP-1 use (KFF)?

- A) 50–64
- B) Under 18
- C) 18–29
- D) 65+

2. What share of U.S. adults use YouTube (Pew 2025)?

- A) 37%
- B) 84%
- C) 99%
- D) 10%

3. What share use Facebook?

- A) 95%
- B) 71%
- C) 5%
- D) 30%

4. Who uses Instagram more?

- A) Equal
- B) Women (55% vs. 44%)
- C) Only teenagers
- D) Men

5. What share of GLP-1 users found them hard to afford?

- A) 56%
- B) 0%
- C) 90%
- D) 5%

6. What's a persona?

- A) A data-based description of a typical audience member
- B) A real patient record
- C) A hashtag
- D) A logo

7. How should Spanish content start?

- A) Mixed-language captions on every post
- B) With proper translation and review, after English is stable
- C) Never
- D) Machine translation immediately

8. Which content did best on our YouTube Shorts?

- A) Drug news
- B) Office tours
- C) Policy updates
- D) Recipes and protein ideas

9. Which platform is especially strong among Hispanic Americans?

- A) Snapchat
- B) WhatsApp
- C) Threads
- D) Bluesky

10. In the wedding analogy, knowing the audience means…

- A) Serving everyone the same thing
- B) Skipping the food
- C) Only playing music
- D) Serving the right food to each guest group

Sources

LEVEL 1 · CHAPTER 6

Chapter 6: The Ongo Weight Loss Social Audit (30 October 2026)

Before planning growth, record exactly where the accounts stand today, what works, what's risky, and what to fix first.

> 💡 **Trivia**
>
> On 30 October 2026, Ongo Weight Loss's YouTube channel (about **2,290 subscribers**) was ahead of Ivím Health (1.31K), OrderlyMeds (1.19K), Eden (496), Mochi Health (475) and QuickMD (320) on YouTube, even though several of those brands have **20,000 to 115,000** Instagram followers. [1] 🔵 Ongo Weight Loss internal
>
> We're already winning one platform. The audit shows how to build on it.

6.1 How the audit was done

Item	Detail
Date	30 October 2026
Method	Website footer links; public profile pages viewed in Chrome (logged out for Instagram and TikTok; YouTube viewed without changing anything)
Limits	No account logins, so no private analytics (reach, watch time, demographics). Those come from YouTube Studio and Meta Business Suite once access is shared
Accounts found	YouTube, Instagram, Facebook (linked from the website). No TikTok, Pinterest, LinkedIn, X, Threads or Reddit accounts found
Other	A Trustpilot company profile exists for ongoweightloss.com

6.2 Scorecard

Platform	Handle	Size	Activity	Status
YouTube	@ongoweightlossusa	~2.29K subscribers, 134 videos (long-form + ~48 Shorts)	Active (latest video 2 days old)	🟢 Working, needs compliance clean-up
Instagram	@ongoweightloss.usa	~10–11 followers, 0 following, 35 posts	Low	🟠 Started, not growing
Facebook	facebook.com/ongoweightloss	1 follower	Last visible post 20 Feb 2025	🔴 Dormant
TikTok	none	—	—	⚪ Not started (rules first, Chapter 13)
Pinterest, LinkedIn, Reddit, Threads, X	none	—	—	⚪ Not started

6.3 YouTube: what works

Finding	Evidence
Food and protein Shorts perform best	High-protein sweet potato taco ~1.5K views; high-protein breakfast plate ~1.2K; 21 clean-eating ideas ~843; fibre foods ~721
Practical, search-led long videos last	"GLP-1 & Lipedema" ~1.7K; "Plant-Based Diet on GLP-1? ... Muscle" ~1K; "How to Use Saxenda Pen Safely" ~767
Brand basics are in place	Banner, logo, website link, consistent posting

6.4 YouTube: what needs fixing

Issue	Example	Why it matters	Fix
Brand drug names in the channel description	"...popular prescription medications like Wegovy®, Zepbound®..."	Launch-phase rule; implies we deal in those drugs	Rewrite: "GLP-1 education, nutrition and support from Ongo Weight Loss"
First-person "experience" titles	"I Tried Every GLP-1 Medication: The Ultimate Tier List...", "Switching from Ozempic to Mounjaro After 4 Months... Here's What Happened", "I Missed My Wegovy Dose... (Doctor's Emergency Protocol)"	Implies a real patient's experience; FTC endorsement and testimonial rules; brand names	Retitle as education ("What happens if you miss a GLP-1 dose? A provider explains") or unlist after review
Brand-pen how-to	"How to Use Saxenda Pen Safely"	We don't offer it; can mislead viewers about what we provide	Keep only if compliance approves with "Ongo Weight Loss does not offer Saxenda"; add a compounded-vial guide
AI-looking before/after thumbnails	"Ozempic Face" thumbnail	Can read as fake results	Use illustrations or clearly labelled images
Low views on news videos	Latest uploads 15–88 views	News-chasing without search demand	Shift to evergreen questions and series
Onboarding Step videos	"Step 1 You Need to Do First" (~98–161 views)	Useful for patients but vague titles	Retitle: "Ongo Weight Loss sign-up, step 1: create your account" and add to a playlist

6.5 Instagram: findings and fixes

Finding	Fix	Why it matters
Handle `ongoweightloss.usa` vs. YouTube `ongoweightlossusa`	Keep both (changing handles breaks links), but make display names identical: "Ongo Weight Loss"	Consistency for search

Finding	Fix	Why it matters
Bio is clear ("Your guide to better weight management...")	Add who we are + one proof point + CTA, e.g. "Doctor-led online weight care · Licensed U.S. providers · Compounded GLP-1 options · Start here ↓"	Explains the account in 3 seconds
35 posts, ~10 followers	Restart with Reels-first plan (Chapter 11)	Reels drive non-follower reach
No visible Highlights strategy	Create Highlights: Start Here, Pricing, How It Works, Recipes, Meet the Team, FAQ	Answers new visitors' questions

6.6 Facebook: findings and fixes

Finding	Fix
Name "ONGO Weight Loss" (capitals)	Rename to "Ongo Weight Loss"
Category "Weight Loss Center" with a New York street address	Confirm with leadership whether that address is real and should be public; for an online service, a service-area business or no address may fit better; match the website and Google Business Profile exactly
1 follower; inactive since Feb 2025	Relaunch with weekly posts and Reels cross-posted from Instagram
No reviews ("Not yet rated")	Turn on recommendations only once there's a plan to respond (Chapter 35)

> 🪔 **Desi analogy: dukaan ka shutter**
>
> Mohalle mein dukaan ka board laga hai, lekin shutter saal bhar se band hai. Log sochte hain dukaan band ho gayi. **Band pada Facebook page wahi bandh shutter hai**: ya toh kholo aur chalao, ya board theek karo.

6.7 The top ten social fixes

#	Fix	Owner	Chapter
1	Compliance review of all YouTube titles, descriptions and thumbnails with brand names or first-person claims	Social + legal/medical	32
2	Rewrite the YouTube channel description	Social	9
3	Make display names identical: "Ongo Weight Loss" everywhere	Social	19
4	Rename and refresh the Facebook page; decide on the address	Social + leadership	12
5	Relaunch Instagram with a Reels-first plan and Highlights	Social + design	11
6	Build an on-site link-in-bio page with UTMs	Social + dev	40
7	Organise YouTube into playlists (Food on GLP-1, Getting Started, Side Effects, Movement)	Social	9
8	Set up a shared account register with company-owned logins and 2FA	Team lead	19
9	Decide TikTok entry with the rules in Chapter 13	Team lead	13
10	Monitor Trustpilot and reply professionally	Social	18, 35

6.8 Do's and Don'ts

✅ Do	❌ Don't
Build on the platform that already works (YouTube)	Abandon YouTube to chase TikTok
Fix risky titles before posting more	Keep publishing in the same pattern
Refresh or tidy dormant accounts	Leave them looking abandoned
Re-audit every quarter	Treat this audit as permanent

6.9 Pros and cons of the current position

✅ Pros	❌ Cons
YouTube lead over many competitors	Instagram, Facebook near zero
Proven content theme (food + protein)	Compliance clean-up needed first
Clean slate on TikTok, Pinterest, Reddit	Competitors have years of Instagram followers

6.10 Where freshers go wrong in Chapter 6 topics

Mistake	Why it happens	Avoid it by	Fix it by
Deleting old videos in panic	Fear of risk	Review first, then unlist or retitle	Restoring and retitling
Changing the handle	Wanting consistency	Changing display names instead	Reverting
Judging the audit by followers only	Easy number	Looking at views per video and themes	Using Studio data

6.11 Thumb rules

👍 Double down on what works; fix what's risky.

👍 A dormant page is worse than no page.

👍 Audit every quarter, with dates.

6.12 Notes to remember

📝 30 Oct 2026: YouTube ~2.29K subscribers / 134 videos; Instagram ~10 followers / 35 posts; Facebook 1 follower.

📝 Food and protein Shorts were the top performers.

Chapter 6 Glossary

Term	Simple meaning
Social audit	A dated review of accounts, content and risks
Handle	The @username
Display name	The name shown on the profile
Highlights	Saved Instagram Story collections on the profile
Unlist	Hide a YouTube video from search without deleting it

Chapter 6 Quiz

1. How many YouTube subscribers did Ongo Weight Loss have on 30 Oct 2026?

- A) 10
- B) About 2,290
- C) 0
- D) 100,000

2. What was the Instagram follower count?

- A) 1 million
- B) 50,000
- C) 2,290
- D) About 10–11

3. When was the last visible Facebook post?

- A) Yesterday
- B) 2010
- C) 20 February 2025
- D) Never

4. What performed best on YouTube Shorts?

- A) Team birthdays
- B) Policy updates
- C) Drug news
- D) Food and protein videos

5. What should replace first-person "I tried..." titles?

- A) Clickbait
- B) Brand names in capitals
- C) More first-person titles
- D) Educational titles reviewed by compliance

6. Should we change the Instagram handle?

- A) Daily
- B) Yes, immediately
- C) Only on Fridays
- D) No; align display names instead

7. What's wrong with the YouTube description?

- A) It's in Spanish
- B) It's too short
- C) It has no emoji
- D) It names brand drugs like Wegovy and Zepbound

8. Which Highlight is recommended?

- A) Competitor ads
- B) Patient records
- C) Start Here
- D) Random memes

9. What's the Facebook name issue?

- A) "ONGO" in capitals
- B) Missing "Inc."
- C) Too long
- D) Uses emoji

10. In the shutter analogy, a dormant page…

- A) Looks like a closed shop
- B) Is free advertising
- C) Is invisible
- D) Brings customers

Sources

1. Ongo Weight Loss, social media audit of YouTube, Instagram and Facebook and competitor follower counts, 30 October 2026 (internal) 🔵

Chapter 7: The Competitor Landscape on Social Media

We mapped all 100 competitors on your list and audited the public social profiles of about 50. Here's who is where, how big they are, and what that tells us.

> 💡 **Trivia**
>
> Found (JoinFound) had about **50,000 Instagram followers but only 36 posts** on 30 October 2026, while Shed had **14,000 followers from 601 posts**. [1] 🔵 Ongo Weight Loss internal
>
> Follower counts can come from ads, old campaigns or archived posts. Never copy a competitor's number; study what they actually publish.

7.1 How we audited

Step	What we did	Coverage
1	Read social links from each competitor's homepage footer	~75 of 100 sites readable; others blocked bots, redirected or were offline
2	Opened public Instagram profiles (logged out)	46 brands
3	Opened TikTok profiles	12 brands
4	Opened YouTube channels	10 brands
5	Sampled recent content themes where visible	Key brands

Full presence table for all 100: **Appendix G**. Counts are public figures on one day and change daily. 🔵

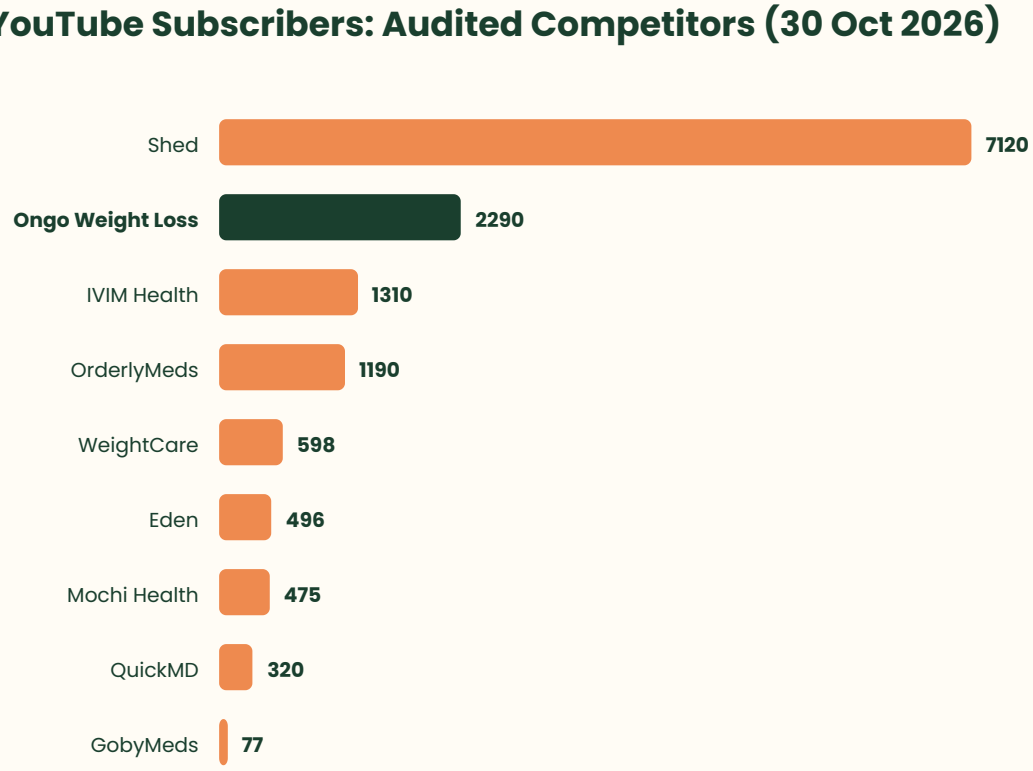

7.2 Instagram leaders (followers, 30 Oct 2026)

Tier	Brands
Giants (250K+)	WeightWatchers 2M · Noom 664K · Hers 341K · Hims 286K
Large (100K–250K)	Everlywell 187K · Ro 116K · Ivím Health 115K
Mid (25K–100K)	Mochi 53K · Red Mountain 53K · Fridays 50K · Found 50K · Emerge 49K · AgelessRx 45K · QuickMD 40K · Vibrant Health 39K · NuForm 36K · Regenics 30K · Maximus 30K
Small (5K–25K)	FuturHealth 24K · Eden 22K · LifeMD 22K · Henry Meds 19K · Calibrate 15K · Shed 14K · NuImage 14K · Amble 13K · Brello 11K · Valhalla 10K · WeightCare 8.3K · Balanced Hormone Health 7.8K · Precision Telemed 7.1K · Fella 5.8K · Defy 5.7K · PlushCare 5.4K
Tiny (under 5K)	Unique Physique 3.3K · Olympia 2.2K · Pomegranate 1.9K · Pure Harmony 1.9K · MinuteMD 809 · Enbold 703 · Zappy 316 · Zealthy 107 · **Ongo Weight Loss ~10**

7.3 TikTok and YouTube

TikTok (followers / total likes)	YouTube (subscribers)
Hims 474K / 7.6M	WeightWatchers 187K
WeightWatchers 273K / 1.3M	Shed 7.12K
Ivím Health 68.4K / 76.7K	**Ongo Weight Loss 2.29K**
Ro 35.4K / 338K	Ivím Health 1.31K
Mochi 25.3K / 99.8K	OrderlyMeds (Educational) 1.19K
Noom 14.4K / 126K	WeightCare 598
Shed 13.2K / 55K	Eden 496
FuturHealth 11.9K / 97.7K	Mochi 475
Eden 9.1K / 313.6K	QuickMD 320
LifeMD 8.7K / 51.9K	GobyMeds 77

TikTok (followers / total likes)	YouTube (subscribers)
Found 7.2K / 123.7K	

WeightWatchers (187K) is off the chart; Ongo Weight Loss is #3 overall.

7.4 Who is on which platform (most common patterns)

Pattern	Examples	What it tells us
Instagram + Facebook + TikTok	Fridays, Emerge, Amble, Found, MinuteMD	Standard DTC telehealth mix
Full stack incl. YouTube + LinkedIn	Mochi, Eden, GobyMeds, Brello, QuickMD, NuForm, Zappy	Bigger teams
Own subreddit	Mochi (r/MochiTelehealth), Zealthy (r/getZealthy), Fella (r/FellaHealth), Olympia	Community support and SEO via Reddit
Pinterest	Zealthy, Calibrate, Vibrant Health, WeightCare, Red Mountain, Balanced Hormone Health	Recipes and lifestyle traffic

Pattern	Examples	What it tells us
Threads	FuturHealth	Early experiment
Founder-led / doctor-led	JumpstartMD (Dr. Sean Bourke)	Personal trust; small but credible
Barely active	Zealthy IG (107 followers, 222 posts), MinuteMD (6 posts), Enbold (22 posts)	Easy to overtake

> 🍛 **Desi analogy: cricket ka points table**
>
> Points table dekh ke hum har team ko copy nahi karte. Dekhte hain kaunsi team kis pitch pe jeet rahi hai aur kahan kamzor hai. **Competitor audit points table hai: kahan ladna hai, kahan nahi.**

7.5 What the leaders do well (patterns we can learn from)

Pattern	Seen at	Ongo Weight Loss version
Lifestyle-first, product-second content	Ivím (travel on GLP-1 video ~152K views), Mochi	Food, protein, travel, routines
Seasonal tie-ins	Ivím "Boo Basket" Halloween giveaway	Holiday and awareness-day content (Chapter 26)
Community spaces	Mochi, Zealthy subreddits	A moderated community (Chapter 16)
Real people on camera	Ivím team and members, Hims creators	Creators and providers (Chapters 28–29)
Clear brand voice	Hims, Ro	Warm, honest, plain-English voice (Chapter 22)

7.6 What we will not copy

Seen in the market	Why we won't
Spacing out words like "G L P-1" to dodge moderation	Deliberately evading platform rules can get accounts penalised
"Same as Ozempic" style claims	FDA flagged these (Chapter 3)
Unclear before/after imagery	FTC and platform risk (Chapter 30)
Giveaways requiring "tag 3 friends"	Engagement bait; contest rules (Chapter 27)

> 🟧 **Ongo Weight Loss example**
>
> The fastest wins are where competitors are weak: **YouTube** (most competitors under 1.5K subscribers), **Pinterest** (only a few competitors active), and **helpful Reddit participation**. Instagram and TikTok are crowded with brands that have 10K–100K followers, so there we compete on quality and consistency, not volume. Chapter 42 has the full gap plan. 🔵

7.7 Do's and Don'ts

✅ Do	❌ Don't
Study content themes and formats	Copy captions or videos
Look for weak platforms	Fight giants on their strongest platform first
Re-check counts quarterly	Quote today's numbers in six months
Note risky tactics to avoid	Assume big brands are compliant

7.8 Pros and cons of competitor benchmarking

✅ Pros	❌ Cons
Shows where to compete	Numbers can be inflated or ad-driven

✅ Pros	❌ Cons
Reveals content patterns that work	Can lead to copying
Finds gaps quickly	Public data misses private metrics

7.9 Where freshers go wrong in Chapter 7 topics

Mistake	Why it happens	Avoid it by	Fix it by
Treating follower count as success	Visible number	Comparing views per post	Measuring engagement
Copying a viral video exactly	Shortcut	Adapting the idea	Creating original versions
Following competitors' risky claims	"They do it"	Chapter 3 test	Reviewing

7.10 Thumb rules

> 👍 Learn patterns, never copy posts.
>
> 👍 Win where others are weak, then expand.
>
> 👍 Big followers ≠ big engagement.

7.11 Notes to remember

> 📝 Ongo Weight Loss ranks #3 on YouTube among the GLP-1 telehealth brands checked.
>
> 📝 Six competitors run Pinterest; four have their own subreddit.

Chapter 7 Glossary

Term	Simple meaning
Benchmarking	Comparing yourself with others
Content theme	A repeated topic area
Algospeak	Misspelling words to avoid moderation
Full stack	Being active on most platforms
Founder-led	A brand where the founder is the main voice

Chapter 7 Quiz

1. How many brands' Instagram profiles were audited?

- A) 0
- B) 3
- C) 100
- D) 46

2. Which brand had 50K Instagram followers but only 36 posts?

- A) Zealthy
- B) Found
- C) Shed
- D) Noom

3. Where does Ongo Weight Loss rank on YouTube among those checked?

- A) #3
- B) #1 overall
- C) Last
- D) Not ranked

4. Which brands run their own subreddit?

- A) Noom only
- B) Hims and Hers only

- C) Mochi, Zealthy, Fella, Olympia
- D) None

5. What was Ivím's top TikTok topic?

- A) Car reviews
- B) Stock market tips
- C) Travelling while on GLP-1 treatment
- D) Celebrity gossip

6. Should we copy "G L P-1" spacing?

- A) Yes
- B) Only in Spanish
- C) Only on Instagram
- D) No; it's rule evasion

7. Which platform shows few competitors and good traffic?

- A) None
- B) Pinterest
- C) TikTok
- D) Instagram

8. What does a big follower count prove?

- A) Good content
- B) Guaranteed sales
- C) Not necessarily engagement or quality
- D) Compliance

9. How often should competitor counts be re-checked?

- A) Hourly
- B) Never
- C) Every 10 years
- D) Quarterly

10. In the points-table analogy, competitor audits help us…

- A) Choose where to compete
- B) Copy every team

- C) Change the rules
- D) Skip matches

Sources

02

LEVEL 2

Platforms

Where to show up and how: YouTube, Shorts, Instagram, Facebook, TikTok, Pinterest, LinkedIn, Reddit, emerging platforms, reviews and account security.

8 · Which Platforms, In What Order, and Why

9 · YouTube: Our Anchor Platform

10 · YouTube Shorts and Vertical Video

11 · Instagram: Reels, Carousels, Stories and the Profile

12 · Facebook: Pages, Reels and Groups

13 · TikTok: Read the Rules Before You Post

14 · Pinterest: The Visual Search Engine

15 · LinkedIn: Credibility, Doctors and Partners

16 · Reddit and Online Communities

17 · Threads, X and Emerging Platforms

18 · Google Business Profile, Review Sites and WhatsApp

19 · Creating, Owning and Securing Every Account

LEVEL 2 · CHAPTER 8

Chapter 8: Which Platforms, In What Order, and Why

You can't be great everywhere at once. Pick platforms by audience, by where competitors are weak, and by what the team can sustain every week.

> 💡 **Trivia**
>
> YouTube (84%) and Facebook (71%) are the only platforms used by a **majority of every U.S. age group**. [1] ● Official (Pew Research Center, 2025)
>
> For an audience centred on people aged 30–64, those two can't be skipped.

8.1 The scoring method

Each platform is scored 1–5 on five questions:

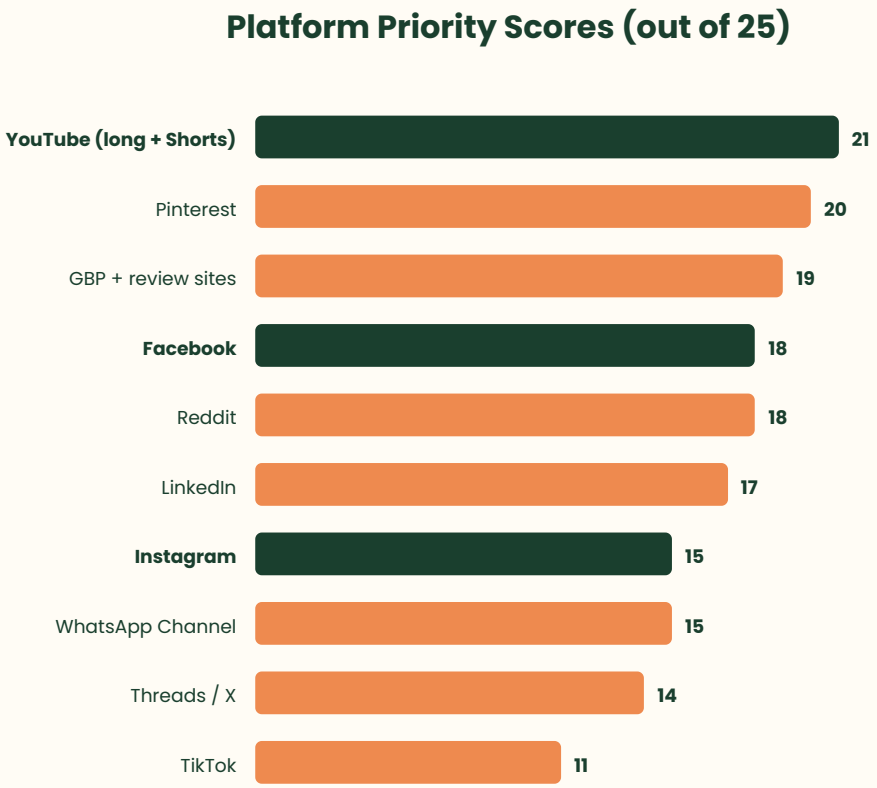

Question	Why
Audience fit	Are our personas there? (Chapter 5)
Competitive gap	Are competitors weak there? (Chapter 7)
Search and website value	Does it feed Google, AI answers and traffic? (Chapter 4)
Rule risk (inverted: 5 = low risk)	How strict are health and weight-loss rules? (Chapter 33)
Effort (inverted: 5 = low effort)	Can the team sustain it?

8.2 The scores

Platform	Audience	Gap	Search/web	Rule risk	Effort	Total /25	Priority
YouTube (long + Shorts)	5	5	5	4	2	**21**	**P1**
Instagram	4	2	3	3	3	**15**	**P1** (Reels feed YouTube Shorts and Facebook)
Facebook	5	3	3	3	4	**18**	**P1** (cross-post + Groups later)
Pinterest	3	5	4	4	4	**20**	**P2**
Reddit (participation)	3	4	5	3	3	**18**	**P2**
TikTok	3	2	3	1	2	**11**	**P3** (education/lifestyle only; strict rules)
LinkedIn	2	4	3	4	4	**17**	**P3** (doctors, partners, hiring)
Google Business Profile + review sites	4	3	4	4	4	**19**	**Always on** (Chapter 18)
Threads / X	2	3	2	3	4	**14**	Later
WhatsApp Channel	3 (Spanish)	4	1	3	4	**15**	Later (Spanish phase)

Scores are Ongo Weight Loss editorial judgment, October 2026. 🔵

> **Desi analogy: shaadi ke function**
>
> Har relative ki shaadi mein jaana possible nahi. Pehle sabse kareebi (P1), phir jahan rishta mazboot karna hai (P2), aur baaki ko shubhkaamna message (P3). **Platform bhi waise hi chuno: pehle jahan apne log hain.**

P1 platforms highlighted: YouTube, Facebook and Instagram (audience first).

8.3 What each platform does for Ongo Weight Loss

Platform	Main job for us	Content focus
YouTube	Search + trust + education	GLP-1 education, how-tos, provider explainers, food Shorts
Instagram	Reach + brand + community	Reels, carousels, Stories with polls, Highlights
Facebook	Reach among 30–64; community	Cross-posted Reels, longer captions, future Group

Platform	Main job for us	Content focus
Pinterest	Website traffic from planners	Recipe and meal-plan pins linking to blog guides
Reddit	Search + AI answers + trust	Helpful answers in relevant subreddits (disclosed)
TikTok	Reach among under-45s	Food, routines, myths, provider Q&A (no product promotion)
LinkedIn	Credibility, partners, hiring	Doctor and leadership posts, company news
Google Business Profile	Local and brand search trust	Accurate info, reviews, posts

8.4 The 90-day rollout

Weeks	Platforms	Goal
1–2	Fix YouTube, Instagram, Facebook (Chapter 6 top ten)	Clean, consistent, compliant
3–6	YouTube (2 long + 5 Shorts/week), Instagram (4 Reels + 2 carousels/week), Facebook (cross-posts)	Consistent rhythm
7–10	Add Pinterest (10–15 pins/week from existing content)	Website traffic
11–13	Start Reddit participation; decide TikTok with team lead	Search and community

Content is created once and adapted: one long YouTube video can become 3 Shorts, 3 Reels, 1 carousel, 5 pins and a blog embed (Chapter 21).

> 🟧 **Ongo Weight Loss example**
>
> With ~2.29K YouTube subscribers already, YouTube is the anchor. Instagram Reels can reuse the same vertical videos as YouTube Shorts (exported without watermarks), and Facebook can share them too. One recording session feeds three P1 platforms. 🔵

8.5 Do's and Don'ts

✅ Do	❌ Don't
Start with 3 platforms done well	Open 10 accounts at once
Reuse content smartly per platform	Post identical captions everywhere
Score platforms again each quarter	Lock priorities forever
Reserve handles on future platforms	Let someone else take our name

8.6 Pros and cons of a focused rollout

✅ Pros	❌ Cons
Quality stays high	Some audiences wait
Easier to measure what works	Competitors may grab gaps first
Team doesn't burn out	Needs discipline to say "not yet"

8.7 Where freshers go wrong in Chapter 8 topics

Mistake	Why it happens	Avoid it by	Fix it by
Starting TikTok first	Hype	Rule-risk score	Following the rollout
Ignoring Facebook	"Only old people"	Pew data	Cross-posting
Abandoning a platform after 2 weeks	Impatience	90-day minimum	Restarting with a plan

8.8 Thumb rules

👍 YouTube anchors; Instagram and Facebook amplify; Pinterest and Reddit feed search.

👍 Three platforms done well beat ten done badly.

👍 Reserve the handle even where you don't post yet.

8.9 Notes to remember

📝 P1: YouTube, Instagram, Facebook. P2: Pinterest, Reddit. P3: TikTok, LinkedIn. Always on: Google Business Profile and reviews.

📝 One recording → many formats.

Chapter 8 Glossary

Term	Simple meaning
Priority (P1/P2/P3)	The order we invest in platforms
Cross-posting	Sharing the same content on several platforms
Repurposing	Turning one piece into several formats
Handle reservation	Creating an account to protect the name
Rollout	A staged plan for launching

Chapter 8 Quiz

1. Which platforms are used by a majority of every U.S. age group?

- A) Reddit and X
- B) YouTube and Facebook
- C) Threads and Bluesky

- D) TikTok and Snapchat

2. Which platform scored highest for Ongo Weight Loss?

- A) TikTok
- B) YouTube
- C) Threads
- D) X

3. Why is TikTok P3?

- A) It's illegal
- B) Strict weight-loss rules and crowded competition
- C) Nobody uses it
- D) It has no video

4. What is Pinterest's main job for us?

- A) Live streaming
- B) Website traffic from planners
- C) DMs
- D) Hiring

5. How many platforms should we start with?

- A) None
- B) One forever
- C) Ten at once
- D) Three done well

6. What can one long YouTube video become?

- A) Nothing else
- B) A podcast only
- C) Shorts, Reels, a carousel, pins and a blog embed
- D) Only a tweet

7. When does Pinterest start in the rollout?

- A) Weeks 7–10
- B) Year 2
- C) Never

- D) Day 1

8. Why reserve handles?

- A) To buy followers
- B) So nobody else takes our name
- C) It's required by law
- D) To post daily

9. What's LinkedIn's main job?

- A) Patient DMs
- B) Memes
- C) Recipes
- D) Credibility, partners and hiring

10. In the shaadi analogy, platform priority is like…

- A) Skipping all weddings
- B) Attending every wedding
- C) Attending the closest relatives' weddings first
- D) Hosting your own

Sources

1. Pew Research Center, Americans' Social Media Use 2025 (November 20, 2025)
2. Ongo Weight Loss, social and competitor audit, 30 October 2026 (internal)

Answer key, Chapter 8: 1-B · 2-B · 3-B · 4-B · 5-D · 6-C · 7-A · 8-B · 9-D · 10-C

LEVEL 2 · CHAPTER 9

Chapter 9: YouTube: Our Anchor Platform

YouTube is a search engine, a TV channel and a trust builder in one. It's where Ongo Weight Loss already leads many competitors, so this is where we go deepest.

> 💡 **Trivia**
>
> YouTube says its recommendations use watch history, search history, subscriptions, likes, dislikes, "not interested" and "don't recommend channel" feedback, and **satisfaction surveys** that help it understand "satisfaction, not just watch time." [1] ● Official (YouTube)
>
> A video people click and then regret watching hurts the channel. A video that answers the question well helps it.

9.1 How YouTube decides what to show

Surface	What drives it	What we control
Search	Title, description, chapters, captions, relevance, engagement	Clear question-based titles; transcripts
Home / Suggested	Viewer history + satisfaction	Thumbnails that match content; strong retention
Shorts feed	Swipe-away rate, completion, loops	First 2 seconds (Chapter 10)
Google search & AI answers	Video relevance; key moments from chapters	Chapters and accurate titles

9.2 Setting up the channel properly (step by step)

Step	Where	What to do
1	YouTube Studio → Customisation → Branding	Logo (800×800), banner (2560×1440, safe area 1546×423), watermark (subscribe button image)
2	Customisation → Basic info	Name "Ongo Weight Loss"; handle stays @ongoweightlossusa; description (see 9.3); links: website, Instagram, Facebook
3	Customisation → Layout	Channel trailer for non-subscribers; featured sections by playlist
4	Settings → Channel → Advanced	Country: United States; audience: not made for kids
5	Settings → Upload defaults	Default description footer (disclaimer + links), category "Education"
6	Settings → Permissions	Add team members with roles (Manager, Editor, Viewer); never share the owner's password
7	YouTube Health features (later)	Licensed providers or organisations can apply to be recognised as health sources (Chapter 28)

Screenshot guide (what you'll see): YouTube Studio's left menu shows Dashboard, Content, Analytics, Comments, Subtitles, Customisation. The Customisation page has three tabs: Layout, Branding, Basic info. Click "Publish" (top right) after every change.

9.3 The channel description: before and after

Before (live)	After (proposed)
"Welcome to Ongo Weight Loss USA. Here, we simplify your weight loss journey by decoding information about popular prescription medications like Wegovy®, Zepbound®..."	"Ongo Weight Loss makes medical weight loss easier to understand. Doctor-reviewed videos on GLP-1 treatment, side effects, protein, food and movement, plus step-by-step help for getting started online. Educational content only, not medical advice. Talk to a licensed provider about your care. 👉 ongoweightloss.com"

Why the "after" is better: it says who we are and what viewers get, keeps brand drug names out of our commercial channel description, includes a short disclaimer, and points to the website.

9.4 Titles, thumbnails and descriptions

Element	Rule	✅ Example
Title	The viewer's question, plain words, under ~60 characters visible	"What Happens If You Miss a GLP-1 Dose?"
Thumbnail	1280×720; one face or one object; 3–4 words; brand colours; no fake before/after	Provider portrait + "Missed a dose?"
First 2 lines of description	Answer summary + link with UTM	"Missed a weekly dose? Here's what providers usually advise... Guide: ongoweightloss.com/blog/..."
Chapters	Timestamps starting 0:00, at least 3	0:00 Intro · 0:20 Within 4 days · 1:05 After 4 days...
Captions	Upload or correct auto-captions	Improves accessibility and search
Pinned comment	Link to the guide + question for viewers	"Full guide here ↓ What's your biggest question about doses?"
End screen	Next video + subscribe	Keeps viewers on the channel
Disclaimer	Short line in every description	"Educational only. Compounded medications are not FDA-approved. Ongo Weight Loss does not offer [brand], if mentioned."

> 🍛 **Desi analogy: restaurant ka menu board**
>
> Menu pe likha ho "Special Dish No. 4", toh koi order nahi karta. "Paneer Butter Masala, mild spicy, 2 logon ke liye" — turant samajh aata hai. **YouTube title wahi menu line hai: kya milega, kiske liye.**

9.5 Content series that fit our audience

Series	Format	Example titles
Eat Well on GLP-1	Shorts + 6–8 min long	"High-Protein Breakfasts That Keep You Full"

Series	Format	Example titles
Ask a Provider	3–6 min, provider on camera (or reviewed voiceover)	"Is Nausea Normal on Semaglutide?"
Getting Started with Ongo Weight Loss	Playlist, 1–2 min each	"Step 1: Create Your Account"
Move & Keep Muscle	Shorts + workouts	"10-Minute Strength Routine for Beginners"
Myth or Fact	Shorts	"Do GLP-1s Cause 'Face Ageing'?"
Understand Your Treatment	5–10 min explainers	"Compounded vs. FDA-Approved Medications: What's the Difference?"

9.6 Retention basics

Moment	Goal	Technique
0–15 s	Confirm the viewer is in the right place	Say the question and the promise: "In 3 minutes: what to do if you miss a dose."
15–60 s	Deliver value early	First key point immediately; no long intros
Middle	Keep attention	Pattern breaks: b-roll, on-screen text, examples
End	Next step	One CTA: guide link or next video; no "smash that like" spam

Check **Analytics → Engagement → Audience retention** after 48 hours. Dips show where people leave.

> 🟧 **Ongo Weight Loss example**
>
> Retitle "I Missed My Wegovy Dose... Here's What Happened (Doctor's Emergency Protocol)" to **"Missed a GLP-1 Dose? What Providers Usually Advise"** (after medical review), add chapters and a link to the dosing guide on the website. The new title answers a real search, avoids a brand name and a fake first-person story, and keeps the video's value. 🔵

9.7 Do's and Don'ts

✅ Do	❌ Don't
Title with the viewer's question	Use clickbait or fake stories
Add chapters, captions and a pinned comment	Leave auto-captions uncorrected
Build playlists by series	Upload random one-offs
Link every video to a website guide (UTM)	Leave descriptions empty

9.8 Pros and cons of YouTube for us

✅ Pros	❌ Cons
Long life: videos get views for years	Production takes time
Appears in Google and AI answers	Needs good audio and editing
We already lead most competitors	Medical misinformation rules apply strictly

9.9 Where freshers go wrong in Chapter 9 topics

Mistake	Why it happens	Avoid it by	Fix it by
Thumbnail doesn't match the video	Chasing clicks	Matching promise and content	New thumbnail
No links in descriptions	Rushing	Upload defaults	Bulk-editing descriptions
Uploading without chapters	Not knowing	Checklist	Adding timestamps

9.10 Thumb rules

👍 Answer the question in the title, deliver it in the first 30 seconds.

👍 Every video: chapters, captions, pinned comment, website link.

👍 Satisfied viewers beat curious clickers.

9.11 Notes to remember

📝 YouTube recommendations use satisfaction surveys, not just watch time.

📝 Banner 2560×1440 (safe area 1546×423); thumbnail 1280×720.

Chapter 9 Glossary

Term	Simple meaning
YouTube Studio	The dashboard for managing a channel
Audience retention	How much of a video people watch
Chapters	Timestamped sections in a video
End screen	Clickable elements in the last 5–20 seconds
Channel trailer	A video shown to non-subscribers on the channel page

---

Chapter 9 Quiz

1. What does YouTube say its surveys measure?

- A) Upload speed
- B) Follower age
- C) Ad revenue
- D) Satisfaction, not just watch time

2. What size is a YouTube thumbnail?

- A) 100×100
- B) 1280×720
- C) 4000×4000
- D) 640×1136

3. What should the first two description lines do?

- A) List hashtags
- B) Summarise the answer and link to the guide
- C) Thank sponsors
- D) Nothing

4. Where do you add team members safely?

- A) Email the login
- B) Share the owner password
- C) Post it in Slack
- D) Settings → Permissions with roles

5. Which title is best?

- A) Video 47
- B) Missed a GLP-1 Dose? What Providers Usually Advise
- C) SHOCKING TRUTH!!!
- D) I Missed My Wegovy Dose... Here's What Happened

6. How many chapters at minimum?

- A) Three, starting at 0:00
- B) One
- C) None
- D) Fifty

7. Where do you check retention?

- A) Comments
- B) Banner settings
- C) Playlists
- D) Analytics → Engagement → Audience retention

8. What should the channel description avoid?

- A) Our brand name
- B) A disclaimer
- C) A website link
- D) Brand drug names on our commercial channel

9. What should the first 15 seconds do?

- A) Play a long logo intro
- B) Show credits
- C) Ask for likes
- D) Confirm the question and promise

10. In the menu analogy, a YouTube title…

- A) Is optional
- B) Clearly says what you'll get
- C) Lists the price only
- D) Hides the dish name

LEVEL 2 · CHAPTER 10

Chapter 10: YouTube Shorts and Vertical Video

Shorts are our proven winners. One good vertical video can be published as a YouTube Short, an Instagram Reel, a Facebook Reel and (when ready) a TikTok.

> 💡 **Trivia**
>
> YouTube lets Shorts run up to **3 minutes** (since 15 October 2024), but the Ongo Weight Loss Shorts that performed best were simple 20–45-second food and protein ideas reaching **~700–1,500 views** each, far more than most of our long medication videos. [1] 🟢 Official (YouTube) · 🔵 Ongo Weight Loss internal
>
> Longer is allowed. Shorter and clearer usually wins.

10.1 Vertical video specs (all platforms)

Spec	Value
Aspect ratio	9:16
Resolution	1080×1920
Safe zone	Keep text and faces away from the top 250 px and bottom 350 px (buttons and captions cover them)
Length	15–45 s for most ideas; up to 90 s for how-tos
Captions	Burned-in (on-screen) + platform captions
Audio	Clear voice; licensed or platform-library music only
File	No watermark from other apps (Instagram demotes watermarked Reels)

10.2 The anatomy of a winning Short

Seconds	Part	Example (High-protein breakfast)
0–2	**Hook** (visual + text)	Close-up of the plate; text: "30 g protein, 5 minutes"
2–8	**Promise / context**	"If GLP-1s make breakfast hard, try this"
8–35	**Value**	3 quick steps with on-screen ingredients
35–40	**Payoff**	Finished plate + "Keeps you full till lunch"
40–45	**Soft CTA**	"More GLP-1-friendly recipes on our channel"

> 🍛 **Desi analogy: street-food stall**
>
> Golgappe wala pehle hi second mein khushboo aur awaaz se rok leta hai, 30 second mein plate haath mein, aur aap bolte ho "ek aur". **Short bhi wahi stall hai: turant rokna, jaldi dena, aur "ek aur" bulwana.**

10.3 Short ideas mapped to personas

Persona	Short ideas
Aisha (food & fitness)	Protein swaps; 5-ingredient lunches; "what I'd eat in a day on GLP-1" with a dietitian (not a fake patient)
Maria (cost-conscious)	"What's included in an Ongo Weight Loss plan" (prices as on the website); budget grocery list
Linda (menopause)	Strength moves for joints; protein for midlife; provider Q&A clips
James (data)	30-second myth vs. fact; "what studies of brand semaglutide showed" (trial named)
Current patients	Injection site rotation (reviewed); storing vials; travel tips

10.4 Linking Shorts to long videos

Tool	How
Related video link	In the Shorts upload, choose a "Related video" so viewers can tap through to the full long video
Pinned comment	"Full guide in our long video and on ongoweightloss.com"
Playlists	Add Shorts to series playlists

10.5 Sample Short script, with why it's better

Weak version: "GLP-1 diet tips! Follow for more!! #ozempic #weightloss #glp1 #fyp" (text-only screen, 60 s).

Better version (35 s):

> **On screen:** "Hard to eat on GLP-1? Try this 3-minute protein bowl" **Voice:** "Smaller appetite on GLP-1 treatment? Protein still matters. Greek yogurt, berries, chia, a spoon of nut butter. About 30 grams of protein, and easy on the stomach. Save this for tomorrow morning." **Caption:** "A simple, high-protein breakfast for smaller appetites. Educational only; talk to your provider about your nutrition needs. #highprotein #glp1 #mealprep"

Why it's better: hook names a real problem; value arrives in seconds; "save this" asks for the save signal; no brand drug hashtags; short disclaimer; real food, not a claim about results.

> 🟧 **Ongo Weight Loss example**
>
> The top live Shorts were food: sweet potato taco (~1.5K), high-protein breakfast (~1.2K), 21 clean-eating meals (~843). Make **"Eat Well on GLP-1"** a weekly Shorts series, link each to a recipe or nutrition guide on the blog, and repost the same files (without watermarks) as Instagram and Facebook Reels. 🔵

10.6 Do's and Don'ts

✅ Do	❌ Don't
Hook in 2 seconds	Start with a logo animation
Keep text inside the safe zone	Put captions under the buttons
Link to a long video or guide	Leave Shorts disconnected
Upload clean files to each platform	Cross-post with TikTok watermarks

10.7 Pros and cons of Shorts

✅ Pros	❌ Cons
Fast reach to non-subscribers	Lower viewer commitment than long videos
Cheap to produce	Views can drop off quickly
One file works on several platforms	Easy to make low-value filler

10.8 Where freshers go wrong in Chapter 10 topics

Mistake	Why it happens	Avoid it by	Fix it by
60-second videos with 10 seconds of value	Padding	The anatomy table	Cutting
Text under platform buttons	Not checking safe zones	Template overlays	Re-exporting
Trending audio that isn't licensed for business	Copying creators	Business-safe audio libraries	Replacing audio

10.9 Thumb rules

👍 Hook, promise, value, payoff, soft CTA.

👍 9:16, 1080×1920, safe zones, captions.

👍 One file, many platforms, no watermarks.

10.10 Notes to remember

📝 Shorts can be up to 3 minutes; 20–45 s works best for our food content.

📝 Use the "Related video" link to send Short viewers to long videos.

Chapter 10 Glossary

Term	Simple meaning
Short	A vertical YouTube video up to 3 minutes
Hook	The first seconds that stop the scroll
Safe zone	Area not covered by app buttons
Swipe-away rate	Share of viewers who skip quickly
Related video link	A Shorts link to a longer video

Chapter 10 Quiz

1. What's the vertical video resolution?

- A) 640×480
- B) 1080×1920
- C) 1920×1080
- D) 100×100

2. How long can Shorts be?

- A) 10 seconds
- B) 1 hour
- C) 15 minutes
- D) Up to 3 minutes

3. What should the first 2 seconds contain?

- A) Credits
- B) A logo animation
- C) A hook
- D) Silence

4. Why avoid TikTok watermarks on Reels?

- A) They're required
- B) They look nice
- C) They add reach
- D) Instagram demotes watermarked Reels

5. Which Ongo Weight Loss Shorts performed best?

- A) Office tours
- B) Policy updates
- C) Drug news
- D) Food and protein ideas

6. What does "save this" ask for?

- A) Nothing
- B) A purchase
- C) The save signal
- D) A follow on a competitor

7. How do you link a Short to a long video?

- A) Thumbnail
- B) Hashtag
- C) Related video link
- D) Watermark

8. Which hashtag set is wrong for us?

- A) #highprotein #mealprep
- B) #ozempic #weightloss
- C) #glp1 #recipes
- D) #healthyeating

9. Where should on-screen text sit?

- A) Inside the safe zone
- B) Anywhere
- C) Off-screen
- D) Under the buttons

10. In the street-food analogy, a good Short…

- A) Makes you wait
- B) Closes early
- C) Stops you fast and makes you want "one more"
- D) Has no taste

Answer key, Chapter 10: 1-B · 2-D · 3-C · 4-D · 5-D · 6-C · 7-C · 8-B · 9-A · 10-C

LEVEL 2 · CHAPTER 11

Chapter 11: Instagram: Reels, Carousels, Stories and the Profile

Instagram is where many of our core users (especially women under 50) scroll daily. With about 10 followers, we're starting fresh, which means every post is a chance to set the right pattern.

> 💡 **Trivia**
>
> Instagram says Reels are ranked mainly on how likely you are to **reshare, watch through, like, or visit the audio page**, and that Reels which are **low-resolution, watermarked, muted, bordered, mostly text, or already posted** on Instagram are made less visible. [1] 🟢 Official (Instagram)
>
> Shares (sends in DMs) are the signal to design for.

11.1 Instagram surfaces and what ranks them

Surface	Main signals	Our format
Reels	Watch-through, sends/reshares, likes	Vertical videos (Chapter 10)
Feed	Seconds spent, comments, likes, shares, profile taps	Carousels (saves, time)
Explore	Likes, saves, shares; speed of engagement	Carousels and Reels people save
Stories	Closeness; replies; taps forward/back	Polls, quizzes, questions, behind-the-scenes
Search	Name, username, bio keywords, captions	Keywords in name field and captions

[1] 🟢

11.2 Profile set-up (step by step)

Step	Where	What
1	Profile → Edit profile → Name	"Ongo Weight Loss | GLP-1 Care" (name field is searchable)
2	Username	Keep @ongoweightloss.usa (changing breaks links)
3	Bio (150 characters)	"Doctor-led online weight care 🇺🇸 · Licensed U.S. providers · Food, movement & GLP-1 education · Start here ↓"
4	Links	On-site link page with UTMs (Chapter 40)
5	Category	Health/beauty → "Medical & health" (or closest available)
6	Account type	Professional → Business (needed for insights, scheduling and Meta Business Suite)
7	Contact options	Email and a business phone only (no personal numbers)
8	Highlights	Start Here · How It Works · Pricing · Recipes · Meet the Team · FAQ
9	Pinned posts (up to 3)	Who we are · How it works · Best recipe Reel
10	Privacy settings	Hidden words filter on (Settings → Hidden words) for abusive comments

Screenshot guide: on your profile, tap **Edit profile** (below the bio). Name, Username, Pronouns, Bio, Links and Category appear in that order. Highlights are created from Stories via the "+" circle under the bio.

11.3 Formats and specs

Format	Size	Best for	Notes
Reel	1080×1920 (9:16)	Reach	Up to 3 min; cover image 1080×1920, grid crop 3:4
Carousel	1080×1350 (4:5)	Saves, education	Up to 20 slides; first slide = hook

Format	Size	Best for	Notes
Single image	1080×1350	Announcements	Lowest reach of the formats
Story	1080×1920	Engagement with followers	Stickers: poll, quiz, question, link, countdown
Trial Reel	9:16	Testing hooks on non-followers first	Shown to non-followers before followers (if available on the account)
Collab post	Any	Partnering with creators	Appears on both profiles; disclose paid partnerships

11.4 A weekly Instagram rhythm (starting point)

Day	Post
Mon	Reel: Eat Well on GLP-1
Tue	Carousel: myth vs. fact or "5 things to know"
Wed	Reel: Ask a Provider clip (reviewed)
Thu	Stories: poll + question box
Fri	Reel: movement / strength
Sat	Carousel: weekly recipe round-up (save bait done right: genuinely useful)
Daily	Stories: 2–4 frames; reply to every comment and DM within 24 hours

11.5 Sample carousel, with why it's better

Weak version: one image with a stock photo of a syringe and the caption "Get GLP-1 now! Link in bio! #ozempic".

Better version (7 slides):

Slide	Text
1 (hook)	"Starting GLP-1 treatment? 5 things nobody tells you"

Slide	Text
2	"1. Appetite drops fast; protein still matters"
3	"2. Nausea is common early; eat smaller, slower meals"
4	"3. Strength training helps protect muscle"
5	"4. Drink water through the day"
6	"5. Doses start low and rise slowly; that's normal"
7 (CTA)	"Questions? Our licensed providers can help. ongoweightloss.com · Educational only."

Caption: "Save this for your first month. Which tip surprised you? 👇"

Why it's better: a clear hook on slide 1; five useful, reviewable tips; asks for saves and comments; no brand names; a soft CTA and disclaimer; no syringe stock photo that looks like a drug ad.

> 🍛 **Desi analogy: IT office ka notice board**
>
> Notice board pe sirf "Meeting!!!" likha ho toh koi nahi rukta. "Friday 4 PM, cafeteria, free samosa, new leave policy explained" — sab rukte hain aur photo bhi le lete hain. **Carousel wahi notice hai jise log save karte hain.**

11.6 Hashtags on Instagram (2026)

Instagram limited posts and Reels to **5 hashtags** (rolled out from December 2025), and Instagram's head Adam Mosseri has said hashtags **don't increase reach**; they help describe what a post is about. [2] 🟠 Use 3–5 precise tags and put keywords in the caption (Chapter 25).

> 🟧 **Ongo Weight Loss example**
>
> Instagram @ongoweightloss.usa had 35 posts and ~10 followers on 30 October 2026, with recipe and GLP-1 tip posts. Keep the useful posts, archive weak ones, set up Highlights and pinned posts, then run the weekly rhythm for 90 days before judging. 🔵

11.7 Do's and Don'ts

✅ Do	❌ Don't
Lead with Reels and carousels	Post single stock images
Use the Name field for keywords	Stuff 30 hashtags
Reply to comments within 24 hours	Leave questions hanging
Use collab posts with disclosed partners	Hide paid relationships

11.8 Pros and cons of Instagram for us

✅ Pros	❌ Cons
Strong among women and under-50s	Crowded with competitors
Posts now indexable by Google	Strict on health claims and body image
Rich formats for education	Growth from zero is slow

11.9 Where freshers go wrong in Chapter 11 topics

Mistake	Why it happens	Avoid it by	Fix it by
Personal account instead of Business	Quick setup	Step 6 of 11.2	Switching to professional
30 hashtags	Old advice	The 5-hashtag limit	Editing captions
Text-only Reels	Fast to make	Real footage	Re-recording

11.10 Thumb rules

👍 Reels for reach, carousels for saves, Stories for conversation.

👍 Name field + caption keywords > hashtags.

👍 Design every post to be sent to a friend.

11.11 Notes to remember

📝 Reels ranked on reshares, watch-through, likes, audio-page visits.

📝 Carousels up to 20 slides at 1080×1350.

Chapter 11 Glossary

Term	Simple meaning
Reel	A short vertical video on Instagram
Carousel	A multi-slide post
Highlights	Saved Story collections on the profile
Collab post	A post shared on two accounts
Trial Reel	A Reel shown first to non-followers

Chapter 11 Quiz

1. Which Reels does Instagram make less visible?

- A) Original HD Reels
- B) Reels under 30 seconds
- C) Reels with captions
- D) Low-res, watermarked, muted, bordered or text-heavy

2. How many hashtags are allowed per post in 2026?

- A) 100
- B) 5
- C) 30
- D) Unlimited

3. What size is a carousel slide?

- A) 1920×1080
- B) 500×500
- C) 2000×100
- D) 1080×1350

4. Which account type is needed for insights?

- A) Private
- B) Personal
- C) Professional (Business)
- D) Secret

5. What is the Name field good for?

- A) Phone numbers
- B) Nothing
- C) Searchable keywords
- D) Passwords

6. What should slide 1 of a carousel be?

- A) The hook
- B) Blank
- C) The disclaimer only
- D) A logo

7. What does Mosseri say hashtags do?

- A) Nothing at all
- B) Describe the post; they don't boost reach
- C) Guarantee reach
- D) Replace captions

8. Which Highlight is recommended?

- A) How It Works
- B) Competitor posts
- C) Patient records
- D) Old memes

9. What's a collab post?

- A) A DM
- B) A Story
- C) A post appearing on two profiles
- D) A paid ad

10. In the notice-board analogy, a good carousel…

- A) Gives clear, useful details people save
- B) Is hidden
- C) Says "Meeting!!!" only
- D) Is blank

Sources

1. Instagram, Instagram Ranking Explained (May 31, 2023) 🟢
2. Social Media Today, Instagram implements new limits on hashtag use (December 18, 2025) 🟠
3. Ongo Weight Loss, Instagram profile review, 30 October 2026 (internal) 🔵

Answer key, Chapter 11: 1-D · 2-B · 3-D · 4-C · 5-C · 6-A · 7-B · 8-A · 9-C · 10-A

LEVEL 2 · CHAPTER 12

Chapter 12: Facebook: Pages, Reels and Groups

Facebook still reaches 71% of U.S. adults and peaks among 30–49-year-olds. For a weight-care brand serving adults in their 30s to 60s, a dormant Facebook page is a missed opportunity.

> 💡 **Trivia**
>
> Facebook use peaks at **80% among U.S. adults aged 30–49**, and it's one of only two platforms (with YouTube) used by a majority of every age group. [1] 🟢 Official (Pew Research Center, 2025)
>
> Our Facebook page had **1 follower** on 30 October 2026.

12.1 What works on Facebook in 2026

Format	Why	Our use
Reels	Facebook recommends Reels to non-followers	Cross-post Instagram Reels and YouTube Shorts files
Photo + longer caption	Older audiences read more	Myth-busting posts, provider notes
Link posts	Facebook still allows clickable links in posts	Blog guides with UTMs
Live video	Real-time Q&A	Monthly "Ask a Provider" (after compliance setup)
Groups	Community and support	A moderated support group (Phase 2)
Events	Webinars	Awareness-day sessions

12.2 Relaunching the page (step by step)

Step	Where	What
1	Page → Settings → Page setup → Name	Rename "ONGO Weight Loss" → **"Ongo Weight Loss"** (name changes may need Meta review)
2	Edit details → Category	Choose health categories that fit an online service (e.g. "Medical & health"); avoid implying a walk-in clinic unless true
3	Contact info / Location	Confirm whether the New York address should be public; match the website and Google Business Profile exactly
4	Profile + cover	Logo (at least 320×320); cover 1640×624 (keep text in centre for mobile crop)
5	Intro (bio)	Same message as Instagram, adapted
6	Action button	"Learn more" → website with UTMs (not "Shop now")
7	Business portfolio	Connect the Page and Instagram in Meta Business Suite (Chapter 19)
8	Moderation	Professional dashboard → Moderation assist / keyword blocking for spam and abuse
9	Reviews (recommendations)	Turn on only when a reply process exists (Chapter 35)

12.3 A posting rhythm

Frequency	Content
3–4 Reels per week	Cross-posted from Instagram (upload natively or via Meta Business Suite)
2 link posts per week	New blog guides, with a question in the caption
1 community post per week	Poll or question ("What's your go-to high-protein snack?")
Monthly	Live Q&A or event (when ready)

> 🪔 **Desi analogy: mohalla ka WhatsApp group**
>
> Mohalla group mein log sirf announcement nahi chahte; woh baat karna chahte hain, sawaal puchhna chahte hain. **Facebook bhi wahi mohalla hai**: sawaal puchho, jawab do, sabko shaamil karo.

12.4 Facebook Groups: the Phase 2 community plan

Decision	Recommendation
Group type	Private, visible; linked to the Page
Who can join	Adults; answer 2–3 membership questions (no health questions)
Rules	No medical advice from members; no selling; no before/after without consent; be kind
Moderators	Social team + trained support staff; providers for scheduled Q&As
Privacy	Remind members that groups aren't private medical spaces; never ask for health details
Escalation	Adverse events or emergencies → support and clinical team (Chapter 36)

12.5 Sample Facebook post, with why it's better

Weak: "Lose weight fast with GLP-1!!! Click now 👉 [link]"

Better:

> "Nausea in the first weeks of GLP-1 treatment is common. These 6 small changes often help: smaller meals, eating slowly, avoiding very fatty foods, sipping water through the day... Our provider-reviewed guide explains each one. 👉 [UTM link] What helped you most? Share below. (Educational only; talk to your provider about symptoms.)"

Why it's better: solves a real problem; reviewed advice; a question invites meaningful comments (Facebook's strongest signal); honest disclaimer; no outcome promise.

🟧 **Ongo Weight Loss example**

The Facebook page lists "60 E 42nd St, New York" and a 1-800-style number with "Not yet rated". Before relaunching, confirm the address with leadership. A mismatched address across Facebook, Google and the website weakens trust and can confuse search engines. Then rename, refresh the cover and start cross-posting Reels the same week. 🔵

12.6 Do's and Don'ts

✅ Do	❌ Don't
Cross-post Reels natively	Share YouTube links only (lower reach)
Ask genuine questions	Use "comment YES" engagement bait
Keep business details consistent	Show an address you can't stand behind
Moderate comments daily	Let spam and scams sit

12.7 Pros and cons of Facebook for us

✅ Pros	❌ Cons
Huge 30–64 audience	Organic reach for Pages is lower than in the past
Links allowed in posts	Scam and spam comments are common
Groups for community	Groups need serious moderation

12.8 Where freshers go wrong in Chapter 12 topics

Mistake	Why it happens	Avoid it by	Fix it by
Posting from a personal profile	Confusing Page vs. profile	Using the Page/Business Suite	Deleting and reposting from the Page

Mistake	Why it happens	Avoid it by	Fix it by
Ignoring scam comments ("DM me for Ozempic")	Not checking daily	Keyword blocking	Hiding/reporting
Starting a Group with no moderators	Enthusiasm	Group plan first	Pausing new members

12.9 Thumb rules

👍 Facebook is the mohalla: talk, don't announce.

👍 Reels for reach, links for traffic, questions for comments.

👍 Same name, address and phone everywhere.

12.10 Notes to remember

📝 Facebook: 71% of U.S. adults; 80% of 30–49.

📝 Cover photo 1640×624; profile 320×320 minimum.

Chapter 12 Glossary

Term	Simple meaning
Page	A business presence on Facebook
Profile	A personal Facebook account
Group	A community space around a topic
Professional dashboard	Page tools for insights and moderation
Engagement bait	Asking for reactions in manipulative ways

Chapter 12 Quiz

1. What share of 30–49-year-olds use Facebook?

- A) 100%
- B) 8%
- C) 30%
- D) 80%

2. What should the Page name be?

- A) ongo
- B) OWL
- C) ONGO Weight Loss
- D) Ongo Weight Loss

3. Which format reaches non-followers on Facebook?

- A) Reels
- B) Page likes
- C) Old photos
- D) Cover photos

4. What action button fits us?

- A) Shop now for prescriptions
- B) Call now 24/7 for refills
- C) None
- D) Learn more (website with UTMs)

5. When should we start a Group?

- A) Phase 2, with moderators and rules
- B) Day 1 without rules
- C) Never
- D) After buying members

6. What's the Facebook cover size?

- A) 1080×1920
- B) 100×100
- C) 1640×624

- D) 300×50

7. What's wrong with "comment YES to win"?

- A) It's engagement bait that gets demoted
- B) It's too polite
- C) It's too long
- D) Nothing

8. Who should answer medical questions in a Group?

- A) Providers in scheduled, reviewed Q&As; never members as advice
- B) Any member
- C) Bots
- D) Nobody ever

9. What should we confirm before relaunch?

- A) Follower targets
- B) Competitor prices
- C) Whether the New York address should be public
- D) The font

10. In the mohalla analogy, Facebook is for…

- A) Conversation, not just announcements
- B) Private records
- C) Silence
- D) Shouting ads

LEVEL 2 · CHAPTER 13

Chapter 13: TikTok: Read the Rules Before You Post

TikTok can reach huge audiences from zero followers. It also has the strictest rules for weight-loss and drug content. For Ongo Weight Loss, TikTok is an education-and-lifestyle channel only.

> 💡 **Trivia**
>
> TikTok's community guidelines (effective **17 May 2024**) say it does not allow "facilitating the trade or marketing of weight loss or muscle gain products." Showing or describing medically necessary interventions under a health-care professional's care is allowed. [1] 🟠 Industry (Boston Globe report of TikTok's guidelines)
>
> TikTok also treats prescription drugs as regulated substances: content that **discusses** drugs is restricted to adults and **not eligible for the For You feed**. [2] 🟢 Official (TikTok)

13.1 What this means for us

❌ Not on TikTok	✅ Fine on TikTok (with review)
"Get compounded semaglutide from $X/month"	High-protein meals and grocery tips
Product shots of vials with a sign-up CTA	Strength workouts for beginners
Prices for medication plans	Myth vs. fact about healthy habits
Before/after "results"	Provider talking about sleep, stress, hydration
Drug-focused videos expecting For You reach	General wellness Q&A
Misspelled drug names to dodge moderation ("sema", "G L P")	Clear, honest captions

> ⚠️ **Where freshers go wrong: algospeak.** Some competitors write "G L P-1" or "s3maglutide" to avoid moderation. Deliberately evading rules is itself a guideline risk, and when caught, the account can lose recommendations. We don't do it. 🔵

13.2 How TikTok recommends

Signal	Weight
User interactions (watch to the end, rewatch, like, share, comment, follow)	Highest; completion of longer videos is strong
Video information (captions, sounds, hashtags, on-screen text)	Medium
Device and account settings (language, country)	Lower
Follower count	**Not a direct factor**

[3] 🟢 Official (TikTok)

13.3 Account set-up

Step	What
1	Create the account with the company email on a company phone; username **@ongoweightloss** (check availability; @ongoweightloss.usa was free on 30 Oct 2026)
2	Switch to a **Business account** (Settings → Account → Switch to Business) for analytics, web scheduling and a bio link
3	Bio: "Food, movement & healthy habits from Ongo Weight Loss · Educational only"
4	Profile photo: the Ongo Weight Loss logo; same as other platforms
5	Turn on 2-step verification; add team members through TikTok Business Center
6	Use only the **Commercial Music Library** for business accounts
7	Comment filters: Settings → Privacy → Comments → filter keywords (drug sales spam)

13.4 Content that fits TikTok

Series	Example	Why it works
Grocery haul for high protein	"$40 high-protein grocery list"	Practical, shareable, no product
60-second recipes	"Cottage cheese breakfast bowl"	Proven theme from our Shorts
Beginner strength	"3 moves to keep muscle as you lose weight"	Useful, safe
Myth vs. fact	"Myth: you have to eat 1,200 calories" (dietitian)	Comments and stitches
Day in the life of a provider (no patient info)	"What a telehealth visit looks like"	Trust without selling

13.5 TikTok-specific craft

Element	Tip
First frame	Face or food close-up + text hook
Captions	Keyword sentence (TikTok search), 3–5 hashtags
Sounds	Commercial library only; voice-over beats music for education
Replies	Reply to comments with videos ("Reply to @...") to build series
Stitches/duets	Respond to misinformation respectfully, with sources; never mock people
Posting	Web scheduler up to 10 days ahead (Business accounts)

> 🍛 **Desi analogy: cricket ki free hit**
>
> TikTok pe naye account ko "free hit" milti hai: followers zero hon toh bhi ball boundary ke paar ja sakti hai. **Lekin no-ball (rule todna) pe free hit nahi, wicket chali jaati hai.** Isliye pehle rules, phir shot.
>
> 🟧 **Ongo Weight Loss example**
>
> Competitors on TikTok range from Hims (474K followers) to Found (7.2K). Ivím's most-watched recent TikTok (~152K views) was about **staying on track while travelling**, a lifestyle topic. If leadership approves TikTok, start with food, movement and habit videos repurposed from YouTube Shorts, and keep medication marketing off the platform. 🔵

13.6 Do's and Don'ts

✅ Do	❌ Don't
Educate on food, movement, habits	Market weight-loss products or prices
Use the Commercial Music Library	Use trending songs not cleared for business
Write honest captions	Use algospeak to dodge rules
Reply with videos	Argue in comments

13.7 Pros and cons of TikTok for us

✅ Pros	❌ Cons
Reach from zero followers	Strict weight-loss and drug rules
Strong search among under-45s	Drug content not eligible for For You
Great for food and habits	Higher moderation risk; fast trend cycles

13.8 Where freshers go wrong in Chapter 13 topics

Mistake	Why it happens	Avoid it by	Fix it by
Copying Hims-style product promos	Big brand example	Our rules table	Removing posts
Personal account for brand	Quick start	Business account	Migrating
Trending audio violations	Not checking library	Commercial Music Library	Replacing audio

13.9 Thumb rules

👍 On TikTok, sell habits, never products.

👍 No algospeak, no shortcuts.

👍 Followers don't matter as much as finished views.

13.10 Notes to remember

📝 TikTok (May 2024): no facilitating trade or marketing of weight-loss products.

📝 Drug discussion content is 18+ and not eligible for the For You feed.

Chapter 13 Glossary

Term	Simple meaning
For You feed (FYF)	TikTok's main recommendation feed
Stitch / Duet	Responding to another video inside your own
Commercial Music Library	Music cleared for business use
Algospeak	Misspellings used to avoid moderation

Term	Simple meaning
Business Center	TikTok's tool for managing business accounts and team access

Chapter 13 Quiz

1. Since when does TikTok disallow marketing weight-loss products?

- A) 2010
- B) 2030
- C) 17 May 2024
- D) Never

2. Is drug-discussion content eligible for the For You feed?

- A) Only with hashtags
- B) No; it's restricted to 18+ and not FYF-eligible
- C) Yes, always
- D) Only on Sundays

3. Which video is fine on TikTok for us?

- A) A $40 high-protein grocery list
- B) A vial unboxing with a sign-up code
- C) A price promo for compounded semaglutide
- D) A before/after transformation

4. Is follower count a direct factor on TikTok?

- A) Yes
- B) Only for doctors
- C) No
- D) Only for brands

5. Which music should business accounts use?

- A) Pirated songs
- B) Commercial Music Library
- C) Any trending song

- D) None ever

6. What's algospeak?

- A) Misspellings to avoid moderation
- B) A music genre
- C) A TikTok feature
- D) A type of ad

7. Which account type should we use?

- A) Personal
- B) Business
- C) Private
- D) Anonymous

8. What was Ivím's top recent TikTok topic?

- A) Travelling on GLP-1 treatment
- B) Stock tips
- C) Celebrity news
- D) Drug prices

9. How far ahead can business accounts schedule on the web?

- A) Up to 10 days
- B) 1 hour
- C) 1 year
- D) Not possible

10. In the free-hit analogy, breaking rules is…

- A) A boundary
- B) A no-ball that costs a wicket
- C) A free hit
- D) A rain delay

LEVEL 2 · CHAPTER 14

Chapter 14: Pinterest: The Visual Search Engine

People on Pinterest are planning: meals, routines, goals. Every pin links to a web page, which makes Pinterest one of the best organic traffic sources for recipes and guides.

> 💡 **Trivia**
>
> Only about **6 of the 75 competitor homepages** we could read linked to a Pinterest account (Zealthy, Calibrate, Vibrant Health, WeightCare, Red Mountain, Balanced Hormone Health). [1] 🔵 Ongo Weight Loss internal
>
> Pinterest is one of the least crowded platforms in our market.

14.1 How Pinterest works

Concept	Meaning
Pin	An image or video with a title, description and **link**
Board	A collection of pins on a topic (works like a category page)
Search	Pinterest is search-driven: keywords in titles, descriptions and board names matter
Fresh pins	New images (not repins of the same image) get priority
Saves	The strongest signal of usefulness

Pinterest's algorithm is less about followers and more about **keywords and saves**. 🟠 Industry consensus.

14.2 Setting up (step by step)

Step	What
1	Create a **business account** with the company email
2	Name: "Ongo Weight Loss"; username @ongoweightloss (if available)
3	**Claim the website** (Settings → Claimed accounts → Websites): add the meta tag through the developer (Book Four, Ch. 30 head basics)
4	Profile description with keywords: "High-protein recipes, GLP-1-friendly meal ideas, beginner workouts and healthy habits from Ongo Weight Loss"
5	Boards: GLP-1 Friendly Recipes · High-Protein Breakfasts · Meal Prep · Beginner Strength · Healthy Habits · Understanding Weight Loss Treatment
6	Enable rich pins (article metadata from the website's Open Graph tags; Book Four, Ch. 22)

14.3 Pin specs and content

Item	Spec
Size	1000×1500 (2:3)
Title	Up to ~100 characters; keyword first ("High-Protein Breakfast Bowl (30 g Protein)")
Description	1–3 sentences with keywords + soft CTA
Text on image	Large, 4–7 words
Link	Blog guide with UTM (`utm_source=pinterest`)
Video pins	9:16 or 2:3, 6–30 seconds
Volume	10–15 fresh pins per week, created from existing content

> 🍛 **Desi analogy: shaadi ki planning diary**
>
> Shaadi se pehle log diary mein photos chipkaate hain: lehenge ke design, mehndi ke pattern, khane ka menu. **Pinterest wahi planning diary hai**, aur har photo ke peeche ek dukaan ka pata (link) hota hai.

14.4 What not to pin

❌	Why
Before/after body photos	Body-image policies; FTC risk
Medication product shots with prices	Promotional health claims; ad policies restrict weight-loss promotion
"Lose X pounds in Y days" pins	Outcome claims
Shaming or extreme-diet content	Pinterest's guidelines and our values

Pinterest has banned **weight-loss ads** since 2021; organic content should stay educational and body-positive. [2] 🟠

14.5 Sample pin, with why it's better

Weak: an image of a syringe with "Lose weight fast" → links to the homepage.

Better: a bright photo of a protein bowl; text: "5-Minute High-Protein Breakfast"; title: "High-Protein Breakfast Bowl for Smaller Appetites"; description: "A 30 g protein breakfast that's easy on the stomach, great if GLP-1 treatment has reduced your appetite. Full recipe and nutrition tips on our blog." → links to the recipe guide with UTMs.

Why it's better: matches what Pinterest users search; links to a page that delivers exactly the pin's promise; no claims; saves are likely.

> 🟧 **Ongo Weight Loss example**
>
> Our best YouTube Shorts are recipes. Each can become 3–5 pins (photo, step image, video pin) linking to a blog recipe or nutrition guide. That's a traffic engine competitors mostly ignore. 🔵

14.6 Do's and Don'ts

✅ Do	❌ Don't
Write keyword-rich pin titles	Use vague titles ("Yum!")

✅ Do	❌ Don't
Link each pin to a matching page	Link everything to the homepage
Create fresh images	Repin the same image daily
Claim the website	Leave the domain unclaimed

14.7 Pros and cons of Pinterest

✅ Pros	❌ Cons
Long pin life (months/years)	Smaller audience than YouTube/Facebook
Every pin drives to the website	Needs a steady supply of fresh images
Few competitors	Not suitable for medication topics

14.8 Where freshers go wrong in Chapter 14 topics

Mistake	Why it happens	Avoid it by	Fix it by
No UTMs on pin links	Forgetting	UTM builder (Ch. 40)	Editing pins
Square images	Instagram habit	2:3 templates	Re-exporting
Boards named "Stuff"	Rushing	Keyword board names	Renaming

14.9 Thumb rules

👍 Pinterest is search: keyword first.

👍 Every pin is a door to one matching page.

👍 Fresh images beat repins.

14.10 Notes to remember

📝 Pin size 1000×1500 (2:3).

📝 Only ~6 of ~75 readable competitor sites linked Pinterest.

Chapter 14 Glossary

Term	Simple meaning
Pin	A Pinterest post with a link
Board	A collection of pins
Rich pins	Pins that pull extra details from the website
Claimed website	A verified link between Pinterest and your site
Fresh pin	A new image not pinned before

Chapter 14 Quiz

1. What's the recommended pin size?

- A) 300×300
- B) 1080×1080
- C) 1000×1500
- D) 1920×1080

2. What does every pin include?

- A) A link to a web page
- B) A hashtag only
- C) Nothing
- D) A price

3. How many competitor sites linked Pinterest?

- A) All 100
- B) About 6
- C) 50
- D) None

4. What's the strongest Pinterest signal?

- A) Saves
- B) Emojis
- C) Hashtags
- D) Followers

5. Which pin is right for us?

- A) A high-protein breakfast recipe linking to a guide
- B) Before/after photos
- C) A syringe with "Lose weight fast"
- D) A price list for medication

6. Since when has Pinterest banned weight-loss ads?

- A) Never
- B) 2021
- C) 2005
- D) 2026

7. What should board names contain?

- A) Nothing
- B) Keywords
- C) Random words
- D) Emojis only

8. Where should pins link?

- A) Nowhere
- B) A competitor
- C) Always the homepage
- D) The matching page with UTMs

9. How many fresh pins per week to start?

- A) 1 per year
- B) 10–15
- C) 500
- D) 0

10. In the planning-diary analogy, Pinterest is…

- A) A newspaper
- B) A calendar only
- C) A planning diary with shop addresses
- D) A phone book

Sources

1. Ongo Weight Loss, competitor homepage footer review, 30 October 2026 (internal) 🔵
2. NPR, Pinterest bans all weight loss ads (July 1, 2021) 🟠
3. Ongo Weight Loss, Book Four, Chapter 22 (Open Graph) 🔵

Answer key, Chapter 14: 1-C · 2-A · 3-B · 4-A · 5-A · 6-B · 7-B · 8-D · 9-B · 10-C

LEVEL 2 · CHAPTER 15

Chapter 15: LinkedIn: Credibility, Doctors and Partners

LinkedIn won't bring many patients directly. It builds the professional credibility behind the brand: doctors, leadership, partners, hiring and press.

> 💡 **Trivia**
>
> Among the GLP-1 telehealth brands whose homepages we could read, LinkedIn company pages were linked by Mochi, Fridays, Pomegranate, Brello, Eden, Henry Meds, LifeMD, Found, Fella, GobyMeds, AgelessRx, Zappy, QuickMD, Direct Meds, Invigor, NuForm and Precision Telemed, roughly **1 in 4 brands**. [1] 🔵 Ongo Weight Loss internal
>
> LinkedIn is a quiet credibility layer many competitors maintain.

15.1 Company page vs. personal profiles

	Company page	Personal profiles (doctors, leaders)
Reach	Lower organic reach	Usually higher reach and trust
Best for	News, hiring, partnerships, culture	Expertise, opinions, education
Voice	"We"	"I"
Ongo Weight Loss use	Company updates, new guides, team milestones	Medical Director and providers share reviewed insights; leaders share company vision

> 🍛 **Desi analogy: IT office ka reception aur senior engineers**
>
> Reception (company page) pe company ka naam aur khabar milti hai. Lekin client ka bharosa tab banta hai jab senior engineer (personal profile) khud baat karta hai. **LinkedIn pe log logon pe bharosa karte hain, logo pe kam.**

15.2 Setting up the company page

Step	What
1	Create from a **personal profile of a company admin** (LinkedIn requires one) with a company email
2	Name "Ongo Weight Loss"; URL linkedin.com/company/ongoweightloss (if available)
3	Industry: Hospitals and Health Care (or closest); company size; website with UTMs
4	Logo 400×400; cover 1128×191
5	About: who we are, what we do (doctor-led online weight care), founded **December 18, 2024**
6	Add at least two admins (Super admin + Content admin)
7	Employees list Ongo Weight Loss as their workplace (links profiles to the page)

15.3 What to post

Type	Example	Frequency
New provider-reviewed guide	"Our new guide: what to eat when appetite drops on GLP-1 treatment"	Weekly
Team and culture	Welcoming a new provider (with consent)	Monthly
Industry perspective (leaders)	"Why compounded medications need clear labelling"	Monthly
Hiring	Open roles	As needed
Milestones	Certifications such as LegitScript	As they happen

15.4 Doctors on LinkedIn: guardrails

Rule	Why
Doctors speak as themselves, sharing general education	Personal credibility
Disclose their role at Ongo Weight Loss in their profile	FTC material-connection principle
No individual medical advice in comments	Provider–patient relationship happens in the portal
Clinical claims still go through medical review	Compliance
No patient stories without consent	Privacy

> 🟧 **Ongo Weight Loss example**
>
> No Ongo Weight Loss LinkedIn page was linked from the website on 30 October 2026. Create the company page (with the founding date), ask the Medical Director and providers to list their role, and post one reviewed guide per week. It's low effort and supports credibility for partners, journalists and hiring. 🔵

15.5 Do's and Don'ts

✅ Do	❌ Don't
Keep the page complete and current	Leave a half-built page
Let doctors share education in their voice	Ghost-write opinions they don't hold
Disclose roles and connections	Hide employment relationships
Post useful guides and news	Post sales messages

15.6 Pros and cons of LinkedIn

✅ Pros	❌ Cons
Professional credibility	Few direct patients
Partners, press and hiring	Doctors' time is limited
Company page ranks for brand search	Company page reach is low without people sharing

15.7 Where freshers go wrong in Chapter 15 topics

Mistake	Why it happens	Avoid it by	Fix it by
One admin only	Quick set-up	Two admins rule	Adding a second admin
Posting Instagram captions as-is	Cross-posting habit	Professional tone	Rewriting
Doctors giving advice in comments	Wanting to help	Guardrails	Redirecting to the portal

15.8 Thumb rules

👍 People trust people: doctors and leaders lead on LinkedIn.

👍 Company page = credibility file; keep it complete.

👍 Every doctor post still gets medical review.

15.9 Notes to remember

📝 Cover 1128×191; logo 400×400.

📝 About 1 in 4 competitor homepages link LinkedIn.

Chapter 15 Glossary

Term	Simple meaning
Company page	A business's LinkedIn presence
Super admin	Full control of a company page
Employee advocacy	Staff sharing company content
Material connection	A relationship that could affect how people view an endorsement
Thought leadership	Expert opinions shared publicly

Chapter 15 Quiz

1. Who usually gets more reach on LinkedIn?

- A) Hashtags
- B) Company pages
- C) Bots
- D) Personal profiles

2. What's the cover size?

- A) 1080×1920
- B) 1128×191
- C) 1500×1500
- D) 100×100

3. What founding date goes on the page?

- A) January 1, 2000
- B) None
- C) December 18, 2024
- D) October 30, 2026

4. How many admins at minimum?

- A) Zero
- B) One

- C) Two
- D) Ten

5. What should doctors disclose?

- A) Nothing
- B) Passwords
- C) Their role at Ongo Weight Loss
- D) Patient names

6. What's LinkedIn's main job for us?

- A) Memes
- B) Credibility, partners, press and hiring
- C) Direct prescriptions
- D) Recipes

7. Can doctors give individual medical advice in LinkedIn comments?

- A) No
- B) Yes
- C) Only to friends
- D) Only on weekends

8. What share of competitor homepages linked LinkedIn?

- A) All
- B) About 1 in 4
- C) 1 in 100
- D) None

9. Do doctors' clinical posts need medical review?

- A) No
- B) Only videos
- C) Only long ones
- D) Yes

10. In the IT office analogy, trust comes from…

- A) The reception desk alone
- B) The logo

- C) The parking lot
- D) Senior engineers speaking directly

Sources

1. Ongo Weight Loss, competitor homepage footer review, 30 October 2026 (internal)
2. FTC, Disclosures 101 for Social Media Influencers (material connections)

LEVEL 2 · CHAPTER 16

Chapter 16: Reddit and Online Communities

Reddit is where people ask the questions they won't ask their doctor, and Reddit threads often appear in Google and AI answers. Brands are welcome only when they're genuinely helpful and honest about who they are.

> 💡 **Trivia**
>
> Four brands on our competitor list run their own subreddits: **Mochi (r/MochiTelehealth), Zealthy (r/getZealthy), Fella (r/FellaHealth) and Olympia Pharmacy (r/olympiapharmacy)**. [1] 🔵 Ongo Weight Loss internal
>
> Pew found **26% of U.S. adults use Reddit**, with men more likely than women. [2] 🟢

16.1 How Reddit works

Concept	Meaning
Subreddit (r/...)	A community with its own moderators and rules
Upvotes/downvotes	The community decides visibility
Karma	An account's reputation score
Moderators	Volunteers who enforce each subreddit's rules
Self-promotion	Usually limited or banned; many communities remove brand links

> 🪔 **Desi analogy: mohalla ki baithak**
>
> Mohalla ki shaam ki baithak mein koi salesman aakar seedha saman bechne lage, toh log uthkar chale jaate hain. Lekin jo padosi madad karta hai, sahi salah deta hai, uski izzat hoti hai. **Reddit wahi baithak hai: pehle madadgaar bano, brand baad mein.**

16.2 Three ways to use Reddit

Approach	What	Risk	Recommendation
Listening	Read GLP-1, semaglutide, tirzepatide and weight-loss communities to learn real questions	None	✅ Start now (topic ideas for YouTube and blog)
Helpful participation	A clearly labelled brand account (e.g. u/OngoWeightLoss_Team) answers general questions with sources, following each subreddit's rules	Medium	✅ After training and approval
Own subreddit	r/OngoWeightLoss for patient Q&A and updates	High (moderation, privacy)	⏳ Later, with a moderation plan

16.3 Rules for participating

Rule	Why
Read and follow each subreddit's rules before posting	Moderators remove violators fast
Always disclose: "I work for Ongo Weight Loss"	FTC material connection; Reddit culture punishes hidden marketing
Never create fake "patient" accounts or post fake reviews	FTC fake-reviews rule; account bans
Answer general questions with sources; no personal medical advice	Compliance
Don't drop links unless asked and allowed	Self-promotion rules

Rule	Why
Never discuss a specific patient, even anonymously	Privacy
Don't argue; correct misinformation calmly with sources	Trust

16.4 Sample reply, with why it's better

Question in a weight-loss community: "Is compounded tirzepatide the same as the brand?"

Weak reply: "Yes it's the same! Get it cheaper at Ongo Weight Loss 👉 link"

Better reply:

> "Disclosure: I work on the content team at Ongo Weight Loss, so take that into account. Short answer: no, not in the regulatory sense. Compounded tirzepatide is prepared by a licensed pharmacy for a specific patient's prescription and isn't FDA-approved, while the brand products went through FDA approval. The active ingredient is the same molecule, but the products aren't reviewed by the FDA the same way. The FDA has a plain-language page on compounded drugs that explains the differences [FDA link]. A licensed provider can talk through which option fits you."

Why it's better: transparent disclosure; accurate and sourced; avoids "same as" claims the FDA has criticised; no sales link; helpful even to people who never become patients.

> 🟧 **Ongo Weight Loss example**
>
> Start with listening: once a week, collect the 10 most common questions from GLP-1 subreddits into a sheet. Use them for YouTube titles, FAQ updates and blog topics (Books Three and Four). Participation comes after the team lead approves the disclosure and reply guidelines. 🔵

16.5 Do's and Don'ts

✅ Do	❌ Don't
Listen weekly for real questions	Spam links

✅ Do	❌ Don't
Disclose your connection every time	Pretend to be a patient
Follow each community's rules	Ignore moderators
Cite reliable sources	Make "same as brand" claims

16.6 Pros and cons of Reddit

✅ Pros	❌ Cons
Real, unfiltered questions	Hostile to brands that sell
Threads rank in Google and AI answers	Slow to build reputation
Cheap research	High moderation and privacy effort for own subreddit

16.7 Where freshers go wrong in Chapter 16 topics

Mistake	Why it happens	Avoid it by	Fix it by
Posting without disclosure	Fear of downvotes	Disclosure rule	Editing to disclose
Creating sock-puppet accounts	Shortcut	ZETA list	Deleting and reporting
Copying Reddit questions with usernames into our content	Research habit	Anonymise and paraphrase	Removing identifiers

16.8 Thumb rules

👍 Listen first, help second, mention the brand last.

👍 Always disclose who you work for.

👍 Never pretend to be a patient.

16.9 Notes to remember

📝 Four competitors run subreddits.

📝 26% of U.S. adults use Reddit (Pew 2025).

Chapter 16 Glossary

Term	Simple meaning
Subreddit	A Reddit community
Karma	Reddit reputation points
Sock puppet	A fake account pretending to be someone else
Social listening	Monitoring conversations for insights
Self-promotion	Promoting your own brand or links

Chapter 16 Quiz

1. Which competitors run subreddits?

- A) Mochi, Zealthy, Fella, Olympia
- B) All 100
- C) WeightWatchers only
- D) None

2. What should every brand reply include?

- A) A disclosure of who you work for
- B) A fake patient story
- C) A discount code
- D) A link always

3. What's the first Reddit approach to start?

- A) Sock puppets
- B) Own subreddit
- C) Listening
- D) Paid ads

4. Is compounded tirzepatide FDA-approved?

- A) No
- B) Yes
- C) Only online
- D) Sometimes

5. What % of U.S. adults use Reddit?

- A) 71%
- B) 84%
- C) 26%
- D) 2%

6. What's a sock puppet?

- A) A subreddit
- B) A karma score
- C) A moderator
- D) A fake account pretending to be someone else

7. Who enforces subreddit rules?

- A) The FDA
- B) Advertisers
- C) Google
- D) Moderators

8. What should we do with collected Reddit questions?

- A) Use them anonymised for content ideas
- B) Ignore them
- C) Contact users privately to sell
- D) Copy usernames into posts

9. When should we start our own subreddit?

- A) Never think about it
- B) Later, with a moderation plan
- C) After buying members
- D) Today

10. In the baithak analogy, Reddit rewards…

- A) Helpful neighbours, not salesmen
- B) Silence
- C) Shouting
- D) Salesmen

4. DWT, FTC finalizes rule banning fake consumer reviews (August 2024) 🟠

Answer key, Chapter 16: 1-A · 2-A · 3-C · 4-A · 5-C · 6-D · 7-D · 8-A · 9-B · 10-A

LEVEL 2 · CHAPTER 17

Chapter 17: Threads, X and Emerging Platforms

Text-first platforms are smaller for our audience, but worth reserving and watching. Here's how to decide when a new platform deserves time.

> 💡 **Trivia**
>
> Pew found **Threads and Bluesky are each used by about 10% or fewer** of U.S. adults, and **X** is used by fewer adults than WhatsApp (32%). Men are more likely than women to use X. [1]
> ● Official (Pew Research Center, 2025)
>
> Small platforms can still matter for journalists, clinicians and early adopters.

17.1 Quick profiles

Platform	Audience fit for us	Main use	Status for Ongo Weight Loss
Threads	Instagram users, text conversations	Short tips, conversations, links	Reserve @ongoweightloss.usa (linked to Instagram); post lightly
X (Twitter)	News, journalists, clinicians, men	Health news commentary, press relations	Reserve handle; post only reviewed updates
Bluesky	Small, early-adopter	Science and health communities	Watch only
Snapchat	Young users	Not our core audience	Skip (reserve name only)
WhatsApp Channels	Hispanic audiences; broadcast updates	Spanish phase (Chapter 18)	Later

Platform	Audience fit for us	Main use	Status for Ongo Weight Loss
Podcasts (YouTube/Spotify)	Long-form listeners	Provider conversations	Future (from YouTube long videos)

17.2 The "new platform" test

Before investing time in any new or trending platform, answer:

Question	Need
Are at least 10% of our personas there?	Yes
Do its rules allow our education content?	Yes
Can we reuse existing content with small edits?	Yes
Can the team post weekly for 90 days?	Yes
Is there a measurable goal (reach, traffic, brand search)?	Yes

Four or five "yes" → pilot for 90 days. Fewer → reserve the handle and watch.

> 🍛 **Desi analogy: naya restaurant mohalle mein**
>
> Naya restaurant khulte hi har koi wahan nahi jaata. Pehle dekhte hain: khana kaisa hai, mehmaan kaun hain, daam sahi hain. **Naye platform pe bhi pehle naam reserve karo, dekho, phir poora time do.**

17.3 Handle reservation checklist

☐	Platform	Desired handle
☐	Threads	@ongoweightloss.usa (auto from Instagram)
☐	X	@ongoweightloss
☐	TikTok	@ongoweightloss
☐	Pinterest	@ongoweightloss

☐	Platform	Desired handle
☐	Bluesky	ongoweightloss.com (domain handle via DNS)
☐	Snapchat	ongoweightloss
☐	LinkedIn	/company/ongoweightloss

Use the company email, store logins in the password manager (Chapter 19), add a bio "Official Ongo Weight Loss account" and the website link.

> 🟧 **Ongo Weight Loss example**
>
> None of these handles were linked from the website on 30 October 2026. Reserving them costs an hour and prevents impersonation, which matters in a market where fake "GLP-1 seller" accounts are common. 🔵

17.4 Do's and Don'ts

✅ Do	❌ Don't
Reserve handles everywhere	Let impersonators take the name
Pilot new platforms for 90 days with a goal	Jump on every trend
Reuse content smartly	Create from scratch for small platforms
Mark reserved accounts "official"	Leave empty, unbranded accounts

17.5 Pros and cons of early adoption

✅ Pros	❌ Cons
Less competition	Small audiences
Learn the platform before it grows	Platforms can disappear
Name protection	Time away from P1 platforms

17.6 Where freshers go wrong in Chapter 17 topics

Mistake	Why it happens	Avoid it by	Fix it by
Signing up with a personal email	Speed	Company email	Changing the login email
Abandoning reserved accounts unbranded	Forgetting	Checklist	Adding logo and bio
Posting heavily on X while Instagram is empty	Personal preference	Priority table	Re-balancing

17.7 Thumb rules

👍 Reserve everywhere, invest where the audience is.

👍 Five yeses before a new platform gets real time.

👍 Every reserved account says "official" and links home.

17.8 Notes to remember

📝 Threads and Bluesky ≈ 10% or fewer of U.S. adults (Pew 2025).

📝 Pilot new platforms for 90 days with a goal.

Chapter 17 Glossary

Term	Simple meaning
Threads	Meta's text-based app linked to Instagram
X	The platform formerly called Twitter

Term	Simple meaning
Bluesky	A decentralised text-based social network
Impersonation	Someone pretending to be your brand
Pilot	A time-limited test

Chapter 17 Quiz

1. What share of U.S. adults use Threads or Bluesky?

- A) 71%
- B) 84%
- C) 50%
- D) About 10% or fewer

2. Why reserve handles?

- A) Post daily everywhere
- B) Prevent impersonation
- C) Buy followers
- D) It's required by Google

3. How long is a new-platform pilot?

- A) 5 years
- B) 90 days
- C) 1 hour
- D) 1 day

4. How many "yes" answers before a pilot?

- A) One
- B) Four or five
- C) Zero
- D) Ten

5. Which email should register accounts?

- A) No email

- B) A friend's email
- C) Personal Gmail
- D) Company email

6. Who is more likely to use X?

- A) Nobody
- B) Women
- C) Men
- D) Teens only

7. What should a reserved account show?

- A) "Official Ongo Weight Loss account" and the website
- B) Personal photos
- C) Nothing
- D) A competitor's logo

8. Which platform links to Instagram for its handle?

- A) Pinterest
- B) LinkedIn
- C) Threads
- D) Reddit

9. When does WhatsApp Channels fit?

- A) The Spanish phase
- B) Only for staff
- C) Never
- D) Day 1 for everything

10. In the restaurant analogy, a new platform…

- A) Is always better
- B) Should be ignored forever
- C) Must be visited daily from day one
- D) Deserves a look before full commitment

LEVEL 2 · CHAPTER 18

Chapter 18: Google Business Profile, Review Sites and WhatsApp

Not every "social" channel is a feed. Profiles on Google, Trustpilot and messaging apps shape trust at the moment someone searches our name.

> 💡 **Trivia**
>
> The FTC's rule on fake reviews and testimonials (effective **13 October 2024**) bans buying fake reviews, suppressing negative ones with threats, and buying fake followers or views, with civil penalties of up to **$51,744 per violation** at the time. [1] 🟠 Industry (DWT summary of the FTC rule)
>
> Reviews are now a legal compliance area, not just a marketing one.

18.1 Google Business Profile (GBP)

Question	Answer for Ongo Weight Loss
Can an online-only service have a GBP?	Google says locations must be staffed and able to receive customers during stated hours, and a rented mailing address you don't operate from (a virtual office) "isn't eligible for a Business Profile". Telehealth brands must check eligibility carefully; never invent an address 🟢 (Google Business Profile guidelines)
What if we have a real office?	List it only if it meets the guidelines and staff serve customers there; match name, address and phone (NAP) everywhere
If not eligible?	Focus on the website's Organization schema, social profiles and review sites

⚠️ **Where freshers go wrong: virtual-office listings.** Creating a Google profile at a virtual office or address where customers aren't served can get it suspended and damages trust. Leadership decides; the social team doesn't create GBP listings on its own. 🔵

18.2 Review sites

Site	Status	Action
Trustpilot	A company profile exists for ongoweightloss.com	Claim it (business account), reply to every review professionally (Chapter 35)
Facebook recommendations	Page shows "Not yet rated"	Turn on only with a reply plan
Google reviews	Only if a valid GBP exists	Same reply rules
BBB, Sitejabber	Check for profiles monthly	Monitor; reply where claimed

Reply rules (never break):

Rule	Why
Never confirm someone is a patient	HIPAA (Chapter 34)
Never discuss treatment details publicly	Privacy
Thank, acknowledge, move offline	"Please contact our care team at [email] so we can help."
Never offer rewards for positive reviews	FTC rule
Ask all customers for reviews equally (not only happy ones)	Avoids biased "review gating"
Never write, buy or edit reviews	FTC rule; platform bans

18.3 Asking for reviews honestly

✅ Honest	❌ Not allowed
"How was your experience? Leave a review on Trustpilot." sent to all customers	Sending only to happy patients after filtering
No incentive, or an incentive for any review (positive or negative), disclosed	"$20 gift card for a 5-star review"
Staff disclose their connection if they review	Staff posing as customers

> 🪔 **Desi analogy: shaadi ke baad feedback**
>
> Caterer achha ho toh sab rishtedaar khud taarif karte hain. Agar caterer sirf khush logon se puchhe aur naraaz logon ko chup karaye, toh agli shaadi mein sab ko pata chal jaata hai. **Sachchi reviews hi bharosa banati hain.**

18.4 WhatsApp (and the Spanish phase)

Option	Use	Caution
WhatsApp Channel	One-way updates (new recipes, guides)	Public broadcast; no health discussions
WhatsApp Business (chat)	Customer support questions	Privacy: use only if compliance approves; never collect PHI over unapproved channels
Spanish audience	Channel with Spanish content	Professional translation + medical review

> 🟧 **Ongo Weight Loss example**
>
> A Trustpilot profile exists for ongoweightloss.com. Claim it this month, set up review alerts, and use the reply templates in Appendix E. Discuss GBP eligibility with leadership before touching Google listings, and make sure the Facebook page address question (Chapter 12) is solved the same way. 🔵

18.5 Do's and Don'ts

✅ Do	❌ Don't
Claim review profiles and reply to all	Ignore negative reviews
Ask every customer for reviews	Gate or buy reviews
Keep name, address and phone identical	Create virtual-office listings
Move private issues to private channels	Discuss treatment in public replies

18.6 Pros and cons of review platforms

✅ Pros	❌ Cons
Trust at the point of decision	Negative reviews are public
Feedback for operations	FTC rules apply
Rank for brand searches	Fake competitor reviews can happen (report them)

18.7 Where freshers go wrong in Chapter 18 topics

Mistake	Why it happens	Avoid it by	Fix it by
"Thanks for being a patient, John!"	Friendliness	Never confirm patient status	Editing the reply
Offering refunds publicly in replies	Wanting to fix fast	Moving offline	Private follow-up
Asking staff to post reviews	Pressure to grow	FTC rule	Removing reviews

18.8 Thumb rules

👍 Thank, acknowledge, take it offline.

👍 Ask everyone, reward no one for stars.

👍 One name, one address, one phone, everywhere.

18.9 Notes to remember

📝 FTC fake-reviews rule effective 13 October 2024.

📝 Never confirm patient status in public replies.

Chapter 18 Glossary

Term	Simple meaning
Google Business Profile	A business listing on Google Search and Maps
NAP	Name, address, phone
Review gating	Asking only happy customers for reviews
WhatsApp Channel	A one-way broadcast feature
Claiming a profile	Proving you own a business listing

Chapter 18 Quiz

1. When did the FTC fake-reviews rule take effect?

- A) 2010
- B) Never
- C) 13 October 2024
- D) 2030

2. Can we offer a gift card for 5-star reviews?

- A) Only on Trustpilot
- B) No
- C) Yes
- D) Only to staff

3. What's review gating?

- A) Asking only happy customers
- B) Claiming a profile
- C) Replying to all reviews
- D) Reporting spam

4. How should we reply to a review?

- A) Thank, acknowledge, move offline
- B) Argue
- C) Confirm their treatment details
- D) Ignore

5. Who decides on a Google Business Profile?

- A) Competitors
- B) Leadership
- C) Followers
- D) The newest intern

6. Can we confirm someone is a patient in a reply?

- A) If they're happy
- B) Yes
- C) Never
- D) If they're angry

7. What's NAP?

- A) A video format
- B) A hashtag
- C) Name, address, phone
- D) A nap break

8. Which review profile exists for us?

- A) None
- B) Trustpilot
- C) Amazon
- D) Yelp

9. What's a WhatsApp Channel for?

- A) One-way updates
- B) Selling prescriptions
- C) Collecting health details
- D) Private diagnoses

10. In the shaadi feedback analogy, real trust comes from…

- A) Hiding the caterer
- B) Silencing unhappy guests
- C) Paying relatives
- D) Honest reviews from everyone

Answer key, Chapter 18: 1-C · 2-B · 3-A · 4-A · 5-B · 6-C · 7-C · 8-B · 9-A · 10-D

LEVEL 2 · CHAPTER 19

Chapter 19: Creating, Owning and Securing Every Account

If the person who created an account leaves, the brand must not lose it. This chapter is the step-by-step guide anyone can follow to create, connect and protect Ongo Weight Loss accounts.

> 💡 **Trivia**
>
> Book Four found the website's SVG favicon, logo files and name inconsistencies. Social accounts have the same problem: on 30 October 2026, the brand appeared as **"Ongo Weight Loss"** on YouTube and Instagram but **"ONGO Weight Loss"** on Facebook. [1] 🔵 Ongo Weight Loss internal
>
> One account register prevents most of these problems.

19.1 The ownership rules

Rule	Why
Every account is created with a **company email** (e.g. social@ongoweightloss.com), never a personal one	The company keeps access if people leave
Two-factor authentication (2FA) on every account, using an authenticator app	Stops most takeovers
Logins stored in the company **password manager**, shared by role	No passwords in chats or sheets
At least **two admins** per platform	Nobody is a single point of failure
Team members get **roles**, not the owner's password	Easy to remove access
An **account register** lists everything	Anyone can find and manage accounts

> 🪔 **Desi analogy: ghar ki chaabi**
>
> Ghar ki ek hi chaabi naukar ke paas ho aur woh gaon chala jaaye, toh ghar band. **Account ki chaabi company ke paas, aur duplicate do bharosemand logon ke paas.**

19.2 The account register (template)

Platform	Handle	URL	Login email	Owner/admins	2FA	Business/creator?	Linked to	Last reviewed
YouTube	@ongoweightlossusa	youtube.com/@ongoweightlossusa	(company)	2 names	✅	Brand account	Google account	30 Oct 2026
Instagram	@ongoweightloss.usa	instagram.com/ongoweightloss.usa	(company)	2	✅	Business	Meta business portfolio	
Facebook	Ongo Weight Loss	facebook.com/ongoweightloss	(company)	2	✅	Page	Meta business portfolio	
…								

19.3 Meta (Facebook + Instagram) set-up, step by step

Step	Where	What
1	business.facebook.com	Create a **business portfolio** (formerly Business Manager) named "Ongo Weight Loss" with the company email
2	Settings → Accounts → Pages	Add the Facebook Page (claim it if someone else created it)
3	Settings → Accounts → Instagram accounts	Connect @ongoweightloss.usa
4	Settings → Users → People	Invite team members with roles (full control only for 2 admins)
5	Security Centre	Require 2FA for everyone in the portfolio
6	Meta Business Suite → Planner	Schedule posts for both platforms (Chapter 37)

Screenshot guide: in Meta Business Suite, the left menu shows Home, Notifications, Inbox, Planner, Content, Insights, and a gear icon for Settings. "Accounts" and "Users" are inside Settings.

19.4 YouTube set-up

Step	What
1	Make sure the channel is a **Brand Account** owned by a company Google account
2	YouTube Studio → Settings → Permissions → Invite (Manager/Editor/Viewer roles)
3	Transfer primary ownership to the company account if a person owns it (Google allows this after 7 days as an owner)
4	Turn on 2-Step Verification for all owners

19.5 Account hygiene every month

☐	Check
☐	Remove people who left; review roles
☐	Display name "Ongo Weight Loss" everywhere
☐	Same logo, bio message and website link everywhere
☐	Links in bios work and carry UTMs
☐	Search for impersonator accounts ("ongo weight loss", "ongoweightloss") and report them
☐	Connected third-party apps reviewed (remove unused ones)

19.6 If an account is hacked

Step	Action
1	Tell the team lead immediately
2	Use the platform's official recovery page (never "recovery services" that DM you)
3	Change passwords for the company email first
4	Post a short notice on other accounts if the public might be scammed
5	Review every post and DM sent during the takeover; delete scams
6	Record what happened in the change log

🟧 **Ongo Weight Loss example**

The Facebook page shows "ONGO Weight Loss" and a separate contact setup. Before relaunching, confirm who owns the Page and the Instagram account, connect both to one Meta business portfolio owned by a company login, and add two admins. Do the same for the YouTube Brand Account. 🔵

19.7 Do's and Don'ts

✅ Do	❌ Don't
Use company emails and a password manager	Share passwords in WhatsApp
Give roles, not passwords	Log in as the owner on many phones
Turn on 2FA everywhere	Use SMS-only 2FA when an app is available
Keep the register current	Rely on memory

19.8 Pros and cons of strict account control

✅ Pros	❌ Cons
No lost accounts	A little slower to give access
Faster recovery from hacks	Needs a password manager
Clean audit trail	Admins must review monthly

19.9 Where freshers go wrong in Chapter 19 topics

Mistake	Why it happens	Avoid it by	Fix it by
Creating with personal email	Quick start	Company email rule	Changing login email
Clicking "Meta support" DMs	Scam looks real	Only official recovery pages	Reporting and changing passwords
One admin only	Convenience	Two-admin rule	Adding a second

19.10 Thumb rules

👍 Company email, two admins, 2FA, password manager.

👍 Roles, not passwords.

👍 One register for every account.

19.11 Notes to remember

📝 Meta: one business portfolio for the Page and Instagram.

📝 YouTube: Brand Account owned by a company Google account.

Chapter 19 Glossary

Term	Simple meaning
Business portfolio	Meta's container for Pages, Instagram accounts and people
Brand Account	A YouTube channel owned by a shared Google account
2FA	Two-factor authentication
Password manager	Secure software for storing and sharing logins
Impersonation	Fake accounts pretending to be us

Chapter 19 Quiz

1. Which email should create accounts?

- A) A company email
- B) A friend's email
- C) Any email
- D) A personal Gmail

2. How many admins per platform at minimum?

- A) Two
- B) One
- C) Zero
- D) Twenty

3. Where do Facebook and Instagram connect?

- A) TikTok
- B) Google Drive
- C) A Meta business portfolio
- D) A spreadsheet

4. How should team members get access?

- A) Shared password in chat
- B) Email the password
- C) Sticky notes
- D) Roles, not the owner's password

5. What's the first step if hacked?

- A) Delete the account
- B) Ignore it
- C) Tell the team lead immediately
- D) Pay a "recovery service"

6. What type of YouTube channel should we use?

- A) A personal channel
- B) Brand Account owned by a company Google account
- C) A shared password channel
- D) No channel

7. How often is account hygiene checked?

- A) Monthly
- B) Hourly

- C) Every 5 years
- D) Never

8. What should be searched for monthly?

- A) Memes
- B) Celebrity news
- C) Impersonator accounts
- D) Competitor prices

9. Which 2FA method is preferred?

- A) An authenticator app
- B) No 2FA
- C) Password reuse
- D) Writing codes on paper on the desk

10. In the chaabi analogy, account access should be…

- A) Thrown away
- B) Owned by the company, with trusted duplicates
- C) Left in the lock
- D) With one person only

30 · UGC, Testimonials and Before/After Content

31 · AI Tools and LLMs for Each Platform and Task

LEVEL 3 · CHAPTER 20

Chapter 20: Content Pillars and the Content Mix

Pillars are the few big topics the brand always talks about. They stop you from posting randomly and make the account recognisable.

> 💡 **Trivia**
>
> On our YouTube channel, **lifestyle pillars (food, protein, fibre, workouts)** reached roughly **5–10 times** the views of most medication-news videos. [1] 🔵 Ongo Weight Loss internal
>
> The data already told us what the pillars should be.

20.1 The six Ongo Weight Loss pillars

#	Pillar	Share of posts	Examples	Main job
1	**Eat Well on GLP-1**	30%	Recipes, protein, fibre, grocery lists, eating out	Reach, saves
2	**Understand Your Treatment**	20%	Compounded vs. FDA-approved, how GLP-1s work, side effects, dosing basics (reviewed)	Trust, education
3	**Move & Keep Muscle**	15%	Beginner strength, walking, mobility	Reach, community
4	**Real Life on the Journey**	15%	Habits, sleep, stress, travel, holidays, mindset	Relatability, shares
5	**Meet Ongo Weight Loss**	10%	Providers, how it works, pricing transparency, behind the scenes	Trust, conversion
6	**Community & Conversation**	10%	Polls, Q&A, myth vs. fact, answering comments	Engagement

> 🍛 **Desi analogy: thali**
>
> Achhi thali mein sab kuch hota hai: daal, sabzi, roti, chawal, meetha, achaar. Sirf meetha khilao toh bimaar, sirf daal toh bore. **Content mix wahi thali hai: har pillar ka sahi hissa.**

20.2 The 80/20 rule for selling

	Share	Example
Value (pillars 1–4, 6)	~80–90%	Help people even if they never become patients
Brand/CTA (pillar 5)	~10–20%	How Ongo Weight Loss works, pricing, provider intros

Too many sales posts lower engagement, which lowers reach for everything else.

20.3 Pillars by platform

Pillar	YouTube	Instagram	Facebook	Pinterest	TikTok
Eat Well	Shorts + recipes	Reels + carousels	Reels	⭐ Pins	⭐ Videos
Understand Treatment	⭐ Long explainers	Carousels	Link posts	Light	❌ (FYF restrictions)
Move & Keep Muscle	Shorts + workouts	Reels	Reels	Pins	Videos

Pillar	YouTube	Instagram	Facebook	Pinterest	TikTok
Real Life	Shorts	Reels + Stories	Posts	Pins	Videos
Meet Ongo Weight Loss	Long + Shorts	Highlights, Reels	Posts	—	Light
Community	Community tab, comments	Stories polls	Questions	—	Replies

20.4 Turning a pillar into topics

Pillar	Topic source	Example topics
Eat Well	YouTube search suggestions, Pinterest search, Reddit questions	"High-protein snacks for low appetite", "What to eat when nauseous on GLP-1"
Understand Treatment	FAQ page, support tickets (anonymised), provider input	"Is compounded semaglutide FDA-approved?", "Why doses start low"
Move	Provider and trainer input	"3 strength moves for beginners", "How much protein to keep muscle"
Real Life	Holidays, seasons, comments	"Thanksgiving on GLP-1 treatment", "Travel tips"

> 🟧 **Ongo Weight Loss example**
>
> Current content leans heavily on brand-name drug news (Ozempic face, Mounjaro switching). Rebalance toward the six pillars: e.g. replace "7 Surprising Ways Ozempic-Type Drugs Protect Your Body" with **"GLP-1 Benefits Beyond the Scale: What Research Shows (Brand Trials Named)"** under the Understand Treatment pillar, reviewed medically, and add two "Eat Well" Shorts each week. 🔵

20.5 Do's and Don'ts

✅ Do	❌ Don't
Plan by pillar shares each month	Post whatever's trending
Keep 80%+ value	Make every post a sales pitch
Match pillars to platform rules	Put treatment posts on TikTok's FYF
Review pillar performance quarterly	Keep pillars that never work

20.6 Pros and cons of fixed pillars

✅ Pros	❌ Cons
Recognisable account	Can feel repetitive
Easier planning	Needs fresh angles
Clear measurement by pillar	Trends may not fit

20.7 Where freshers go wrong in Chapter 20 topics

Mistake	Why it happens	Avoid it by	Fix it by
All posts about drugs	Thinking that's what we sell	Pillar shares	Rebalancing
No brand posts at all	Fear of selling	10–20% brand share	Adding provider and how-it-works posts

Mistake	Why it happens	Avoid it by	Fix it by
Random topics	No plan	Topic sources	Monthly planning

20.8 Thumb rules

> 👍 Six pillars, one thali.
>
> 👍 80% help, 20% us.
>
> 👍 Let performance data move the shares.

20.9 Notes to remember

> 📝 Eat Well 30% · Treatment 20% · Move 15% · Real Life 15% · Meet Us 10% · Community 10%.
>
> 📝 Lifestyle content outperformed drug news 5–10× on our channel.

Chapter 20 Glossary

Term	Simple meaning
Content pillar	A core topic area
Content mix	The share of each pillar
80/20 rule	Mostly value, a little selling
Topic source	Where ideas come from
Evergreen	Content that stays useful for a long time

Chapter 20 Quiz

1. Which pillar gets the biggest share?

- A) Eat Well on GLP-1 (30%)
- B) Community
- C) Meet Ongo Weight Loss
- D) Drug news

2. What share of posts should be value?

- A) About 80–90%
- B) 0%
- C) 10%
- D) 50% exactly

3. Which pillar is limited on TikTok?

- A) Real Life
- B) Move
- C) Understand Your Treatment
- D) Eat Well

4. What did our YouTube data show?

- A) Lifestyle content outperformed drug news
- B) Nobody watches food
- C) Drug news always wins
- D) Long intros work best

5. What's an evergreen post?

- A) A green-coloured post
- B) A deleted post
- C) A holiday post
- D) One that stays useful for a long time

6. Where do treatment topics come from?

- A) Competitor ads only
- B) FAQs, anonymised tickets, provider input
- C) Rumours
- D) Random guesses

7. Which platform is strongest for Eat Well pins?

- A) LinkedIn
- B) Snapchat
- C) X
- D) Pinterest

8. Why limit sales posts?

- A) They lower engagement and reach
- B) They're illegal
- C) They're too cheap
- D) Nobody sees them

9. How often should pillar performance be reviewed?

- A) Every 10 years
- B) Never
- C) Every hour
- D) Quarterly

10. In the thali analogy, a content mix…

- A) Is only sweets
- B) Is only daal
- C) Balances every pillar
- D) Has no plate

LEVEL 3 · CHAPTER 21

Chapter 21: Formats Explained and the Repurposing Engine

Every format has a job. Learn what each one is good for, then turn one recording into a week of content.

> 💡 **Trivia**
>
> YouTube Shorts can run up to **3 minutes** [2] 🟢, Instagram carousels can hold up to **20 slides** (since 2024) 🟠, and Instagram demotes Reels that were **already posted on Instagram** or carry another app's watermark [1] 🟢.
>
> Repurposing works only if each version is native to its platform.

21.1 Format guide

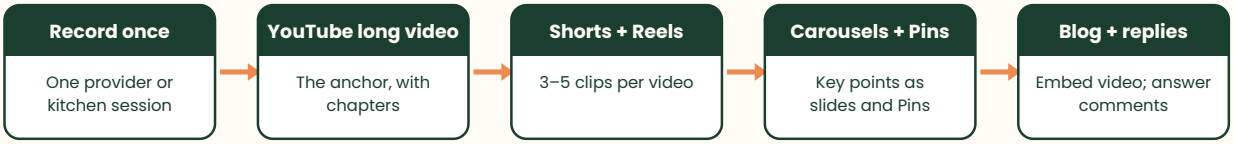

Format	Platforms	Best job	Production effort
Short vertical video	Shorts, Reels, TikTok, Facebook Reels, Pinterest video	Reach	Low–medium
Long video (5–15 min)	YouTube	Search, trust, education	High
Carousel	Instagram, LinkedIn (document posts), Facebook	Saves, education	Medium
Single image / graphic	All	Announcements, quotes	Low
Stories	Instagram, Facebook	Daily connection, polls	Low
Live	YouTube, Instagram, Facebook	Q&A, trust	Medium (needs compliance prep)
Text post	Facebook, LinkedIn, Threads, Reddit	Conversation	Low
Pin	Pinterest	Website traffic	Low
Community post / poll	YouTube, Facebook, Instagram Stories	Engagement	Low

21.2 The repurposing engine: one recording → 15 pieces

```
1 long YouTube video (8 min, provider-reviewed)
   ├── 3 Shorts / Reels / TikToks (best 30-second moments, re-captioned)
   ├── 1 Instagram carousel (key points as slides)
   ├── 1 LinkedIn post (provider's perspective)
   ├── 1 Facebook link post (to the blog guide)
   ├── 5 Pinterest pins (title cards + video pin)
   ├── 3 Stories (poll, quiz, link sticker)
   └── 1 blog embed + FAQ update (Books Three–Four)
```

> 🍛 **Desi analogy: ek daal, kai khaane**
>
> Ghar mein ek baar daal banti hai: dopahar mein chawal ke saath, raat mein roti ke saath, agle din paratha mein. **Ek recording, kai format: mehnat ek baar, khaana poora hafta.**

The Repurposing Engine

One recording, many reviewed pieces.

21.3 Rules for repurposing well

Rule	Why
Export **clean files** (no watermark) for each platform	Instagram demotes watermarked Reels
Rewrite captions per platform	Different audiences and search behaviour
Change the hook text per platform	What stops a scroll differs
Keep compliance text in every version	Each post must stand alone
Respect each platform's rules	Treatment content doesn't go to TikTok's FYF
Don't post the identical Reel twice on Instagram	Already-posted Reels are demoted

21.4 Recording day checklist

☐	Item
☐	5–8 topics scripted and medically reviewed (Chapter 38)
☐	Vertical **and** horizontal framing (record 4K horizontal, crop vertical, or record twice)
☐	B-roll: food prep, walking, phone screens (no real patient data), hands writing
☐	Clean audio (lapel mic)
☐	Consent/release forms signed by anyone on camera
☐	File naming: `2026-11-05_EatWell_ProteinBowl_v1.mp4`

> 🟧 **Ongo Weight Loss example**
>
> The channel's best long video ("GLP-1 & Lipedema", ~1.7K views) could have produced three Shorts (what lipedema is, what research says, when to see a provider), a carousel and a blog FAQ. Choose your three best-performing long videos and run them through the engine this month. 🔵

21.5 Do's and Don'ts

✅ Do	❌ Don't
Plan repurposing before recording	Decide after editing
Native files per platform	Download-and-repost with watermarks
New captions and hooks	Paste the same caption everywhere

✅ Do	❌ Don't
Track which version performs	Assume one size fits all

21.6 Pros and cons of repurposing

✅ Pros	❌ Cons
Huge time savings	Can feel repetitive to followers on several platforms
Consistent message	Needs editing per platform
Tests ideas across audiences	Rules differ (TikTok, Pinterest)

21.7 Where freshers go wrong in Chapter 21 topics

Mistake	Why it happens	Avoid it by	Fix it by
Horizontal video cropped badly into vertical	Not planning	Framing for both	Re-recording or reframing
TikTok watermark on Reels	Downloading from TikTok	Exporting from the editor	Re-uploading clean files
Missing disclaimer in cut-downs	Shortening captions	Compliance line in every caption	Editing

21.8 Thumb rules

👍 Record once, publish fifteen times.

👍 Native file, new caption, same truth.

👍 Every version must stand alone for compliance.

21.9 Notes to remember

📝 Carousels up to 20 slides; Reels and Shorts up to 3 minutes.

📝 Repost on Instagram = demotion.

Chapter 21 Glossary

Term	Simple meaning
Repurposing	Turning one piece into many
B-roll	Extra footage that supports the main video
Native upload	Uploading directly to the platform, not sharing a link
Cut-down	A shorter version of a longer video
Document post	A LinkedIn carousel made from a PDF

Chapter 21 Quiz

1. How many slides can an Instagram carousel have?

- A) 20
- B) 100
- C) 1
- D) 5

2. What happens to Reels already posted on Instagram?

- A) Nothing
- B) They go viral
- C) They get verified
- D) They're demoted

3. How many pieces can one long video become?

- A) 1,000
- B) 1
- C) About 15
- D) 0

4. What should change per platform?

- A) Caption and hook
- B) The facts
- C) Nothing
- D) The disclaimer removed

5. What is B-roll?

- A) A bread roll
- B) Supporting footage
- C) A video error
- D) A hashtag

6. Which format is best for website traffic?

- A) None
- B) Live only
- C) Stories only
- D) Pins

7. How should files be named?

- A) final_FINAL2
- B) video1
- C) Date_Pillar_Topic_version
- D) Random

8. Should treatment content go to TikTok's FYF?

- A) No
- B) Always
- C) Only Fridays
- D) Yes

9. What must anyone on camera sign?

- A) Nothing
- B) A discount code
- C) A follow request

- D) A consent/release form

10. In the daal analogy, repurposing means...

- A) Only eating daal
- B) One cooking, many meals
- C) Cooking every meal fresh
- D) Throwing food away

Answer key, Chapter 21: 1-A · 2-D · 3-C · 4-A · 5-B · 6-D · 7-C · 8-A · 9-D · 10-B

LEVEL 3 · CHAPTER 22

Chapter 22: Hooks, Scripts, Captions and Calls to Action

The hook decides whether anyone sees the rest. The caption decides whether they act. Both must stay honest.

> 💡 **Trivia**
>
> TikTok says finishing a longer video is a **strong signal** of interest, and Instagram predicts whether you'll **watch a Reel through** and **reshare** it. [1][2] ● Official
>
> The first two seconds decide the watch-through. The last line decides the share.

22.1 Ten hook patterns (with compliant examples)

#	Pattern	Example
1	**Question**	"Low appetite on GLP-1? Here's what to eat first."
2	**Mistake**	"The #1 mistake people make in their first month of GLP-1 treatment"
3	**Number**	"3 protein swaps that take 30 seconds"
4	**Myth**	"Myth: you need to eat 1,200 calories to lose weight."
5	**Before you…**	"Before your first dose, know these 4 things."
6	**Provider says**	"A provider explains why doses start low."
7	**Visual surprise**	Close-up of a 30 g-protein breakfast being built
8	**Relatable moment**	"When your appetite is gone but it's lunchtime…"
9	**Comparison**	"Compounded vs. FDA-approved: what's the difference?"
10	**Save-for-later**	"Save this grocery list for your next shop."

Banned hooks: "Lose 20 lbs in 30 days", "Doctors hate this", "Cheaper than Ozempic", fake shock reactions, fake patient confessions.

> 🪔 **Desi analogy: railway station ka chaiwala**
>
> "Chai garam!" — do shabd, aur poore platform ka dhyaan. Lekin agar chai thandi nikli, toh agle din koi nahi rukega. **Hook awaaz hai; content chai. Dono achhe hone chahiye.**

22.2 The short-video script template (30–45 s)

```
HOOK (0–2 s):     [on-screen text + first spoken line]
CONTEXT (2–6 s):  why this matters to the viewer
VALUE (6–35 s):   3 points or 3 steps
PAYOFF (35–40 s): the result/benefit (no outcome promises)
CTA (40–45 s):    one soft action (save, follow, comment, read the guide)
COMPLIANCE:       disclaimer in caption; reviewer initials in the tracker
```

22.3 Caption formula

Part	Example
Line 1 (keyword + hook)	"High-protein breakfast for smaller appetites 🍓"
Value line	"Greek yogurt, berries, chia and nut butter: about 30 g protein in 3 minutes."
Context line	"Protein helps keep you full and supports muscle while you lose weight."
CTA	"Save it for tomorrow and tell us your go-to breakfast 👇"
Compliance line	"Educational only. Talk to your provider about your nutrition needs."
Hashtags (3–5)	"#highprotein #mealprep #glp1"

22.4 Calls to action by goal

Goal	CTA	Signal it drives
Reach	"Send this to someone starting GLP-1 treatment"	Shares/sends
Saves	"Save this for your next grocery trip"	Saves
Conversation	"Which tip surprised you?"	Comments
Follow	"Follow for weekly GLP-1-friendly recipes"	Follows
Website	"Full guide: link in bio" / UTM link	Clicks, sessions
Conversion (brand posts only)	"See if you may be eligible at ongoweightloss.com"	Portal entries

One CTA per post. Several CTAs confuse people and dilute the signal.

22.5 Brand voice

We are	We are not
Warm, honest, practical	Preachy, salesy, sarcastic
Plain English (8th-grade reading level)	Medical jargon without explanation
Body-respectful	Shaming, "bikini body" language
Evidence-based	Hype ("miracle", "breakthrough")
"You" and "we"	Distant third person

22.6 Sample post rewrite, with why it's better

Live-style title: "7 Surprising Ways Ozempic-Type Drugs Protect Your Body"

Better: Hook: "GLP-1 medications may do more than lower weight. Here's what research on brand products has shown." Caption names the trials (e.g. brand semaglutide cardiovascular outcomes research), adds "Compounded medications weren't studied in these trials and aren't FDA-approved", and links to a reviewed blog guide.

Why it's better: keeps the interesting topic; removes the brand name from our hook; names the evidence instead of implying our product does it; compliant and still curious.

> 🟧 **Ongo Weight Loss example**
>
> "Last Step You Need to Complete" (136 views) has a vague hook. As **"Ongo Weight Loss sign-up, final step: what happens after you submit"**, it tells viewers exactly what they get and helps search. 🔵

22.7 Do's and Don'ts

✅ Do	❌ Don't
Hook with a real problem	Hook with a promise of results
One CTA per post	Stack five CTAs
Keyword in the first caption line	Start captions with hashtags
Disclaimer on health posts	Bury disclaimers in comments

22.8 Pros and cons of formula-based writing

✅ Pros	❌ Cons
Fast, consistent quality	Can feel templated
Easier review	Needs variation to stay fresh
Trains new writers	Hooks wear out; rotate them

22.9 Where freshers go wrong in Chapter 22 topics

Mistake	Why it happens	Avoid it by	Fix it by
Clickbait hooks	Chasing views	Banned-hooks list	Rewriting
"Link in bio" with no matching link	Forgetting to update	Link page checklist	Updating the link page
Captions that repeat the video word-for-word	Saving time	Adding context and CTA	Rewriting

22.10 Thumb rules

👍 Hook honestly, deliver fast, ask once.

👍 Keyword first line, disclaimer last line.

👍 If the hook needs a disclaimer to be true, change the hook.

22.11 Notes to remember

📝 Ten hook patterns; banned hooks list.

📝 Caption = keyword hook, value, context, CTA, compliance, 3–5 hashtags.

Chapter 22 Glossary

Term	Simple meaning
Hook	The opening that stops the scroll
CTA	Call to action: what you ask people to do

Term	Simple meaning
Brand voice	How the brand sounds
Payoff	The moment the promise is delivered
Clickbait	A misleading hook

Chapter 22 Quiz

1. Which hook is allowed?

- A) "Doctors hate this"
- B) "Cheaper than Ozempic"
- C) "Lose 20 lbs in 30 days"
- D) "Low appetite on GLP-1? Here's what to eat first."

2. How many CTAs per post?

- A) Five
- B) None ever
- C) One
- D) Ten

3. What's in the caption's first line?

- A) Keyword + hook
- B) Hashtags
- C) Disclaimer only
- D) Emojis only

4. Which CTA drives shares?

- A) "Send this to someone starting GLP-1 treatment"
- B) "Ignore this"
- C) "Buy now"
- D) "Like if you agree"

5. What reading level is our brand voice?

- A) About 8th grade
- B) Toddler
- C) Medical journal
- D) Legal contract

6. Where does the disclaimer go?

- A) In the caption of health posts
- B) Hidden in comments
- C) In the hashtags
- D) Nowhere

7. What's the problem with "Last Step You Need to Complete"?

- A) Vague; doesn't say what viewers get
- B) Uses a brand name
- C) Too long
- D) Too specific

8. What's a payoff?

- A) A payment

- B) A hashtag
- C) A discount
- D) The moment the promise is delivered

9. Which word is NOT our voice?

- A) "Warm"
- B) "Miracle"
- C) "Honest"
- D) "Practical"

10. In the chaiwala analogy, the hook is…

- A) The price
- B) The chai cup
- C) The call; the content is the chai
- D) The train

Answer key, Chapter 22: 1-D · 2-C · 3-A · 4-A · 5-A · 6-A · 7-A · 8-D · 9-B · 10-C

LEVEL 3 · CHAPTER 23

Chapter 23: Visual Identity and Accessible Social Posts

People should recognise an Ongo Weight Loss post before they read the name, and everyone, including people with low vision or hearing loss, should be able to use it.

> 💡 **Trivia**
>
> Book Four's audit found the website's main button colour (white on coral **#E76F51**) reached only about **3.1:1 contrast**, below the 4.5:1 WCAG minimum for normal text. [1] 🔵 Ongo Weight Loss internal (Book Four)
>
> The same colours will be used on social graphics, so use the accessible shades there too.

23.1 The social brand kit

Element	Value	Use
Brand green	#1B4332	Backgrounds, headline text on light
Cream	#FFFBF5	Light backgrounds
Accessible coral	#C4502F	Buttons/labels with white text (≈4.6:1)
Coral (decorative)	#E76F51	Accents, shapes, large text only
Gold	#E4B23A	Stars, highlights on green
Mint	#D8F3DC	Card backgrounds
Ink	#1A1A1A	Body text on light
Font	The website's sans family (Plus Jakarta Sans, to be confirmed)	Headlines bold 700, body 400–600
Logo	Ongo Weight Loss mark + wordmark	Top or bottom corner, small, consistent

Source: Book Four, Appendix D design tokens. 🔵

> 🪔 **Desi analogy: shaadi ka theme colour**
>
> Shaadi ka theme peela-hara ho toh card, decoration, kapde sab us rang mein. Mehmaan dur se pehchaan lete hain "yeh Sharma ji ki shaadi hai". **Brand kit wahi theme hai: har post dekhte hi pehchaan.**

23.2 Templates to build in Canva or Photoshop

Template	Size	Layout
Carousel cover	1080×1350	Big hook (6–8 words), green background, logo bottom-left
Carousel inner slide	1080×1350	Number + one point + short explanation
Quote/provider card	1080×1350	Provider photo, quote, name + credential
Reel cover	1080×1920 (keep key text in the centre 3:4 area)	Title + photo
YouTube thumbnail	1280×720	One face/object, 3–4 words

Template	Size	Layout
Pinterest pin	1000×1500	Photo top, title band bottom
Story frame	1080×1920	Safe zones top/bottom

23.3 Accessibility on social

Practice	How	Why
Captions on every video	Burned-in + platform captions; check auto-captions	Deaf/hard-of-hearing users; sound-off viewing
Alt text on images	Instagram: Advanced settings → Write alt text; Facebook: Edit alt text; X/LinkedIn: image description	Screen readers; Instagram posts are now indexable
Contrast	4.5:1 for normal text; 3:1 for large text	Low vision
Readable text size	No tiny text on graphics; ≥ 40 px on 1080-wide graphics	Phones
Camel-case hashtags	#HighProtein not #highprotein	Screen readers read words correctly
Emoji restraint	Max 2–3, not in the middle of sentences	Screen readers read each emoji's name
No flashing	Avoid rapid flashes	Seizure risk
Plain language	Short sentences	Cognitive accessibility

23.4 Sample alt text

Image	Alt text
Protein bowl	"Bowl of Greek yogurt topped with blueberries, chia seeds and a spoon of peanut butter"
Provider card	"Portrait of Dr. [Name], [credential], with the quote: 'Start low, go slow with doses.'"
Carousel cover	"Text slide: Starting GLP-1 treatment? 5 things nobody tells you"

23.5 Image rules for a health brand

✅	❌
Real food, real movement, diverse bodies	Body-shaming or "perfect body" imagery
Compounded vial imagery only when educational and approved	Brand pens (Ozempic, Wegovy) as our product
Clearly labelled AI illustrations	AI "patients" or AI before/after
Licensed stock or own photos	Images copied from Google

> 🟧 **Ongo Weight Loss example**
>
> The YouTube "Ozempic Face" thumbnail used AI-looking faces in a before/after style. Replace it with an illustration or a provider photo and the text "What is 'Ozempic face'?" to keep curiosity without implying real results. 🔵

23.6 Do's and Don'ts

✅ Do	❌ Don't
Use the brand kit every time	Invent new colours per post

✅ Do	❌ Don't
Caption every video	Rely on sound
Write alt text	Leave images undescribed
Use accessible coral for text buttons	Put white text on light coral

23.7 Pros and cons of a strict visual system

✅ Pros	❌ Cons
Instant recognition	Less variety
Faster design	Templates need updates
Accessible by default	Designers may feel boxed in

23.8 Where freshers go wrong in Chapter 23 topics

Mistake	Why it happens	Avoid it by	Fix it by
Tiny text on carousels	Fitting too much	One point per slide	Splitting slides
No captions on Reels	Rushing	Caption checklist	Re-uploading
Random stock images	Speed	Approved image library	Replacing

23.9 Thumb rules

> 👍 Recognisable in one second, readable by everyone.
>
> 👍 Caption every video, describe every image.
>
> 👍 Decorative coral, accessible coral for text.

23.10 Notes to remember

> 📝 #C4502F with white ≈ 4.6:1; #E76F51 with white ≈ 3.1:1.
>
> 📝 Camel-case hashtags help screen readers.

Chapter 23 Glossary

Term	Simple meaning
Brand kit	Colours, fonts and logos for consistent design
Alt text	A text description of an image
Contrast ratio	Difference in brightness between text and background
Camel case	Capitalising each word in a hashtag
Burned-in captions	Captions that are part of the video image

Chapter 23 Quiz

1. Which coral should carry white text?

- A) #FFFBF5
- B) #C4502F
- C) #E76F51
- D) #D8F3DC

2. What contrast does normal text need?

- A) 2:1
- B) 10:1
- C) 4.5:1
- D) 1:1

3. Why use camel-case hashtags?

- A) More reach
- B) Screen readers read the words correctly
- C) They look random
- D) Instagram requires it

4. Where do you add alt text on Instagram?

- A) Advanced settings → Write alt text
- B) In hashtags
- C) Nowhere
- D) In the bio

5. Which image is NOT allowed?

- A) A protein bowl
- B) A walking photo
- C) A provider portrait
- D) AI before/after "patients"

6. What size is a carousel slide?

- A) 1920×1080
- B) 1080×1350
- C) 500×500
- D) 300×300

7. Why caption every video?

- A) Nobody watches with sound
- B) Captions guarantee viral reach
- C) It's decoration
- D) Accessibility and sound-off viewing

8. How many emojis at most per caption (guide)?

- A) 2–3
- B) 30
- C) 0 always
- D) 100

9. What's the minimum text size on 1080-wide graphics (guide)?

- A) Any
- B) 8 px

- C) 400 px
- D) About 40 px

10. In the wedding-theme analogy, the brand kit…

- A) Is optional
- B) Changes every day
- C) Makes every post recognisable
- D) Is only for weddings

Sources

1. Ongo Weight Loss, Book Four, Chapters 4 and 26 (live-site audit and design tokens), internal
2. W3C, Understanding SC 1.4.3 Contrast (Minimum)

Answer key, Chapter 23: 1-B · 2-C · 3-B · 4-A · 5-D · 6-B · 7-D · 8-A · 9-D · 10-C

LEVEL 3 · CHAPTER 24

Chapter 24: Video Production for Newbies

You don't need a studio. A phone, window light, a cheap microphone and a clear script produce professional-looking health videos.

> 💡 **Trivia**
>
> Instagram says Reels that are **low-resolution or muted** are made less visible. [1] 🟢 Official (Instagram)
>
> Picture quality and sound aren't vanity; they affect distribution.

24.1 The minimum kit

Item	Budget option	Why
Camera	A recent smartphone (rear camera, 4K/30 fps)	Better than most webcams
Microphone	Wireless lapel mic (~$30–100)	Viewers forgive picture, not bad sound
Light	Window light, or one LED panel/ring light	Even, flattering light
Stability	Phone tripod	No shaky footage
Background	Clean, uncluttered, brand-colour accent	Professional look
Teleprompter	Free phone teleprompter app	Smooth delivery

24.2 Filming basics

Topic	Rule
Light	Face the window; avoid light behind the speaker
Framing	Eyes on the top third line; leave small headroom
Vertical + horizontal	Record vertical for Shorts/Reels; horizontal for long YouTube
Sound	Quiet room; soft furnishings reduce echo; lapel mic 15–20 cm below chin
Takes	Record each point separately; easier editing
B-roll	Hands cooking, walking, writing, close-ups of food
Privacy	No real patient screens, names or documents in shot

> 🪔 **Desi analogy: ghar ka shaadi video**
>
> Mamaji ne phone se shaadi ka video banaya: awaaz mein DJ, roshni peeche se, haath hilta hua. Kuch dekh nahi paaye. Agle cousin ne tripod lagaya, light saamne rakhi, mic lagaya: **wahi phone, bilkul professional video.**

24.3 Editing workflow with your tools

Step	Tool you own	Free alternative
Rough cut	Adobe Premiere Pro	DaVinci Resolve (free), CapCut (desktop)
Audio clean-up	Adobe Audition (noise reduction, levels)	Audacity

Step	Tool you own	Free alternative
Motion text, intros	After Effects	Canva video, CapCut text templates
Captions	Premiere Pro auto-captions (check spelling)	CapCut auto-captions, YouTube Studio
Thumbnails/covers	Photoshop	Canva, Photopea
Brand templates	Illustrator, Canva	Canva free

Check before export: captions spelled correctly (especially drug names and doses), loudness consistent (about −14 LUFS for online video), no music without licence, file named and versioned.

24.4 Export settings

Use	Settings
Shorts/Reels/TikTok	1080×1920, H.264, 30 fps, high bitrate (~10–16 Mbps)
YouTube long	1920×1080 or 3840×2160, H.264, 30 fps
Pinterest video	1000×1500 or 1080×1920
Captions file	.srt for YouTube

24.5 Working with creators and doctors

Doctors are busy, so plan **one 45-minute session per month**:

Before	During	After
Send 6–8 reviewed questions	Record each answer in 30–90 s	Editor cuts Shorts + a long video
Share example videos	One outfit, one background	Doctor approves final cuts
Book a quiet room	Natural conversation, not reading	Medical reviewer signs off captions

Paid creators follow the same quality checklist plus disclosure rules (Chapter 29).

> 🟧 **Ongo Weight Loss example**
>
> Several live videos use AI-style thumbnails and voice-over without a person. A monthly provider session would add real faces and credibility; even 6 Shorts a month from one session would make "Ask a Provider" a recognisable series. 🔵

24.6 Do's and Don'ts

✅ Do	❌ Don't
Invest in a mic first	Buy an expensive camera first
Film facing the light	Film with a window behind
Check captions for medical spelling	Trust auto-captions blindly
Batch-record monthly	Film one video at a time

24.7 Pros and cons of phone production

✅ Pros	❌ Cons
Cheap and fast	Limited low-light quality
Authentic look suits social	Needs stable mounting
Anyone can learn	Audio needs extra gear

24.8 Where freshers go wrong in Chapter 24 topics

Mistake	Why it happens	Avoid it by	Fix it by
Echoey audio	Empty rooms	Soft furnishings + lapel mic	Audition noise reduction or re-record
Patient info visible in shot	Filming in the office	Clean set check	Blurring or re-shooting
Music without licence	Using favourite songs	Licensed libraries	Replacing audio

24.9 Thumb rules

👍 Sound first, light second, camera third.

👍 One monthly session, a month of content.

👍 Check every caption for medical spelling.

24.10 Notes to remember

📝 Shorts/Reels export: 1080×1920, H.264, 30 fps.

📝 Owned tools: Premiere Pro, Audition, After Effects, Photoshop, Illustrator, Canva.

Chapter 24 Glossary

Term	Simple meaning
Lapel mic	A small microphone clipped to clothing
LUFS	A unit for measuring loudness
Rough cut	The first edit
.srt	A captions file format
Teleprompter	Software that scrolls a script for the speaker

Chapter 24 Quiz

1. What should you buy first?

- A) A microphone
- B) A cinema camera
- C) A drone

- D) A green screen

2. Where should the light come from?

- A) Below only
- B) In front of the speaker
- C) Nowhere
- D) Behind the speaker

3. Which Instagram Reels get less reach?

- A) Well-lit
- B) Low-resolution or muted
- C) Captioned
- D) Short

4. Which owned tool cleans audio?

- A) Illustrator
- B) Adobe Audition
- C) Photoshop
- D) Excel

5. What's a free alternative to Premiere Pro?

- A) DaVinci Resolve
- B) Paint
- C) Notepad
- D) Calculator

6. What loudness target suits online video?

- A) 0 LUFS
- B) Any
- C) About −14 LUFS
- D) −60 LUFS

7. How often should doctors record?

- A) Never
- B) One planned monthly session
- C) Once a year
- D) Every day

8. What must never appear in shot?

- A) The logo
- B) A plant
- C) Food
- D) Real patient screens or documents

9. What's the vertical export size?

- A) 1280×720
- B) 4000×1000
- C) 1080×1920
- D) 640×480

10. In the shaadi video analogy, the difference was...

- A) Louder music
- B) A new phone
- C) More people

- D) Tripod, light and mic, not a new phone

Sources

LEVEL 3 · CHAPTER 25

Chapter 25: Hashtags, Keywords and Social Search

There is no hashtag that guarantees 1,000× views. What does work: the right keywords in the right places, a few precise hashtags, and content people watch to the end. Here are the tools and the method.

> 💡 **Trivia**
>
> Instagram now limits posts and Reels to **5 hashtags**, and its head, Adam Mosseri, has said hashtags **don't increase reach**; they help describe what a post is about. [1] ● Industry (Social Media Today, December 2025)
>
> Keywords in captions, titles and on-screen text now matter more than hashtag lists.

25.1 The honest truth about "viral hashtags"

Myth	Reality
"Use #fyp #viral for reach"	No evidence these boost reach; they add no topic meaning
"30 hashtags = more reach"	Instagram allows 5; stuffing looks spammy
"A secret list gives 1,000× views"	Reach comes from watch time, shares and saves (Chapter 2)
"Big hashtags are best"	Huge tags are crowded; specific tags reach interested people
"Hashtags are dead"	They still help categorise and appear in search

> 🪔 **Desi analogy: library ki shelf**
>
> Library mein kitaab sahi shelf pe rakho toh sahi pathak tak pahunchti hai. Sabhi shelves pe ek-ek copy rakhne se koi nahi padhta. **Hashtag shelf ka label hai; kitaab achhi ho, tabhi log padhte hain.**

25.2 Where keywords matter now

Platform	Put keywords in…
YouTube	Title, first 2 lines of description, chapters, spoken words (captions), tags (minor)
Instagram	Name field, bio, caption first line, on-screen text, alt text, 3–5 hashtags
TikTok	Caption, on-screen text, spoken words, 3–5 hashtags
Pinterest	Pin title, description, board names, image text
Facebook	Post text, video title
LinkedIn	Post first lines, 3 hashtags max

25.3 Free resources to find keywords and hashtags

Resource	What it gives	Cost
Platform search bars (YouTube, Instagram, TikTok, Pinterest)	Autocomplete suggestions = real searches	Free
TikTok Creative Center (trends section)	Trending hashtags, songs and creators by country and industry	Free
YouTube Studio → Research tab (Inspiration/Analytics "Research")	What your audience and others search for	Free

Resource	What it gives	Cost
Pinterest Trends (trends.pinterest.com)	Rising Pinterest searches by month	Free
Google Trends	Search interest over time; compare terms	Free
Google Search Console (Book Four)	Questions people already use to find our site	Free
AnswerThePublic	Question-style keyword ideas	Free tier (limited searches)
Reddit and Facebook Group questions	Real language patients use	Free
Meta Business Suite → Insights	Which posts reached non-followers	Free
vidIQ / TubeBuddy (browser extensions)	YouTube keyword scores and tag ideas	Free tiers
Keyword Tool (keywordtool.io)	Autocomplete for YouTube, TikTok, Instagram, Pinterest	Free tier
Canva Magic / ChatGPT / Claude / Gemini	Brainstorm variations (verify with platform search)	Free tiers

25.4 The hashtag method (Instagram/TikTok)

Step	Action
1	Write the post's topic as a 3–6-word phrase ("high-protein breakfast for low appetite")
2	Type it into the platform search; note the autocomplete phrases
3	Pick **1 broad** tag (#HighProtein), **2–3 specific** (#ProteinBreakfast #MealPrepIdeas), **1 community** (#GLP1Journey or #GLP1Community), optional **1 brand** (#OngoWeightLoss)
4	Check each tag's recent posts: are they relevant and safe?
5	Never use brand drug tags (#Ozempic, #Wegovy, #Mounjaro, #Zepbound) on our posts (launch-phase rule)
6	Track which tags appear on top-performing posts each month

25.5 Sample tag sets

Post	Tags
Protein breakfast Reel	#HighProtein #ProteinBreakfast #MealPrepIdeas #GLP1Journey #OngoWeightLoss
Strength workout	#StrengthTraining #BeginnerWorkout #KeepMuscle #GLP1Community
Myth vs. fact carousel	#WeightLossTips #NutritionFacts #GLP1Education
Pinterest recipe pin	(no hashtags; keywords in title: "High-Protein Breakfast Bowl for Smaller Appetites")

25.6 Social search optimisation (SSO) checklist

☐	Check
☐	The first spoken sentence includes the main keyword
☐	On-screen text repeats it in the first 3 seconds
☐	The caption's first line contains it
☐	Alt text / description uses natural language
☐	3–5 relevant hashtags, no brand drug names
☐	The thumbnail/cover text matches the search phrase

🟧 **Ongo Weight Loss example**

Our best Shorts were recipes with clear names ("Crispy baked sweet potato loaded taco-style (easy high-protein recipe)"). That's social search done right: the exact phrase people search. Apply the same naming to every recipe Reel and pin. 🔵

25.7 Do's and Don'ts

✅ Do	❌ Don't
Put keywords in titles, captions, on-screen text	Rely on hashtags alone
Use 3–5 specific hashtags	Use #fyp #viral #explore
Research with free platform tools	Buy "viral hashtag packs"
Check tags for relevance and safety	Use brand drug hashtags

25.8 Pros and cons of keyword-first social

✅ Pros	❌ Cons
Posts keep getting found in search	Less instant than trends
Works across platforms	Needs research time
Builds on SEO skills (Books Three–Four)	Keywords change seasonally

25.9 Where freshers go wrong in Chapter 25 topics

Mistake	Why it happens	Avoid it by	Fix it by
Copying 30 tags from a competitor	Old habit	5-tag method	Editing captions
Using unrelated trending tags	Chasing reach	Relevance check	Removing tags
No keyword in the first spoken line	Not planning	SSO checklist	Re-recording the intro

25.10 Thumb rules

👍 Keywords in words, not just hashtags.

👍 1 broad, 2–3 specific, 1 community, 1 brand.

👍 If you can't find it in search, don't tag it.

25.11 Notes to remember

📝 Instagram: 5 hashtags max; hashtags describe, they don't boost.

📝 Free tools: platform search, TikTok Creative Center, YouTube Research, Pinterest Trends, Google Trends.

Chapter 25 Glossary

Term	Simple meaning
Hashtag	A clickable # label that groups posts
Social search	Searching inside social apps
Autocomplete	Search suggestions as you type
SSO	Social search optimisation
Broad vs. specific tag	General vs. narrow topic labels

Chapter 25 Quiz

1. How many hashtags does Instagram allow per post (2026)?

- A) Unlimited
- B) 30
- C) 5
- D) 100

2. Do hashtags increase reach, according to Mosseri?

- A) No; they describe content
- B) Only #fyp
- C) Only on Sundays
- D) Yes, massively

3. Which free tool shows TikTok trending hashtags?

- A) Google Docs
- B) TikTok Creative Center
- C) Calculator
- D) Microsoft Word

4. Where should the main keyword appear first?

- A) Only the bio
- B) The first spoken sentence and on-screen text
- C) Only the last hashtag
- D) Nowhere

5. Which hashtag is NOT allowed on our posts?

- A) #OngoWeightLoss
- B) #MealPrepIdeas
- C) #Ozempic
- D) #HighProtein

6. What's the hashtag mix?

- A) Only brand
- B) 30 random
- C) 1 broad, 2–3 specific, 1 community, optional 1 brand
- D) None ever

7. Which tool shows rising Pinterest searches?

- A) LinkedIn
- B) Pinterest Trends

- C) Snapchat
- D) WhatsApp

8. What reach does a "secret viral hashtag list" guarantee?

- A) 100×
- B) 1,000×
- C) 10×
- D) None; reach comes from watch time, shares, saves

9. Why use camel case in hashtags?

- A) Accessibility
- B) Required
- C) More reach
- D) Fun

10. In the library analogy, a hashtag is...

- A) The librarian's salary
- B) The shelf label
- C) The building
- D) The book itself

LEVEL 3 · CHAPTER 26

Chapter 26: Trends, Festivals, Holidays, Awareness Days and Polls

Seasonal moments give people a reason to care today. Plan them a month ahead, keep them on-brand, and never let a trend override a rule.

> 💡 **Trivia**
>
> Ivím Health's Halloween "Boo Basket" giveaway and its "travelling on GLP-1" video (about **152K views**) both used seasonal moments, while most of its other recent TikToks stayed under 4K views. [1] 🔵 Ongo Weight Loss internal
>
> Timing can multiply reach when the content is useful in that moment.

26.1 Types of moments

Type	Examples	Best content
Holidays	Thanksgiving, Christmas, New Year, Fourth of July, Halloween	Practical tips (eating out, travel, routines)
Health awareness days/months	World Obesity Day, National Nutrition Month, Men's Health Month	Education with sources
Seasons	Summer heat, winter routines, back to school	Hydration, walking, meal prep
Cultural moments	Hispanic Heritage Month, Black History Month	Respectful, community-led content
Platform trends	Formats, sounds, memes	Only if on-brand and allowed
News	New research, policy changes	Reviewed explainers (no speculation)

26.2 The Ongo Weight Loss calendar (U.S.)

Month	Moments	Content ideas
January	New Year; Healthy Weight Week (3rd week)	"Realistic goals for the new year"; habit trackers
February	American Heart Month; Valentine's Day	Heart-healthy recipes; "self-care is health care"
March	World Obesity Day (4 Mar); National Nutrition Month; Doctors' Day (30 Mar)	Obesity as a chronic disease; dietitian tips; thank our providers
April	World Health Day (7 Apr); National Walking Day (1st Wed)	Walking challenge (poll + Stories)
May	Mental Health Awareness Month; National Women's Health Week (from Mother's Day); Nurses Week (6–12 May)	Stress and eating; women's health Q&A; thank nurses
June	Men's Health Month; summer start	Men over 40 and weight; hydration
July	Fourth of July	BBQ swaps; heat and hydration
August	Back to school	Meal prep for busy families
September	Healthy Aging Month; PCOS Awareness Month; Hispanic Heritage Month (15 Sep–15 Oct)	Strength after 50; PCOS and weight (reviewed); Spanish recipes
October	Breast Cancer Awareness Month; Halloween	Screening reminders (sources); "treats without guilt"
November	National Diabetes Month; World Diabetes Day (14 Nov); Thanksgiving	GLP-1 basics and diabetes (reviewed); holiday plate tips

Month	Moments	Content ideas
December	Holidays; year-end	Party tips; "your year in small wins" (community)

Dates move each year: confirm exact dates on official sources before scheduling. 🔵

> 🪔 **Desi analogy: tyohaar ki mithai**
>
> Diwali pe halwai ki dukaan pe line lagti hai, kyunki mithai us din ki zaroorat hai. Lekin woh mithai mein milawat kare toh saal bhar ki izzat chali jaati hai. **Tyohaar pe content zaroori, lekin sach aur gunvatta wahi.**

26.3 Using polls and interactive features

Feature	Platform	Example
Poll	Instagram/Facebook Stories, YouTube Community, LinkedIn	"Thanksgiving: are you planning ahead or going with the flow?"
Quiz	Instagram Stories	"Which has more protein: 1 egg or ½ cup Greek yogurt?"
Question box	Instagram Stories	"Ask us anything about meal prep" (answer general questions only)
Countdown	Instagram Stories	"Live Q&A in 3 days"
Emoji slider	Instagram Stories	"How ready do you feel for the holidays?"

Poll rules: never ask for personal health details ("What's your BMI?", "Which medication are you on?"); keep polls about habits, preferences and knowledge.

26.4 Trend filter (before joining any trend)

Question	Must be
Does the trend fit a pillar?	Yes
Is the audio licensed for business use?	Yes
Could it shame bodies or mock anyone?	No
Does it require a claim we can't make?	No
Will it still make sense in 3 days?	Yes, or post within 48 hours
Has the team lead approved trend-jacking rules?	Yes

26.5 Planning timeline

When	Task
6 weeks before	Pick the moments for next month; assign pillars
4 weeks	Scripts and designs; medical review for health claims
2 weeks	Record, edit, schedule
Week of	Stories, polls, replies
After	Record results for next year's plan

🟧 **Ongo Weight Loss example**

November is National Diabetes Month with World Diabetes Day on 14 November, plus Thanksgiving. A reviewed long video ("GLP-1 medications and diabetes: the basics"), three Thanksgiving-plate Shorts, a holiday-eating carousel and a Stories poll would cover the month. 🔵

26.6 Do's and Don'ts

✅ Do	❌ Don't
Plan moments 4–6 weeks ahead	Rush awareness-day posts on the day
Tie every moment to a pillar	Post holiday greetings with no value
Use polls about habits	Ask for health details
Verify dates each year	Reuse last year's dates

26.7 Pros and cons of seasonal content

✅ Pros	❌ Cons
Timely interest and shares	Short shelf life
Easy planning anchors	Competitors post the same day
Community moments	Risk of tone-deaf posts

26.8 Where freshers go wrong in Chapter 26 topics

Mistake	Why it happens	Avoid it by	Fix it by
Joining a trend with unlicensed music	Excitement	Trend filter	Replacing audio
Diet-shaming holiday posts	Old diet culture	Voice rules	Rewriting with kindness
Wrong awareness dates	Copying old lists	Annual check	Correcting

26.9 Thumb rules

👍 Moments give a reason; pillars give the value.

👍 Plan six weeks ahead, review four weeks ahead.

👍 Polls ask about habits, never health details.

26.10 Notes to remember

📝 Key moments: New Year, World Obesity Day (4 Mar), National Nutrition Month, Men's Health Month, National Diabetes Month, Thanksgiving.

📝 Trend filter: pillar, licensed audio, kind, no claims, still relevant, approved.

Chapter 26 Glossary

Term	Simple meaning
Awareness day/month	A dedicated time to highlight a health topic
Trend-jacking	Joining a popular trend for reach
Interactive sticker	Polls, quizzes and questions in Stories
Content calendar	A schedule of planned posts
Shelf life	How long content stays relevant

Chapter 26 Quiz

1. When is World Obesity Day?

- A) 1 July
- B) 31 October
- C) 4 March
- D) 25 December

2. Which month is National Diabetes Month?

- A) November
- B) June
- C) August
- D) March

3. Which poll is NOT allowed?

- A) "What's your BMI?"
- B) "Walk or cycle?"
- C) "Favourite high-protein snack?"
- D) "Planning ahead for Thanksgiving?"

4. How far ahead should moments be planned?

- A) On the day
- B) 4–6 weeks
- C) A year late
- D) Never

5. What did Ivím use successfully?

- A) Seasonal moments (Halloween, travel)
- B) Fake reviews
- C) Brand drug hashtags
- D) Nothing

6. Which month is Men's Health Month?

- A) January
- B) October
- C) June
- D) April

7. What must every trend pass?

- A) The trend filter
- B) A follower count check

- C) A price check
- D) Nothing

8. What should we do after a seasonal campaign?

- A) Record results for next year
- B) Forget it
- C) Delete everything
- D) Repost unchanged daily

9. Which month includes Hispanic Heritage Month's start?

- A) September (15 Sep–15 Oct)
- B) December
- C) February
- D) May

10. In the mithai analogy, festival content must be…

- A) Rushed and fake
- B) Avoided
- C) Timely and still high quality
- D) Only sweets

Answer key, Chapter 26: 1-C · 2-A · 3-A · 4-B · 5-A · 6-C · 7-A · 8-A · 9-A · 10-C

Chapter 27: The Engagement Playbook: Likes, Comments, Shares, Saves and Pins

Engagement isn't begged for; it's designed into the post. Each action is a different signal, and each platform values them differently.

> 💡 **Trivia**
>
> Instagram Explore ranks posts mainly on predicted **likes, saves and shares**, while Reels lean on **reshares and watch-through**. [1] ● Official (Instagram)
>
> Asking for a like is the weakest move. Making something worth sending is the strongest.

27.1 What each engagement action means

Action	What it signals	Strongest on
Like	Quick approval	All (weak signal)
Comment	Conversation	Facebook, LinkedIn, Instagram feed
Share/send	"My friend needs this"	Instagram, TikTok, Facebook
Save	"I'll use this later"	Instagram, TikTok
Pin save	Planning intent	Pinterest
Watch-through / rewatch	Holds attention	TikTok, Reels, Shorts
Follow after viewing	Wants more	Instagram, TikTok, YouTube
Subscribe + bell	Long-term interest	YouTube
Profile tap / link click	Curiosity about the brand	Instagram, TikTok

27.2 How to design for each action

To get more...	Design this	Example
Saves	Checklists, recipes, grocery lists, "cheat sheets"	"7 high-protein snacks under 200 calories" carousel
Shares	Relatable moments, "send this to..." usefulness, surprising facts	"When your appetite disappears but lunch is in 10 minutes 😅"
Comments	Genuine questions, light opinions, "which one?" choices	"Sweet or savoury breakfast? 👇"
Watch-through	Hook + fast value + payoff at the end	Recipe revealed in the last 3 seconds
Follows	Series promise ("Part 1 of 7")	"7 days of GLP-1-friendly breakfasts, day 1"
Pins	Tall images, keyword titles, recipe/plan content	"High-Protein Meal Prep for the Week"
Subscribers	Playlists + "watch next" end screens	Series playlists
Link clicks	A clear reason to click (full recipe, full guide)	"Full macros and steps on our blog"

> 🍛 **Desi analogy: shaadi ka khana**
>
> Achha khana ho toh mehmaan khud taarif karte hain (like), recipe puchhte hain (comment), dabbe mein le jaate hain (save), aur doston ko batate hain (share). **Mehmaanon se "taarif karo" bolne ki zaroorat nahi padti.**

27.3 Platform-by-platform tactics

Platform	Top tactics
YouTube	Pinned comment with a question; reply to early comments in the first hour; Community tab polls; end screens; playlists
Instagram	Carousels for saves; Reels for sends; Story polls daily; reply to comments within an hour of posting; collab posts with partners
Facebook	Questions in captions; reply to every comment; Reels; future Group
TikTok	Reply to comments with videos; series; stitches responding to questions
Pinterest	Fresh pins weekly; multiple pin designs per page; keyword boards
LinkedIn	Doctor/leader posts; first-hour replies; document carousels

27.4 Community habits that grow engagement

Habit	Why
Reply to every genuine comment within 24 hours (ideally the first hour)	Early replies boost conversation and show care
Like and answer questions with names ("Great question, Sam!")	Feels personal
Turn good questions into new posts	"You asked, we answered" series
Thank people who share	Encourages more
Hide spam and scams quickly	Protects the community

27.5 What's banned (engagement manipulation)

❌ Banned	Why
Buying likes, followers or views	FTC rule on fake social indicators; platform bans
Engagement pods / "like-for-like" groups	Platform manipulation rules
"Comment YES / tag 3 friends to win"	Engagement bait; demoted by Meta
Giveaways that require reviews or shares to enter	Platform promotion rules; FTC review rules
Fake accounts commenting	FTC fake reviews/testimonials rule

Giveaways done right: simple entry (comment an answer or follow), official rules page, no purchase necessary, prizes not prescription-related, legal review.

> 🟧 **Ongo Weight Loss example**
>
> A 7-part "Breakfasts on GLP-1" Shorts/Reels series (day 1–7), each ending with "Save this and follow for tomorrow's", combines save, follow and watch-through signals. Pair it with daily Story polls ("Tried it? Yes/Not yet") and reply to every comment in the first hour. 🔵

27.6 Do's and Don'ts

✅ Do	❌ Don't
Design saves, shares and comments into posts	Beg for likes
Reply fast and personally	Ignore comments for days
Turn questions into content	Delete critical but fair comments
Run compliant giveaways only	Tag-3-friends contests

27.7 Pros and cons of engagement-first content

✅ Pros	❌ Cons
More reach for free	Needs daily community time
Builds loyalty	Comments include hard questions
Gives content ideas	Must moderate spam and scams

27.8 Where freshers go wrong in Chapter 27 topics

Mistake	Why it happens	Avoid it by	Fix it by
Joining engagement pods	Shortcut promises	Banned list	Leaving the pod
Answering medical questions in comments	Wanting to help	Reply templates	Redirecting to providers
Posting and leaving	Busy schedule	First-hour reply block	Calendar reminder

27.9 Thumb rules

👍 Make it worth saving, sending or saying something about.

👍 The first hour after posting is for replying.

👍 Never buy, pod or bait engagement.

27.10 Notes to remember

📝 Explore: likes, saves, shares. Reels: reshares and watch-through.

📝 Buying fake followers/views is covered by the FTC rule (2024).

Chapter 27 Glossary

Term	Simple meaning
Engagement	Actions people take on content
Engagement pod	A group that likes each other's posts to game algorithms
Engagement bait	Manipulative requests for interactions

Term	Simple meaning
Series	A numbered set of related posts
First-hour replies	Replying soon after posting

Chapter 27 Quiz

1. What does a save signal?

- A) Spam
- B) Quick approval only
- C) "I'll use this later"
- D) Dislike

2. Which format best drives saves?

- A) Checklists and recipes
- B) Text-only memes
- C) Blurry selfies
- D) Empty posts

3. What's an engagement pod?

- A) A sticker
- B) A podcast
- C) A group gaming algorithms by engaging with each other
- D) A video format

4. What should happen in the first hour after posting?

- A) Delete the post
- B) Reply to comments
- C) Post again
- D) Buy likes

5. Which giveaway is allowed (after legal review)?

- A) Tag 3 friends and leave a review
- B) Win a prescription
- C) Buy to enter
- D) Comment an answer to enter, with official rules

6. Which Instagram signals rank Explore?

- A) Follower count only
- B) Hashtag count
- C) Post length
- D) Likes, saves, shares

7. What drives follows?

- A) A series promise
- B) Asking "follow pls"
- C) Buying followers
- D) Long intros

8. What do we do with good questions?

- A) Ignore them
- B) Delete them

- C) Turn them into new posts
- D) Answer with diagnoses

9. Is buying followers allowed?

- A) No
- B) Only on TikTok
- C) Yes
- D) Only 1,000

10. In the wedding-food analogy, good content…

- A) Earns praise without asking
- B) Needs begging
- C) Is hidden
- D) Is bought

Sources

2. DWT, FTC finalizes rule banning fake consumer reviews 🟠
3. Ongo Weight Loss, content plan, October 2026 (internal) 🔵

Answer key, Chapter 27: 1-C · 2-A · 3-C · 4-B · 5-D · 6-D · 7-A · 8-C · 9-A · 10-A

LEVEL 3 · CHAPTER 28

Chapter 28: Brand, Doctor, Author and Creator Accounts: Who Posts What

People trust people. The brand account should be supported by real voices: providers, authors and creators, each in the right role and with the right disclosures.

> 💡 **Trivia**
>
> YouTube lets **licensed healthcare professionals and organisations apply** to be recognised as health sources in YouTube Health features. [1] ● Official (YouTube)
>
> A provider-led channel or recognised organisation can earn extra credibility signals that a generic brand account can't.

28.1 The four voices

Voice	Who	Strength	Limits
Brand account (@ongoweightloss...)	The company	Consistency, official info, CTAs	Feels less personal
Doctor/provider accounts	Medical Director, providers	Highest trust on health topics	Time-poor; strict professional and compliance rules
Author/contributor accounts	Writers, dietitians, editors (Book Three contributors)	Expertise in nutrition, lifestyle	Not for medical decisions
Creators/influencers	Paid or gifted partners	Reach and relatability	Disclosures; claim limits (Chapter 29)

> 🍛 **Desi analogy: cricket team**
>
> Captain (brand) toss karta hai aur team ka chehra hai. Lekin match jitaate hain specialist: opener (doctor), spinner (dietitian/author), aur fan-favourite all-rounder (creator). **Har khiladi apni position pe khele, tabhi team jeetti hai.**

28.2 When to use which voice

Situation	Lead voice	Support
"How compounded semaglutide works"	Doctor (video)	Brand posts it; author writes the blog
High-protein recipes	Author/dietitian or creator	Brand reposts/collab
Pricing, how it works, sign-up steps	Brand	Doctor cameo for trust
Side-effect myths	Doctor	Brand carousel summary
Lifestyle, motivation, routines	Creator	Brand collab post
Crisis or correction	Brand (official)	Doctor statement if clinical
Company news, hiring	Brand + leadership on LinkedIn	—

28.3 How doctor and author accounts support the brand

Tactic	How
Collab posts (Instagram)	One post appears on both the brand and the doctor's profile
Duets/stitches (TikTok)	Doctor responds to a brand video
YouTube cameos	Doctor appears in brand videos; brand links to the doctor's bio page
LinkedIn	Doctor shares the brand's guide with personal commentary
Bylines	The website shows the author and reviewer (Book Four, Ch. 10); social posts credit them

Tactic	How
Profile links	Doctor profiles say "Medical Director at Ongo Weight Loss" and link the website

28.4 Guardrails for provider accounts

Rule	Why
Disclose the relationship ("Medical Director at Ongo Weight Loss")	FTC material connection
Educational content only; no personal diagnosis in comments	Professional and legal limits
Clinical claims reviewed (another provider or the medical reviewer)	Compliance
Never discuss specific patients	HIPAA
Don't use brand drug names in commercial promotion of Ongo Weight Loss	Launch-phase rule
Follow state medical board rules on advertising	Licensing
Personal opinions labelled as personal	Separates professional speech from brand claims

28.5 If doctors are too busy

Option	How
Monthly 45-minute recording session	Six Shorts + one long video (Chapter 24)
Reviewed voice-over by a provider	Script written by the team, recorded by the provider
Written quotes for carousels	Provider approves a quote card
Creator + provider review	Creator presents; provider reviews the script
AI avatars	Only clearly labelled, never presented as a real doctor (Chapter 31)

🟧 **Ongo Weight Loss example**

The medical team pages list five providers, including Dr. Benjamin Krasne and the Medical Director (Dr. Johnathan Chance Miller, MD). A monthly "Ask a Provider" session with one of them, posted as collab Reels on the brand account, would add the human trust layer the YouTube channel currently lacks. 🔵

28.6 Do's and Don'ts

✅ Do	❌ Don't
Use doctors for clinical topics	Let the brand account give clinical opinions without review
Disclose every relationship	Present employees as independent fans
Collab-post to grow both accounts	Make providers manage brand accounts
Label personal opinions	Mix personal views with brand claims

28.7 Pros and cons of personal voices

✅ Pros	❌ Cons
Higher trust and reach	People leave; accounts are theirs
Human connection	Need training and review
Expert credibility	Time-consuming

28.8 Where freshers go wrong in Chapter 28 topics

Mistake	Why it happens	Avoid it by	Fix it by
Creating a doctor's account and running it as them without consent	Speed	Written agreement	Handing control to the doctor

Mistake	Why it happens	Avoid it by	Fix it by
Undisclosed employee posts	Forgetting	Disclosure rule	Editing posts
Doctor answers a patient's question publicly	Wanting to help	Guardrails	Moving to private channels

28.9 Thumb rules

👍 Brand for official, doctor for clinical, author for lifestyle, creator for reach.

👍 Every personal voice discloses its connection.

👍 Collab posts grow both accounts.

28.10 Notes to remember

📝 YouTube Health features: licensed professionals and organisations can apply.

📝 Doctors' time: one monthly session, many posts.

Chapter 28 Glossary

Term	Simple meaning
Collab post	One post shared on two accounts
Cameo	A short appearance in someone else's video
Material connection	A relationship that could affect trust
Byline	Author credit
Health source feature	YouTube label for recognised health sources

Chapter 28 Quiz

1. Who leads clinical topics?

- A) Bots
- B) Interns
- C) Doctors/providers
- D) Creators

2. What must doctors disclose?

- A) Passwords
- B) Their role at Ongo Weight Loss
- C) Nothing
- D) Patient names

3. Which voice leads pricing posts?

- A) Nobody
- B) Competitor
- C) Brand
- D) Creator

4. What's a collab post?

- A) An ad
- B) A post on two accounts
- C) A private DM
- D) A deleted post

5. Can licensed professionals apply for YouTube Health features?

- A) Yes
- B) Only brands
- C) Only influencers
- D) No

6. If doctors are busy, what's the best option?

- A) A monthly 45-minute recording session
- B) Unlabelled AI doctors
- C) No health content ever

- D) Fake doctor accounts

7. Can doctors discuss specific patients?

- A) Never
- B) Yes
- C) If anonymous-ish
- D) With emojis

8. Who leads lifestyle content?

- A) Nobody
- B) Lawyers
- C) Creators and authors/dietitians
- D) Competitors

9. Should AI avatars be presented as real doctors?

- A) Sometimes
- B) Only on TikTok
- C) Never
- D) Yes

10. In the cricket analogy, the brand account is…

- A) The groundsman
- B) The captain
- C) The scoreboard
- D) The umpire

LEVEL 3 · CHAPTER 29

Chapter 29: Creators and Influencers: Finding, Vetting, Briefing, Disclosing

Creators bring reach and relatable faces. In health, they also bring risk: every creator post about Ongo Weight Loss is legally our endorsement. Choose carefully and brief tightly.

> 💡 **Trivia**
>
> The FTC says influencers must disclose **any** material connection to a brand, including **free or discounted products**; disclosures must be **with the endorsement** (in the video itself, not only the description); and influencers **can't make claims that need proof the advertiser doesn't have**, such as health benefits. [1] ● Official (FTC)
>
> A creator saying "this cured my diabetes" in our campaign is our problem.

29.1 Types of creators

Type	Followers	Best for	Cost (organic collab)
Nano	1K–10K	Trust, niche communities	Product/fee small
Micro	10K–100K	Engaged audiences; best value	Moderate
Mid-tier	100K–500K	Reach + some trust	Higher
Macro/celebrity	500K+	Awareness	Expensive; highest risk
Expert creators	Any	Dietitians, trainers, nurses, physicians	Credibility

For Ongo Weight Loss, start with **nano and micro expert creators**: registered dietitians, certified trainers, nurses and food creators.

29.2 How to find creators (free methods)

Method	How
Platform search	Search "high protein recipes", "GLP-1 meals", "dietitian" on Instagram, TikTok, YouTube; filter by recent videos
Hashtag pages	Browse #ProteinRecipes, #StrengthTraining, #RegisteredDietitian
Competitor collabs	See who tags competitors with "Paid partnership" labels
Comments on our posts	Engaged followers with their own audiences
Creator marketplaces	TikTok's creator marketplace, YouTube BrandConnect, Instagram's creator marketplace (availability varies by country/account)
Paid discovery tools	Modash, Upfluence, Aspire, Collabstr (trials/free tiers vary)

29.3 Vetting checklist

☐	Check	Red flag
☐	Engagement rate (likes+comments ÷ followers)	Very low or suspicious spikes
☐	Comment quality	Generic bot comments ("Nice pic 🔥")
☐	Follower growth	Sudden jumps (bought followers)
☐	Past content	Extreme diets, body shaming, unproven supplements
☐	Past brand deals	Undisclosed ads; competing GLP-1 brands
☐	Health claims history	"Cured", "miracle", before/after without context
☐	Credentials (for expert creators)	Unverifiable titles
☐	Audience location	Mostly outside the U.S.
☐	Age	Creator and audience must be adults

☐	Check	Red flag
☐	Values fit	Kind, honest, body-respectful

> 🪔 **Desi analogy: shaadi ka rishta**
>
> Rishta pakka karne se pehle parivaar ki puchh-taachh hoti hai: kaam, aadatein, purane rishte. **Creator chunna bhi rishta hai**: unki purani posts, followers aur reputation sab dekho.

29.4 The creator brief

Section	Content
Goal	Awareness of healthy eating on GLP-1 treatment (example)
Deliverables	1 Reel + 3 Stories; 1 YouTube integration (60 s)
Key messages	Approved 3 talking points (e.g. protein, hydration, provider-led care)
Must say	"#ad" / "Paid partnership with Ongo Weight Loss" in the video and caption; "Educational only"
Must NOT say	Outcome claims, "same as Ozempic/Wegovy", "FDA-approved", prices unless provided, anything about their own prescription unless verified and approved by legal
Visuals	No brand pens; compounded vials only if approved; no before/after unless pre-approved with consent and documentation
Approvals	Script → team lead + medical/legal review → final cut review
Usage rights	Can the brand repost? For how long? (Paid amplification belongs in the paid book)
Timing	Draft date, posting date
Reporting	Screenshots of reach, views, saves, link clicks within 7 days

29.5 Contract essentials (legal reviews every contract)

Clause	Why
Disclosure obligation and FTC compliance	Required
Content approval rights	Compliance
No outcome or drug claims	FDA/FTC
Morality/values clause	Brand safety
Usage rights and term	Reposting
Payment terms tied to delivery, not to sales of prescriptions	Avoids "paying per prescription" problems
Exclusivity (no competing GLP-1 brands for X months)	Clean messaging
Takedown on request	Fix mistakes fast

29.6 Sample creator caption, with why it's better

Weak: "Obsessed with my semaglutide from @ongoweightloss.usa!! Down 30 lbs 😍 Use my code!"

Better:

> "#ad Paid partnership with Ongo Weight Loss. My high-protein breakfast for busy mornings: Greek yogurt, berries, chia and nut butter (about 30 g protein). If you're on GLP-1 treatment and your appetite is low, protein-first meals can help; talk to your provider about your needs. Ongo Weight Loss shares more provider-reviewed recipes on their page. Educational only."

Why it's better: disclosure first; no personal prescription or results claim; useful content; points to the brand without selling medication.

> 🟧 **Ongo Weight Loss example**
>
> Start with 3–5 micro creators who are registered dietitians or trainers, each making one recipe or movement video per month as collab posts. Measure saves, shares and profile visits on our account before scaling. 🔵

29.7 Do's and Don'ts

✅ Do	❌ Don't
Vet history, audience and values	Pick creators by follower count alone
Require in-video disclosure	Rely only on the platform label
Pre-approve scripts	Let creators improvise medical claims
Use legal-reviewed contracts	Make handshake deals

29.8 Pros and cons of creator partnerships

✅ Pros	❌ Cons
Real faces and reach	We're responsible for their claims
Faster trust in niche communities	Vetting takes time
Fresh content	Creators can create controversy later

29.9 Where freshers go wrong in Chapter 29 topics

Mistake	Why it happens	Avoid it by	Fix it by
Gifting without disclosure	"It's free, not paid"	FTC rules	Asking for disclosure edits
Creator shares their weight loss numbers	Excitement	Brief "must not say"	Takedown and re-edit
Bought-follower creators	Not checking	Vetting list	Ending the partnership

29.10 Thumb rules

👍 Their words are our claims.

👍 Disclose in the video, in the caption, every time.

👍 Micro experts before macro celebrities.

29.11 Notes to remember

📝 Free products = material connection = disclosure.

📝 Every brief has must-say and must-not-say lists.

Chapter 29 Glossary

Term	Simple meaning
Creator / influencer	A person whose content influences an audience
Micro-influencer	10K–100K followers
Brief	Instructions for a creator
Usage rights	Permission to reuse a creator's content
Engagement rate	Engagement divided by followers (or reach)

Chapter 29 Quiz

1. Do free products require disclosure?

- A) Only on TikTok
- B) Yes
- C) Only over $100
- D) No

2. Where must video disclosures appear?

- A) Only in the description
- B) Only in the bio
- C) Nowhere
- D) In the video itself (and caption)

3. Which creators should we start with?

- A) Nano/micro experts (dietitians, trainers)
- B) Competitors' staff
- C) Celebrities
- D) Anonymous accounts

4. What's a red flag in vetting?

- A) Sudden follower jumps
- B) Thoughtful comments
- C) Clear disclosures
- D) Verified credentials

5. Can creators say "same as Ozempic"?

- A) Yes
- B) Only with emojis
- C) Only in Stories
- D) No

6. Who reviews creator contracts?

- A) The creator alone
- B) Legal
- C) Followers
- D) Nobody

7. How should payment be structured?

- A) Tied to delivery, not prescriptions sold
- B) Per prescription
- C) Per pound lost
- D) Secretly

8. Which caption is better?

- A) "Down 30 lbs on semaglutide! Use my code"
- B) "Obsessed!!!"
- C) "Not an ad (it is)"
- D) "#ad Paid partnership... protein breakfast... educational only"

9. Is the platform's paid-partnership label enough alone?

- A) Yes
- B) Only for celebrities
- C) Only on YouTube
- D) No; add clear disclosure too

10. In the rishta analogy, vetting means...

- A) Asking strangers
- B) Checking history and reputation before committing
- C) Skipping checks
- D) Choosing by looks

Answer key, Chapter 29: 1-B · 2-D · 3-A · 4-A · 5-D · 6-B · 7-A · 8-D · 9-D · 10-B

LEVEL 3 · CHAPTER 30

Chapter 30: UGC, Testimonials and Before/After Content

Real stories are the most persuasive content in weight care, and the most regulated. This chapter explains exactly what's allowed, and why AI-edited "results" are never allowed.

> 💡 **Trivia**
>
> The FTC's rule on fake reviews and testimonials (effective October 2024) bans testimonials from people who **don't exist (including AI-generated)**, from people **without real experience**, and testimonials that **misrepresent** someone's experience. [1] ● Industry (DWT summary of the FTC rule)
>
> An AI-edited before/after photo is a testimonial that misrepresents an experience.

30.1 Definitions

Term	Meaning
UGC (user-generated content)	Content made by real customers or followers (posts, comments, videos)
Testimonial	A statement about someone's experience with us
Before/after	Images or numbers showing change over time
Typical results	What most people experience

30.2 The rules for using real stories

Rule	Detail
Written consent	Signed release covering where and how long content is used, including social media; separate HIPAA authorisation if the person is a patient and health information is shared
Real and unedited	No AI edits, body reshaping, filters or lighting tricks that change results
Typicality	If results aren't typical, clearly say what people can generally expect, or don't use the story
Same context	Before and after photos taken under similar conditions (lighting, pose, clothing)
Disclose connections	If the person was paid, gifted, or is staff or family, disclose it
No drug credit for compounded results based on brand trials	Results belong to the person's whole programme; no "semaglutide did this" claims
Minors	Never
Revocation	People can withdraw consent; remove promptly
Platform rules	TikTok's body-image and weight-loss rules; Meta's restrictions (Chapter 33)

> 🍛 **Desi analogy: shaadi ki photos**
>
> Photographer dulhan ki photo itni edit kar de ki rishtedaar pehchaan na paayein, toh sab hasenge. **Sehat ke "pehle-baad" mein edit karna mazaak nahi, dhokha hai.**

30.3 Why AI-edited before/after is a hard no

Risk	Detail
FTC	Misrepresents the experience; civil penalties
FDA	Implies drug effectiveness for compounded products

Risk	Detail
Platforms	Removal; account penalties
Trust	Discovery destroys credibility permanently
Ethics	Harms vulnerable people comparing their bodies

Allowed AI use instead: clearly labelled illustrations of concepts (e.g. "how GLP-1 affects appetite" diagrams), stylised characters that don't depict results, and stock-style scenes that make no claims (Chapter 31).

30.4 Building real testimonials (the slow, safe way)

Step	Action
1	Ask all patients (via email, not social) if they'd like to share their experience
2	Interested patients sign the release + any required authorisation
3	Interview about the **experience** (support, ease, how it felt), not numbers
4	Medical and legal review the edit
5	Post with "Individual results vary" and any disclosures
6	Keep consent records with the content file

30.5 Reposting UGC from followers

☐	Check
☐	Ask permission in the comments or DM: "Can we share this on our page, crediting you?" and get a "yes" in writing
☐	Content contains no health claims we can't make
☐	Credit the creator
☐	If they're a patient, don't mention it unless they've signed the release

30.6 Sample testimonial post, with why it's better

Weak: "Sarah lost 45 lbs in 3 months with our semaglutide! 🔥 You can too!" + side-by-side photo.

Better: "Sarah says the part that helped most was 'having someone to ask when I felt nauseous in week two.' (Shared with Sarah's written permission. Individual experiences vary. Ongo Weight Loss's providers decide whether treatment is right for each person.)"

Why it's better: focuses on the care experience, not numbers; no drug-efficacy claim; consent stated; typicality disclaimer; no images that compare bodies.

> 🟧 **Ongo Weight Loss example**
>
> You mentioned there aren't many real before/after images yet. That's fine. Start with **experience testimonials** (support, convenience, provider care) gathered with consent. They're safer, more relatable and allowed on more platforms. 🔵

30.7 Do's and Don'ts

✅ Do	❌ Don't
Get written consent	Repost without permission
Focus on experience	Lead with pounds lost
Disclose connections and typicality	Imply everyone gets the same results
Keep consent records	Edit or AI-generate "results"

30.8 Pros and cons of testimonials

✅ Pros	❌ Cons
Most persuasive content	Heavy consent and review
Builds community	Platform restrictions on weight images
Real language for future content	People can withdraw consent

30.9 Where freshers go wrong in Chapter 30 topics

Mistake	Why it happens	Avoid it by	Fix it by
Screenshotting a DM compliment	Excitement	Consent rule	Deleting and asking
Using stock "before/after" models	Looks professional	Real-only rule	Removing
Attributing results to the drug	Natural wording	Experience-focused scripts	Rewriting

30.10 Thumb rules

👍 Real, consented, typical, disclosed, or not at all.

👍 Experience stories before number stories.

👍 AI may illustrate ideas, never results.

30.11 Notes to remember

📝 FTC fake-reviews rule covers AI-generated and misrepresented testimonials.

📝 Keep signed consent with every testimonial file.

Chapter 30 Glossary

Term	Simple meaning
UGC	Content made by users, not the brand
Release form	A signed permission to use someone's content or likeness
HIPAA authorisation	Patient permission to use their health information

Term	Simple meaning
Typicality disclosure	Explaining what most people can expect
Revocation	Withdrawing consent

Chapter 30 Quiz

1. Are AI-edited before/after photos allowed?

- A) Never
- B) If labelled small
- C) Only on Pinterest
- D) Yes

2. What does the FTC rule ban?

- A) AI-generated or misrepresented testimonials
- B) Captions
- C) All photos
- D) All reviews

3. What's needed before sharing a patient story?

- A) A like
- B) Written consent (and HIPAA authorisation if health info)
- C) A follow
- D) Nothing

4. What should testimonials focus on first?

- A) The care experience
- B) Pounds lost
- C) Prices
- D) Drug names

5. What does "typicality" mean?

- A) A hashtag
- B) What most people experience

- C) A font
- D) A camera angle

6. Can minors appear in testimonials?

- A) With a filter
- B) Only on TikTok
- C) Never
- D) Yes

7. What's the right way to repost follower UGC?

- A) Edit their words
- B) Ask permission in writing and credit them
- C) Screenshot and post
- D) Remove their name

8. What may AI be used for?

- A) Fake doctors
- B) Fake patient results
- C) Fake reviews
- D) Labelled concept illustrations

9. Can people withdraw consent?

- A) Only by lawsuit
- B) Yes; remove promptly
- C) Only after 10 years
- D) No

10. In the wedding-photo analogy, editing results is…

- A) Professional
- B) Required
- C) Harmless fun
- D) Deception, not decoration

Sources

Answer key, Chapter 30: 1-A · 2-A · 3-B · 4-A · 5-B · 6-C · 7-B · 8-D · 9-B · 10-D

LEVEL 3 · CHAPTER 31

Chapter 31: AI Tools and LLMs for Each Platform and Task

AI can draft, edit, caption, resize and brainstorm in minutes. It can also invent facts and fake people. Use it as an assistant, never as the author of record, and always label realistic synthetic media.

> 💡 **Trivia**
>
> YouTube, Instagram/Facebook and TikTok all ask creators to **label realistic AI-generated or altered content** (YouTube's "altered or synthetic content" disclosure, Meta's "AI info" label, TikTok's AI-generated content label). ● Industry summary of platform policies (2024–2026)
>
> If a viewer could mistake it for a real person or a real event, label it.

31.1 What AI is good and bad at for us

✅ Good at	❌ Bad at
Brainstorming hooks, titles and angles	Medical accuracy (it can invent facts and studies)
Rewriting captions per platform	Knowing our compliance rules unless told
Summarising long videos into Shorts ideas	Current platform rules (may be outdated)
Auto-captions and translation drafts	Brand voice without examples
Resizing and repurposing visuals	Respecting copyright and likeness rights by default
First-draft scripts	Being accountable

31.2 Which LLM for which job

Job	Recommended tools	Notes
Research summaries and outlines	Claude, ChatGPT, Gemini, Perplexity (with sources)	Always open and check the sources it cites
Captions and hooks	Claude or ChatGPT with our brand voice + rules pasted in	Give 3 good examples first
YouTube titles/descriptions	ChatGPT/Claude + vidIQ/TubeBuddy for keyword checks	Verify search terms in YouTube search
Repurposing long → short	Opus Clip, Descript, CapCut auto-cut; Premiere Pro auto-reframe	Review every clip for context and claims
Captions/subtitles	Premiere Pro, CapCut, YouTube auto-captions	Fix drug names and numbers
Images and illustrations	Adobe Firefly (in Photoshop/Illustrator), Canva Magic Media	Label realistic images; no fake patients
Design layouts	Canva Magic Design, Adobe Express	Apply the brand kit
Voice-over	Adobe Podcast Enhance (cleanup); synthetic voices only with consent and disclosure	Never clone a provider's voice without written consent
Spanish drafts	DeepL, ChatGPT/Claude	Professional translator + medical review before posting
Comment triage	Meta Business Suite automated replies (FAQ only)	Never automate medical answers

31.3 The prompt template (copy this)

```
You are a social media writer for Ongo Weight Loss, a U.S. doctor-led online
weight-care brand. Rules:

- Ongo Weight Loss offers compounded semaglutide and tirzepatide only; they are
  NOT FDA-approved. Never say "same as", "generic" or name brand drugs as our product.
- No outcome promises, no pounds-lost claims, no prices unless I provide them.
- Never name the partner pharmacy. No patient details.
- Voice: warm, honest, plain English, body-respectful.
Task: Write 5 hook options and one Instagram caption (keyword first line,
value, one CTA, disclaimer line, 3–5 hashtags, no brand drug hashtags) for:
[topic]. Platform: [Instagram Reel].
```

> 🍛 **Desi analogy: naya intern**
>
> AI ek tez intern jaisa hai: kaam jaldi karta hai, lekin kabhi-kabhi aatmavishwas se galat baat bhi bol deta hai. **Intern ka kaam bina check kiye client ko nahi bhejte; AI ka bhi nahi.**

31.4 AI rules for Ongo Weight Loss

Rule	Why
Never paste patient information or private messages into AI tools	Privacy (HIPAA)
Every AI-assisted health claim gets human medical review	AI hallucinations
Label realistic synthetic people, voices or scenes	Platform rules; honesty
No AI "patients", reviews, testimonials or before/after	FTC rule (Chapter 30)
No AI doctors presented as real	Deception
Check copyright and use commercially safe tools for images	Legal risk
Keep a note of which posts used AI	Transparency and audit

31.5 Platform-specific AI tips

Platform	AI use
YouTube	Draft chapters from the transcript; title variations; translate subtitles (review)
Instagram	Carousel copy from a blog post; alt-text drafts; Reel caption variants
Facebook	Longer caption versions; FAQ auto-replies in Business Suite inbox
TikTok	Script hooks; caption keywords; check against TikTok rules manually
Pinterest	Pin title/description variations with keywords
LinkedIn	Turn a provider interview into a post draft for the provider to edit
Reddit	Research question clustering only; never auto-post

> 🟧 **Ongo Weight Loss example**
>
> You said AI content is fine where real images aren't useful. Good fits: illustrated explainers ("how GLP-1 affects appetite"), animated text carousels, food flat-lays made in Firefly (labelled if realistic), and Spanish subtitle drafts. Poor fits: anything showing patients, bodies, results or doctors. 🔵

31.6 Do's and Don'ts

✅ Do	❌ Don't
Paste rules into every prompt	Trust AI facts without checking
Use AI for drafts and repurposing	Publish AI drafts unreviewed
Label realistic synthetic media	Hide AI use in realistic content
Use commercially safe image tools	Generate look-alikes of real people

31.7 Pros and cons of AI in social media

✅ Pros	❌ Cons
Huge time savings	Hallucinated facts
More ideas and variants	Generic voice if not guided
Faster captions and translations	Legal and platform risks for realistic fakes

31.8 Where freshers go wrong in Chapter 31 topics

Mistake	Why it happens	Avoid it by	Fix it by
AI invents a study citation	Trusting output	Opening every source	Removing the claim
Pasting a patient DM into ChatGPT	Wanting a reply draft	Privacy rule	Deleting and reporting
Unlabelled realistic AI person	Not knowing the rules	Labelling rule	Adding the label

31.9 Thumb rules

👍 AI drafts, humans decide.

👍 Rules in every prompt; review on every health claim.

👍 Realistic synthetic = labelled synthetic.

31.10 Notes to remember

📝 Never put patient data into AI tools.

📝 Platforms require labels for realistic AI content.

Chapter 31 Glossary

Term	Simple meaning
LLM	Large language model (ChatGPT, Claude, Gemini)
Hallucination	Confident but false AI output
Prompt	Instructions given to an AI tool
Synthetic media	AI-generated or altered images, video or audio
Commercially safe	Licensed for business use

Chapter 31 Quiz

1. What should AI never receive?

- A) Topic ideas
- B) Public facts
- C) Brand voice examples
- D) Patient information

2. What's a hallucination?

- A) A hashtag
- B) A video effect
- C) A font
- D) Confident but false AI output

3. Must realistic AI people be labelled?

- A) Only if famous
- B) Only on Pinterest
- C) Yes
- D) No

4. Which tool helps repurpose long video into clips?

- A) Excel

- B) Calculator
- C) Opus Clip or Descript
- D) Notepad

5. Can AI create testimonials?

- A) Yes
- B) Never
- C) If short
- D) If positive

6. What must AI-assisted health claims get?

- A) More emojis
- B) Nothing
- C) A hashtag
- D) Human medical review

7. Which image tool is commercially safe and in your Adobe suite?

- A) Adobe Firefly
- B) Screenshots
- C) Random web downloads
- D) Competitor images

8. What goes into every prompt?

- A) Passwords
- B) Patient DMs
- C) Nothing
- D) Our compliance rules and voice

9. Can a provider's voice be cloned without consent?

- A) Yes
- B) For Shorts only
- C) If it sounds good
- D) Never

10. In the intern analogy, AI output should be…

- A) Ignored

- B) Sent directly
- C) Printed and framed
- D) Checked before it reaches anyone

LEVEL 4 · CHAPTER 32

Chapter 32: What We Can and Can't Say on Social

A one-page rulebook for captions, scripts, replies and creator briefs. When in doubt, check here before you post.

> 💡 **Trivia**
>
> The FDA's September 2025 letters to telehealth companies flagged phrases such as "Semaglutide (the same ingredient in Wegovy & Ozempic)", "GENERIC OZEMPIC/WEGOVY", "GENERIC MOUNJARO" and "clinically proven ingredients". [1] ● Industry (Holland & Knight)
>
> These are exactly the phrases people use in comments. We never repeat them.

32.1 The say / don't say table

Topic	✅ Say	❌ Don't say
What we offer	"Compounded semaglutide and tirzepatide, prescribed by licensed providers when appropriate"	"Ozempic", "Wegovy", "Mounjaro", "Zepbound" as our products
Approval status	"Compounded medications are not FDA-approved"	"FDA-approved semaglutide", "FDA-regulated pharmacy so it's approved"
Comparison to brands	"Contains the same active ingredient name, but compounded products are not the same as FDA-approved brands and haven't been reviewed the same way" (reviewed wording)	"Same as Ozempic", "generic Wegovy", "identical"
Effectiveness	"In clinical trials of brand semaglutide (e.g. STEP 1)..." with trial named	"Clinically proven", "you'll lose X lbs"

Topic	✅ Say	❌ Don't say
Eligibility	"A licensed provider decides if treatment is right for you"	"Guaranteed approval", "No consultation needed"
Speed	"Results take time and vary"	"Fast", "in 30 days", "melts fat"
Price	Prices exactly as on the website, with what's included	"Cheaper than Ozempic", outdated prices
Safety	"Common side effects include nausea... talk to your provider"	"No side effects", "100% safe"
Pharmacy	"A licensed U.S. compounding pharmacy"	The partner pharmacy's name
Insurance	"Self-pay; no insurance needed"	"Covered by insurance"
Bodies	"Health at every stage", "your goals"	Shaming, "fix your body", "bikini-ready"

32.2 Disclaimer library for social

Use	Line
General health post	"Educational only. Talk to your provider about your health."
Treatment post	"Compounded medications are not FDA-approved. A licensed provider decides whether treatment is appropriate."
Brand-trial results	"Results are from studies of [brand product]; compounded versions weren't studied in these trials."
Testimonial	"Shared with permission. Individual experiences vary."
Creator content	"#ad Paid partnership with Ongo Weight Loss" (plus the above)
Brand mention in education	"Ongo Weight Loss does not offer [brand name]."

> 🍛 **Desi analogy: cricket commentary**
>
> Commentator jo dekhta hai woh bolta hai: "Shot achha tha, lekin fielder ne pakad liya." Woh yeh nahi kehta "yeh shot hamesha chhakka hota hai." **Hum bhi sirf wahi kahenge jo sach hai aur saabit hai.**

32.3 Handling brand names in education

Brand names can appear only in **compliance-reviewed educational content**, never in our ads, hashtags, commercial titles or CTAs during the launch phase:

✅ Educational (after review)	❌ Commercial
A provider video titled "Compounded vs. FDA-Approved GLP-1 Medications" explaining the difference, mentioning brand names in context, with "Ongo Weight Loss does not offer [brand]"	"Get Wegovy-level results for less"
A carousel about what brand trials showed, trials named	#Ozempic on our Reels

32.4 The 60-second compliance check

☐	Question
☐	Any brand drug name? Educational and reviewed, or remove
☐	Any outcome, speed or guarantee language? Remove
☐	"Compounded" and "not FDA-approved" where treatment is mentioned?
☐	Price matches the website today?
☐	Partner pharmacy named? Remove
☐	Any patient identifiable? Remove (unless signed consent)
☐	Disclosure for creators/paid/gifted?
☐	Medical/legal reviewer signed off for clinical claims?

> 🟧 **Ongo Weight Loss example**
>
> "Can Ozempic Cause Cancer?" (YouTube) is an educational question many people search. Keep the topic only if a provider reviews it, the title is reframed ("GLP-1 Medications and Cancer Risk: What Research Says"), the description says "Ongo Weight Loss does not offer Ozempic", and the evidence is cited. Otherwise, unlist it. 🔵

32.5 Do's and Don'ts

✅ Do	❌ Don't
Use the say/don't-say table every time	Write claims from memory
Keep the disclaimer library handy	Improvise legal wording
Name trials when citing results	Borrow results for our product
Ask reviewers when unsure	Post and hope

32.6 Pros and cons of a strict rulebook

✅ Pros	❌ Cons
Fast, consistent decisions	Less creative freedom
Lower legal risk	Requires updates when rules change
Easy training	Some trends can't be used

32.7 Where freshers go wrong in Chapter 32 topics

Mistake	Why it happens	Avoid it by	Fix it by
Replying "Yes, it's the same as Ozempic!"	Wanting to be helpful	Reply templates	Editing/deleting the reply

Mistake	Why it happens	Avoid it by	Fix it by
Old prices in a pinned post	Prices changed	Monthly check	Updating
"FDA-registered pharmacy" phrased as "FDA-approved"	Confusing terms	Say/don't-say table	Correcting

32.8 Thumb rules

👍 Compounded, not FDA-approved, provider decides.

👍 Name the trial or don't cite the result.

👍 If it sounds like an ad for a brand drug, it's not ours to post.

32.9 Notes to remember

📝 FDA-flagged phrases: "same ingredient as Wegovy & Ozempic", "generic Ozempic/Wegovy/Mounjaro", "clinically proven ingredients".

📝 60-second compliance check before every post.

Chapter 32 Glossary

Term	Simple meaning
Claim	A statement about what a product does
Disclaimer	A statement limiting or clarifying a claim
Substantiation	Evidence that supports a claim
Commercial content	Content that promotes our services
Educational content	Content that informs without selling

Chapter 32 Quiz

1. Which phrase did the FDA flag?

- A) "Talk to your provider"
- B) "Results vary"
- C) "Generic Ozempic"
- D) "Educational only"

2. How should compounded drugs be described?

- A) FDA-approved
- B) Identical to brands
- C) Generic Wegovy
- D) Not FDA-approved

3. Can brand names appear in our hashtags?

- A) Only one
- B) No
- C) Yes
- D) Only on TikTok

4. How should trial results be cited?

- A) Name the brand product and trial; note compounded weren't studied
- B) Hide the source
- C) Round up
- D) Claim them for our product

5. What's the pharmacy line?

- A) "Our secret lab"
- B) "A licensed U.S. compounding pharmacy"
- C) Nothing at all
- D) Its brand name

6. Which is a safe eligibility line?

- A) "Everyone qualifies"
- B) "A licensed provider decides if treatment is right for you"
- C) "No consultation needed"

- D) "Guaranteed approval"

7. What's the creator disclosure?

- A) None
- B) "#ad Paid partnership with Ongo Weight Loss"
- C) "#collab" only
- D) "#sp"

8. What price can we show?

- A) "Cheaper than Ozempic"
- B) Last year's price
- C) Exactly as on the website today
- D) A guessed price

9. What should happen to "Can Ozempic Cause Cancer?" if not reviewed?

- A) Nothing
- B) Unlist it
- C) Add more brand names
- D) Promote it

10. In the commentary analogy, we only say...

- A) Nothing
- B) What sounds exciting
- C) What is true and proven
- D) What competitors say

LEVEL 4 · CHAPTER 33

Chapter 33: Platform Rules for Health and Weight-Loss Content

Every platform has its own rules for drugs, weight loss and body image. Breaking them doesn't just remove a post; it can stop the whole account from being recommended.

> 💡 **Trivia**
>
> Instagram says that if an account **repeatedly** breaks its Community Standards or Recommendation Guidelines, **none of its posts are eligible for recommendation for a period**. [1] 🟢 Official (Instagram)
>
> One careless post can cost every future post its reach.

33.1 Platform rules at a glance (organic content)

Platform	Drugs / prescriptions	Weight loss / body image	Our approach
Instagram & Facebook (Meta)	Buying/selling pharmaceuticals in posts is not allowed; regulated products are avoided in recommendations [1] 🟢	Weight-loss product and cosmetic procedure content restricted for under-18 users; "miraculous" claims linked to buying restricted 🟠	Education + brand info; no selling via posts/DMs; no miracle claims
TikTok	Prescription drugs are regulated substances; drug-discussion content is 18+ and **not eligible for the For You feed** [2] 🟢	No facilitating trade or marketing of weight-loss products (May 2024) [3] 🟠; strict disordered-eating rules	Food, movement and habits only
YouTube	Medical misinformation policy removes content contradicting health authorities on prevention/treatment; exceptions for educational context [4] 🟢	Harmful/dangerous content rules	Reviewed education with sources

Platform	Drugs / prescriptions	Weight loss / body image	Our approach
Pinterest	Weight-loss ads banned since 2021 [5] 🟠; body-neutral guidelines	Avoid body comparisons	Recipes and habits
LinkedIn	Professional community policies	—	Professional education
Reddit	Each subreddit's rules + Reddit content policy	Varies by community	Disclosed, helpful answers

Policies change often; check each platform's current guidelines quarterly and before campaigns. 🔵

> 🪔 **Desi analogy: alag-alag ghar, alag niyam**
>
> Kisi ke ghar joote bahar utaarte hain, kisi ke yahan nahi; kahin non-veg chalta hai, kahin nahi. Mehmaan wahi achha jo **har ghar ke niyam maane**. Har platform ek alag ghar hai.

33.2 Content that's risky everywhere

Content	Why
Before/after body comparisons	Body-image policies; FTC
Extreme calorie targets or fasting challenges	Disordered-eating policies
"Buy now / DM me for semaglutide"	Drug-sale policies
Medication shots with prices and sign-up codes	Promotion of prescription drugs
Misspelled drug names to dodge moderation	Policy evasion
Graphic injection close-ups	Sensitive content filters
Content aimed at teens	Youth safety rules

33.3 Age and audience settings

Platform	Setting
Instagram	Professional account; consider age-restricting branded content where available
YouTube	"Not made for kids"; age-restrict videos with graphic medical content
TikTok	Drug content automatically 18+; keep our TikTok content general
Facebook	Page age restrictions can be set (Settings → Page setup → age) for treatment content

33.4 If a post is removed or the account is restricted

Step	Action
1	Screenshot the notice; note the rule cited
2	Tell the team lead the same day
3	Check Account Status (Instagram: Settings → Account status) or YouTube Studio strikes
4	If the decision seems wrong, appeal calmly through the official process
5	If it was right, fix the pattern (rewrite similar posts), don't argue
6	Log it; review similar scheduled posts

> 🟧 **Ongo Weight Loss example**
>
> Before TikTok launch, the team lead and compliance review this chapter and approve a "TikTok-safe" topic list (food, movement, habits, provider day-in-the-life without patients). Meanwhile, check Instagram Account Status monthly, and age-restrict any YouTube injection demonstrations. 🔵

33.5 Do's and Don'ts

✅ Do	❌ Don't
Read each platform's rules quarterly	Assume rules are the same everywhere
Check Account Status monthly	Ignore warnings
Appeal politely with evidence	Repost removed content
Age-restrict sensitive medical videos	Target or attract teens

33.6 Pros and cons of conservative content

✅ Pros	❌ Cons
Account stays recommendable	Some topics are off-limits on some platforms
Fewer removals	Lower reach for treatment content
Trust with platforms and regulators	More planning per platform

33.7 Where freshers go wrong in Chapter 33 topics

Mistake	Why it happens	Avoid it by	Fix it by
Reposting a removed post	Thinking it was a mistake	Appeal process	Deleting the repost
Same treatment video everywhere	Repurposing habit	Platform table	Platform-specific versions
Ignoring Account Status	Not knowing it exists	Monthly check	Reviewing now

33.8 Thumb rules

👍 Every platform is a different house with different rules.

👍 Repeated breaks cost the whole account its reach.

👍 Treatment content: YouTube and Facebook/Instagram with care; never TikTok's For You.

33.9 Notes to remember

📝 TikTok: drug content 18+ and not FYF-eligible; no marketing of weight-loss products.

📝 Instagram: repeated violations → no recommendations for a period.

Chapter 33 Glossary

Term	Simple meaning
Community Standards / Guidelines	A platform's rules for content
Recommendation Guidelines	Rules for what can be suggested to non-followers
Account Status	Instagram's page showing violations and restrictions
Strike	A YouTube penalty for policy violations
Age restriction	Limiting content to adult viewers

Chapter 33 Quiz

1. What happens after repeated violations on Instagram?

- A) No recommendations for a period
- B) Nothing
- C) A verified badge
- D) More reach

2. Is TikTok drug-discussion content eligible for the For You feed?

- A) No
- B) Only on weekends
- C) Only with hashtags
- D) Yes

3. Since when has Pinterest banned weight-loss ads?

- A) Never
- B) 2026
- C) 2021
- D) 2010

4. What does YouTube's medical misinformation policy remove?

- A) Nothing
- B) All health content
- C) All recipes
- D) Content contradicting health authorities on prevention/treatment

5. Where do you check Instagram restrictions?

- A) The bio
- B) Settings → Account status
- C) Highlights
- D) Hashtags

6. Which content is risky everywhere?

- A) A sleep tip
- B) A recipe
- C) A walking tip
- D) "DM me for semaglutide"

7. What's step 1 if a post is removed?

- A) Delete the account
- B) Repost immediately
- C) Argue in comments
- D) Screenshot the notice and note the rule

8. How often should platform rules be checked?

- A) Only after bans
- B) Once in 10 years
- C) Quarterly and before campaigns
- D) Never

9. Which YouTube setting should be used?

- A) Private everything
- B) No setting
- C) "Made for kids"
- D) "Not made for kids"

10. In the alag-ghar analogy, a good guest…

- A) Changes the rules
- B) Follows only their own rules
- C) Ignores rules
- D) Follows each house's rules

LEVEL 4 · CHAPTER 34

Chapter 34: Privacy and HIPAA on Social Media

Social media is public by default. A friendly reply that confirms someone is a patient can be a privacy violation. Learn the rules before you answer a single comment.

> 💡 **Trivia**
>
> Health providers have been fined by the U.S. Department of Health and Human Services (HHS) for disclosing patient information **in replies to online reviews**, including a dental practice that paid **$10,000** in 2019 after responding to Yelp reviews with patient details. ● Industry (HHS OCR enforcement, widely reported)
>
> "Thanks for visiting, Jane, glad your treatment is going well!" is the kind of reply that causes these cases.

34.1 What counts as private health information on social

Example	Why it's sensitive
Confirming someone is (or was) an Ongo Weight Loss patient	Patient status itself is protected
Mentioning their medication, dose, symptoms or results	Health information
Sharing a screenshot of a DM or support chat	Identifiable + health details
Tagging a patient in a post without signed authorisation	Discloses relationship
Posting photos taken where patient info is visible (screens, papers)	Accidental disclosure

34.2 The golden reply rules

Rule	Example
Never confirm or deny that someone is a patient	❌ "Thanks for being a patient!" ✅ "Thanks for reaching out!"
Never discuss their treatment in public	❌ "Sorry your dose made you sick" ✅ "We're sorry to hear this. Please contact our care team so we can help."
Move to private, secure channels	Email/phone/portal, not Instagram DMs, for health matters
Don't ask for health details in DMs or comments	❌ "What's your weight and medication?"
Even if they shared it first	Their disclosure doesn't permit ours

> 🍛 **Desi analogy: doctor ka clinic aur mohalla**
>
> Mohalle mein koi aunty puchhe "Sharma ji kal clinic kyun gaye the?", toh doctor ka compounder kabhi nahi batata. Chahe Sharma ji khud sabko bata dein, **compounder ki zabaan band rehti hai.** Hamara social team wahi compounder hai.

34.3 DMs: what to do

Situation	Reply
General question ("How does it work?")	Answer generally + link to How It Works
Pricing question	Share website pricing link
"I'm a patient and..." (account, shipping, side effects)	"Thanks for reaching out. For your privacy, please contact our care team at [email/phone] or message us in your patient portal so we can help securely."
Medical emergency language	"If this is an emergency, call 911 now." + escalate (Chapter 36)
Someone shares photos or lab results	Don't engage with details; redirect; don't save or forward the images

34.4 Tracking and pixels

Rule	Detail
No Meta Pixel or TikTok Pixel on pages where health information is entered (portal, intake, eligibility)	Ongo Weight Loss currently has no Meta/TikTok pixels; any future plan needs compliance review
UTMs carry campaign info only	Never health terms or personal data in URLs (Book Four, Ch. 32)
Social analytics exports contain no patient data	Aggregate numbers only

34.5 Privacy checklist before posting

☐	Check
☐	No patient names, faces, voices or stories without signed authorisation
☐	No screens, papers or labels with patient info in photos or videos
☐	Replies don't confirm patient status
☐	No health details requested in comments/DMs
☐	DM screenshots never posted

> 🟧 **Ongo Weight Loss example**
>
> The Facebook page shows a phone number and email. If someone posts "My order hasn't arrived, I'm @ongo patient #..." in comments, hide the comment if it shows personal details, reply "We're sorry for the trouble. Please email our care team at [email] so we can help privately," and pass it to support. Never reply with order or treatment details. 🔵

34.6 Do's and Don'ts

✅ Do	❌ Don't
Use neutral replies that move conversations private	Confirm patient status

✅ Do	❌ Don't
Hide comments that expose someone's health details	Repeat their details in your reply
Train everyone who replies	Let untrained staff answer
Keep reply templates handy (Appendix E)	Improvise on sensitive topics

34.7 Pros and cons of strict privacy rules

✅ Pros	❌ Cons
Protects patients and the company	Replies can feel less personal
Avoids fines and complaints	Some users find redirects frustrating
Builds long-term trust	Needs training

34.8 Where freshers go wrong in Chapter 34 topics

Mistake	Why it happens	Avoid it by	Fix it by
"Glad your treatment is working, Maria!"	Friendliness	Golden rules	Editing the reply now
Asking for weight in DMs to "help"	Trying to assist	Templates	Redirecting to providers
Screenshot of a thank-you DM as a testimonial	Pride	Consent rule	Deleting

34.9 Thumb rules

👍 Never confirm, never discuss, always redirect.

👍 Their disclosure is not our permission.

👍 Health conversations belong in secure channels.

34.10 Notes to remember

📝 Patient status itself is protected information.

📝 No pixels on pages where health information is entered without compliance review.

Chapter 34 Glossary

Term	Simple meaning
HIPAA	U.S. law protecting health information
PHI	Protected health information
HHS OCR	The office that enforces HIPAA
Pixel	A tracking code from an ad platform
Authorisation	Written permission to use health information

Chapter 34 Quiz

1. Can we confirm someone is a patient in a reply?

- A) If they asked
- B) Yes
- C) Never
- D) If they're happy

2. If a user shares their health details first, can we repeat them?

- A) Only on Facebook
- B) Yes
- C) Only with emojis
- D) No

3. Where should health matters move?

- A) Instagram DMs with details
- B) Nowhere
- C) Public comments
- D) Secure channels (care team email/phone/portal)

4. What did a dental practice pay HHS in 2019 for review replies?

- A) $0
- B) $1 million
- C) $10,000
- D) $10

5. What should we do with comments exposing personal health details?

- A) Hide them and redirect privately
- B) Pin them
- C) Reply with more details
- D) Share them

6. Which reply is safe?

- A) "What's your weight?"
- B) "Sorry your dose made you sick, Jane."
- C) "Thanks for reaching out! Please contact our care team so we can help."
- D) "Thanks for being a patient!"

7. Are Meta/TikTok pixels currently on the site?

- A) Yes, everywhere
- B) Only in the portal
- C) No
- D) Unknown forever

8. What if a DM mentions an emergency?

- A) Reply later
- B) Ignore it
- C) Advise calling 911 and escalate
- D) Ask for a photo

9. Can we post DM screenshots as testimonials?

- A) No (without signed consent)
- B) Yes
- C) Only on Stories
- D) If blurred slightly

10. In the compounder analogy, the social team…

- A) Confirms visits
- B) Shares gossip
- C) Keeps patient matters private
- D) Posts files

Sources

1. HHS, HIPAA for professionals 🟢
2. Ongo Weight Loss, Book Four, Chapters 32 and 35 (no PHI in URLs or analytics), internal 🔵

Answer key, Chapter 34: 1-C · 2-D · 3-D · 4-C · 5-A · 6-C · 7-C · 8-C · 9-A · 10-C

LEVEL 4 · CHAPTER 35

Chapter 35: Community Management and Replies

Posting is half the job. The other half is replying: to questions, praise, complaints, trolls and spam. How we reply decides whether people trust us.

> 💡 **Trivia**
>
> Instagram says that on Feed and Stories, how likely you are to **comment on, like, reshare or tap the profile** of an account are among the most important signals in ranking. Conversations make an account more visible. [1] 🟢 Official (Instagram)
>
> Every good reply is also a small ranking signal.

35.1 The five comment types and what to do

Type	Example	Action	Time target
Question	"How much does it cost?"	Answer + link (template)	Within 4 business hours
Praise	"Love this recipe!"	Thank + small add-on ("Try it with Greek yogurt too!")	Same day
Complaint	"Still waiting for my order"	Empathise publicly, move private (Chapter 34)	Within 2 business hours
Medical / emergency	"I've been vomiting for 2 days"	"Please contact your provider or call 911 if urgent" + escalate	Immediately
Troll / spam / scam	"DM me for cheap Ozempic 💉"	Hide/delete, block spam accounts, report scams	Same day

> 🍛 **Desi analogy: restaurant ka manager**
>
> Achha manager har table pe jaata hai: "Khana kaisa tha?" Shikayat ho toh table pe behas nahi, kitchen mein le jaake sulajhata hai. Aur jo bahar khade hokar "sasta khana yahan" chillaaye, use politely bahar karta hai. **Comment section hamara restaurant floor hai.**

35.2 Reply rules

Rule	Why
Reply as the brand, warmly, in plain English (or Spanish if they wrote in Spanish, using reviewed templates)	Consistency
Never argue; correct misinformation once, politely, with a source	Arguments spread negativity
Never confirm patient status or discuss treatment (Chapter 34)	Privacy
Never give personal medical advice	Liability
Never use brand drug names in replies, even if they did	Compliance
Sign off as the team, not an individual name, unless it's an approved provider	Accountability
Like and reply to good comments; pin the most helpful one	Engagement

35.3 Moderation settings (set these up first)

Platform	Setting
Instagram	Settings → Hidden words → turn on hiding offensive comments + custom words list (e.g. "cheap ozempic", "dm me", "telegram", "whatsapp me", "crypto")
Facebook	Page → Professional dashboard → Moderation assist / Page moderation → blocked keywords and profanity filter
YouTube	Studio → Settings → Community → Blocked words; hold potentially inappropriate comments for review
TikTok	Settings → Privacy → Comments → filter keywords and spam

Platform	Setting
LinkedIn	Manage comments manually; turn off comments on sensitive posts if needed

The starter blocked-word list is in Appendix E. Review it monthly; scammers change spellings. 🔵

35.4 Scam and impersonation alerts

Weight-loss brands are prime targets for fake accounts selling "discount GLP-1s".

Signal	Action
A copycat account using our logo	Report impersonation through the platform's form; post a pinned warning if it's widespread
Comments "DM this account for cheaper semaglutide"	Delete, block, report
Fake "Ongo Weight Loss support" offering refunds	Warn followers: "We'll never ask for payment in DMs"

35.5 The weekly community routine

Day	Task	Time
Daily (2×)	Check comments and DMs on all platforms; reply/hide/escalate	20–30 min
Weekly	Review the comment log for FAQs → content ideas	30 min
Weekly	Engage on others' content (Chapter 27)	30 min
Monthly	Update hidden/blocked words; review reply templates	30 min

> 🟧 **Ongo Weight Loss example**
>
> On YouTube, Ongo Weight Loss's most-watched videos (like "GLP-1 & Lipedema") attract questions. Reply to the top 10 comments on the top 5 videos this week using templates; pin one helpful answer per video; hide "brand-name for sale" spam. Track common questions in the comment log. 🔵

35.6 Do's and Don'ts

✅ Do	❌ Don't
Reply quickly and kindly	Leave questions unanswered for days
Move complaints to private channels	Argue publicly
Hide scams and protect followers	Delete honest criticism
Log FAQs for content ideas	Reply with brand drug names

35.7 Pros and cons of active community management

✅ Pros	❌ Cons
Better ranking signals	Takes daily time
Builds trust and loyalty	Needs training and templates
Free content ideas	Risk of mistakes without rules

35.8 Where freshers go wrong in Chapter 35 topics

Mistake	Why it happens	Avoid it by	Fix it by
Deleting every negative comment	Fear	Complaint process	Restoring honest ones; replying
Arguing with a troll	Ego	One polite correction rule	Stopping; hiding if abusive
Not setting keyword filters	Not knowing	Setup checklist	Adding them today

35.9 Thumb rules

👍 Thank praise, answer questions, move complaints private, escalate emergencies, hide scams.

👍 Correct once, politely, with a source; then stop.

👍 Every repeated question is a content idea.

35.10 Notes to remember

📝 Reply-time targets: complaints 2 hrs, questions 4 hrs (business hours).

📝 Update blocked words monthly.

Chapter 35 Glossary

Term	Simple meaning
Community management	Replying to and moderating your audience
Hidden words	Instagram's filter for unwanted comments
Impersonation	A fake account pretending to be us
Pin	Keep a comment at the top
Comment log	A record of common questions and issues

Chapter 35 Quiz

1. What's the action for "DM me for cheap Ozempic"?

- A) Reply with prices
- B) Hide/delete, block and report
- C) Like it

- D) Pin it

2. What's the complaint reply approach?

- A) Ignore it
- B) Empathise publicly, move private
- C) Share their order details
- D) Argue publicly

3. What's the reply-time target for complaints?

- A) Within a month
- B) Within 2 business hours
- C) Never
- D) Within 2 weeks

4. Where are Instagram comment filters?

- A) Highlights
- B) The bio
- C) The grid
- D) Settings → Hidden words

5. How should misinformation be corrected?

- A) Never
- B) Repeatedly and angrily
- C) By deleting all comments
- D) Once, politely, with a source

6. What does Instagram treat as important ranking signals?

- A) Post length
- B) Likelihood to comment, like, reshare, tap profile
- C) Font choice
- D) Hashtag count

7. What's a medical emergency reply?

- A) Contact your provider or call 911 if urgent, then escalate
- B) Medical advice in comments
- C) A meme

- D) Nothing

8. What should happen to honest negative comments?

- A) Report them
- B) Delete them
- C) Block the person
- D) Reply helpfully; don't delete

9. How often should blocked words be updated?

- A) Never
- B) Every 5 years
- C) Monthly
- D) Hourly

10. In the restaurant-manager analogy, complaints are…

- A) Settled in the kitchen, not argued at the table
- B) Posted on the menu
- C) Ignored
- D) Shouted about

Sources

1. Instagram, Instagram Ranking Explained (May 31, 2023) 🟢
2. Ongo Weight Loss, social audit, October 2026 (internal) 🔵

Answer key, Chapter 35: 1-B · 2-B · 3-B · 4-D · 5-D · 6-B · 7-A · 8-D · 9-C · 10-A

LEVEL 4 · CHAPTER 36

Chapter 36: Crisis, Misinformation and Adverse Events

One angry viral post, a regulatory headline or a patient reporting a serious side effect in the comments. This chapter tells you exactly who to call and what not to say in the first hour.

> 💡 **Trivia**
>
> In September 2025 the FDA and HHS announced action against misleading drug advertising, including telehealth companies' compounded GLP-1 claims; thousands of letters were reported across the industry. [1] ● Industry (Holland & Knight)
>
> When regulators make headlines, every weight-loss brand's comment section fills with questions within hours.

36.1 Severity levels

Level	Example	Who leads	First response time
1 · Low	A single rude comment; one negative review	Social team	Same day
2 · Medium	A complaint gaining traction; misinformation thread; impersonation	Team lead	2 hours
3 · High	A possible adverse event; regulatory news about compounded GLP-1s; media inquiry; a viral negative post	Team lead + medical + legal (+ clinical author/doctor on call)	1 hour
4 · Critical	Data breach; legal action; FDA/FTC letter to us	Leadership + legal	Immediately; pause all scheduled posts

36.2 Adverse events (side effects) on social

When someone says they had a side effect after treatment, it may need to be **reported and handled clinically**.

Step	Action
1	Don't discuss details publicly; don't confirm patient status
2	Reply: "We're sorry to hear you're unwell. Please contact your provider right away, or call 911 if it's an emergency. Our care team can help at [contact]."
3	Screenshot and send to the team lead + clinical author/doctor immediately (internal secure channel only)
4	Clinical team decides on outreach and any reporting (e.g. FDA MedWatch)
5	Log the event; don't delete the comment unless it exposes personal data (hide instead)

> 🪔 **Desi analogy: shaadi mein bijli chali gayi**
>
> Shaadi mein bijli jaaye toh sab chillaate nahi; ek aadmi generator chalaata hai, ek mehmaanon ko shaant karta hai, ek electrician ko phone karta hai. **Har kisi ka role pehle se tay ho, tabhi crisis sambhalta hai.**

36.3 The first-hour crisis checklist

☐	Action
☐	Pause scheduled posts on all platforms (Meta Business Suite, YouTube Studio, scheduler)
☐	Screenshot everything (posts, comments, URLs, times)
☐	Inform the team lead; they decide the level
☐	Don't reply beyond a holding statement until approved
☐	Holding statement (approved template): "We're aware and looking into this. We'll share an update soon. Patients with questions can contact our care team at [contact]."
☐	Monitor mentions and comments every 30 minutes

☐	Action
☐	Prepare an FAQ with medical and legal review

36.4 Misinformation: correct or ignore?

Situation	Action
A false claim on our post, few views	Correct once, politely, with a source
A false claim on our post, spreading	Pin a reviewed correction; hide abusive replies
A viral false claim elsewhere about GLP-1s	Consider an educational post or video (reviewed), not a reply war
A false claim about Ongo Weight Loss specifically	Team lead + legal decide
Dangerous advice ("double your dose")	Hide; reply "Please don't change your dose without your provider"

36.5 Regulatory news playbook

When there's news about compounded GLP-1s (shortages, FDA actions, court cases):

Do	Don't
Wait for the team lead's approved message	Post opinions or predictions
Point patients to the care team	Promise supply or prices
Prepare reviewed FAQ content	Criticise regulators or competitors
Pause promotional posts for 24–48 hours if tone-deaf	Keep posting "Start today!" during bad news

> 🟧 **Ongo Weight Loss example**
>
> Store a crisis contact sheet (team lead, medical reviewer, legal reviewer, clinical author/doctor emergency contact, platform support links) in the shared drive, plus three pre-approved holding statements. Practise one tabletop drill per quarter: "A patient posts a serious side effect on our Instagram Reel." 🔵

36.6 Do's and Don'ts

✅ Do	❌ Don't
Pause scheduled posts in a crisis	Post business-as-usual content
Use approved holding statements	Improvise legal or medical statements
Escalate adverse events immediately	Discuss symptoms publicly
Screenshot and log	Delete evidence

36.7 Pros and cons of a crisis plan

✅ Pros	❌ Cons
Fast, calm response	Needs regular updates
Fewer mistakes under pressure	Drills take time
Patient safety first	—

36.8 Where freshers go wrong in Chapter 36 topics

Mistake	Why it happens	Avoid it by	Fix it by
Replying "That's a normal side effect!"	Trying to reassure	Adverse-event steps	Editing; escalating
Deleting a viral complaint	Panic	Severity levels	Restoring; holding statement
Scheduled promo post during bad news	Forgetting the queue	First-hour checklist	Pausing now

36.9 Thumb rules

👍 Pause, screenshot, escalate, hold.

👍 Side effects go to clinicians, not comment threads.

👍 In bad news, silence beats tone-deaf promotion.

36.10 Notes to remember

📝 Levels 3–4 need team lead + medical + legal; first response within 1 hour.

📝 Practise one crisis drill per quarter.

Chapter 36 Glossary

Term	Simple meaning
Adverse event	A harmful or unwanted effect after treatment
MedWatch	FDA's system for reporting adverse events
Holding statement	A short, safe first response while facts are checked
Escalation	Passing an issue to someone with more authority
Tabletop drill	A practice run of a crisis scenario

Chapter 36 Quiz

1. What's the first step in a crisis?

- A) Pause scheduled posts and screenshot
- B) Delete everything
- C) Post a meme
- D) Argue

2. Who leads a Level 3 issue?

- A) Team lead + medical + legal
- B) Nobody
- C) Followers
- D) The newest intern

3. What's the reply to a side-effect comment?

- A) Contact your provider / 911 if emergency, plus care team contact
- B) Dosing advice
- C) "That's normal"
- D) Ignore it

4. Should side-effect comments be deleted?

- A) Pin them
- B) Yes, always
- C) No; hide only if personal data is exposed
- D) Share them

5. What's FDA's adverse-event reporting system?

- A) Studio
- B) Watchlist
- C) Hashtag Watch
- D) MedWatch

6. What should happen to promotional posts during bad news?

- A) Nothing
- B) Increase them
- C) Pause for 24–48 hours if tone-deaf
- D) Add discounts

7. What's a holding statement?

- A) A short, safe first response
- B) A long legal essay
- C) A meme
- D) A price list

8. How should dangerous advice like "double your dose" be handled?

- A) Hide and reply "don't change your dose without your provider"
- B) Ignore it
- C) Pin it
- D) Like it

9. How often should crisis drills happen?

- A) Quarterly
- B) Every 10 years
- C) Daily
- D) Never

10. In the wedding power-cut analogy, crisis works when…

- A) Everyone shouts
- B) The guests leave
- C) Everyone's role is set in advance
- D) Nobody acts

LEVEL 4 · CHAPTER 37

Chapter 37: The Social Media Toolkit (Free and Owned)

You already own a professional design suite. Add a few free schedulers and analytics tools, and you can run every platform without a paid social tool.

> 💡 **Trivia**
>
> Free plans in 2026: **Buffer** allows 3 channels and 10 scheduled posts per channel; **Metricool** allows 1 brand and 20 posts per month (no LinkedIn or X on free); **Publer** allows 3 accounts and 10 scheduled posts each; **TikTok's web scheduler** lets you schedule up to 10 days ahead. [1] ● Industry (post-bridge, October 2026)
>
> Native tools (Meta Business Suite, YouTube Studio, LinkedIn) are free and unlimited for their own platforms.

37.1 Owned tools and what to use them for

Tool	Use for
Photoshop	Thumbnails, photo editing, Firefly generative fill (labelled)
Illustrator	Icons, infographics, brand templates
Premiere Pro	Long videos, Shorts/Reels editing, auto-captions, auto-reframe
Audition	Audio cleanup for voice-overs and interviews
After Effects	Motion graphics, animated text, intros
Canva (with AI)	Fast carousels, Stories, Pins, templates, Brand Kit, Magic Resize

37.2 Free scheduling and batching tools

Tool	Free plan (2026)	Best for
Meta Business Suite	Free, unlimited for Facebook + Instagram	Main scheduler for FB/IG; inbox
YouTube Studio	Free	Schedule videos and Shorts
TikTok web	Schedule up to 10 days ahead	TikTok
LinkedIn native	Schedule on the post composer	LinkedIn
Pinterest native	Schedule Pins in the Pin builder	Pinterest
Buffer	3 channels, 10 posts per channel	Cross-platform backup
Metricool	1 brand, 20 posts/month; analytics	Analytics + light scheduling
Publer	3 accounts, 10 posts each	Backup scheduling

Free plans change often. Check each tool's pricing page before relying on it. 🔵

> 🍛 **Desi analogy: tiffin service**
>
> Ghar ki aunty Sunday ko poore hafte ki sabzi kaat ke rakh deti hai, roz sirf tadka lagaana hota hai. **Batching yahi hai:** ek din mein hafte bhar ka content banao, schedule karo; roz sirf replies ka tadka.

37.3 The batching day

Hour	Task
1	Pick the week's topics from the content calendar and comment log
2–3	Write captions/scripts (AI draft + human edit)
4–5	Design graphics in Canva/Adobe; edit 3–5 Shorts/Reels from one long video
6	Compliance check; send to reviewers
7	Schedule approved posts in native tools/schedulers with UTMs

37.4 Free research and analytics tools

Tool	Use
YouTube Studio Analytics	Views, CTR, retention, traffic sources, search terms
Meta Business Suite Insights	Reach, engagement, followers for FB/IG
TikTok Analytics (business account)	Views, watch time, followers
Pinterest Analytics + Pinterest Trends	Impressions, saves, outbound clicks; seasonal trends
Google Analytics 4	Social sessions, engagement, conversions by UTM
Google Search Console	Whether social activity lines up with brand search growth
Google Trends	Topic and seasonal interest
Answer the Public / AlsoAsked (free tiers)	Question ideas
vidIQ / TubeBuddy (free tiers)	YouTube keyword ideas
Meta Ad Library	View competitors' active ads (research only; no paid activity)
Google Alerts	Brand and competitor mentions

37.5 Collaboration and storage

Tool	Use
Google Drive / SharePoint	Asset library: raw footage, final files, consent forms (restricted folder)
Google Sheets	Content calendar, comment log, UTM builder, KPI tracker
Shared password manager (company-approved)	Platform logins with 2FA (Chapter 19)
Trello/Asana/Sheets	Approval workflow (Chapter 38)

> 🟧 **Ongo Weight Loss example**
>
> Recommended stack: Meta Business Suite (FB/IG) + YouTube Studio + Pinterest native + Canva Brand Kit + Premiere Pro for Shorts + Metricool free for cross-platform analytics + GA4 for site visits. Total new cost: **$0**. 🔵

37.6 Do's and Don'ts

✅ Do	❌ Don't
Use native schedulers first	Pay for tools before you need them
Batch content weekly	Create posts daily at the last minute
Keep assets organised and named	Store consent forms in public folders
Re-check free-plan limits quarterly	Assume limits never change

37.7 Pros and cons of a free-tools stack

✅ Pros	❌ Cons
Zero cost	Multiple logins and dashboards
Native tools get new features first	Limited cross-platform reporting
Enough for 3–5 platforms	Post limits on third-party free plans

37.8 Where freshers go wrong in Chapter 37 topics

Mistake	Why it happens	Avoid it by	Fix it by
Hitting a free-plan post limit mid-week	Not checking limits	Native tools first	Moving posts to native schedulers

Mistake	Why it happens	Avoid it by	Fix it by
Final files named "final_final2.mp4"	No naming rule	Naming convention (date_platform_topic)	Renaming
Logging into tools with personal accounts	Convenience	Company accounts	Transferring ownership

37.9 Thumb rules

👍 Native first, free second, paid last.

👍 Batch once, reply daily.

👍 One asset library, one naming rule.

37.10 Notes to remember

📝 Meta Business Suite and YouTube Studio are free and unlimited for their platforms.

📝 Naming: YYYY-MM-DD_platform_topic_v1.

Chapter 37 Glossary

Term	Simple meaning
Scheduler	A tool that publishes posts at set times
Batching	Creating many pieces of content in one session
Native tool	A platform's own tool
Asset library	Organised storage for media files
Brand Kit	Saved logos, colours and fonts in Canva

Chapter 37 Quiz

1. What's the best free scheduler for Facebook and Instagram?

- A) Excel
- B) A paid tool only
- C) Notepad
- D) Meta Business Suite

2. How far ahead can TikTok's web scheduler schedule?

- A) It can't
- B) Up to 10 days
- C) 1 hour
- D) 1 year

3. What does Buffer's free plan allow?

- A) Unlimited everything
- B) 3 channels, 10 posts per channel
- C) Nothing
- D) 100 channels

4. What's batching?

- A) Buying followers
- B) Posting daily at random
- C) Creating a week's content in one session
- D) Deleting posts

5. Which tool shows social sessions on the website?

- A) Photoshop
- B) Canva
- C) Audition
- D) Google Analytics 4

6. Which owned tool is best for audio cleanup?

- A) Excel
- B) After Effects
- C) Audition

- D) Illustrator

7. What's the naming convention?

- A) Random
- B) final_final2
- C) Untitled
- D) YYYY-MM-DD_platform_topic_v1

8. What should be used first?

- A) Paid tools
- B) Nothing
- C) Personal accounts
- D) Native tools

9. What can Meta Ad Library be used for here?

- A) Replying
- B) Posting
- C) Research only (no paid activity)
- D) Running ads

10. In the tiffin analogy, daily work is…

- A) Only the tadka (replies)
- B) Ordering out
- C) Cooking everything again
- D) Skipping meals

Sources

1. post-bridge, free social media scheduling tools comparison (October 15, 2026)
2. Ongo Weight Loss, owned-tools list, October 2026 (internal)

Answer key, Chapter 37: 1-D · 2-B · 3-B · 4-C · 5-D · 6-C · 7-D · 8-D · 9-C · 10-A

LEVEL 4 · CHAPTER 38

Chapter 38: Workflow and Approvals

A health brand can't post on impulse. This chapter sets up the weekly pipeline from idea to published post, with the "full check" from the team lead and the medical and legal reviewers.

> 💡 **Trivia**
>
> The FTC says that if an advertiser's influencer makes a claim the advertiser couldn't prove itself, **both** can be responsible. Health claims need proof before they're posted. [1] 🟢 Official (FTC)
>
> An approval workflow is how we make sure the proof exists before the post does.

38.1 Roles (RACI)

Task	Social media lead (you)	Designer / editor / writer	SEO	Team lead	Medical reviewer	Legal reviewer
Content calendar	**R** (responsible)	C (consulted)	C	**A** (approves)	I (informed)	I
Captions, scripts	**R**	C	C (keywords)	A	C	C
Design, video	A	**R**	—	I	—	—
Clinical claims check	I	—	—	I	**R/A**	C
Legal/compliance check	I	—	—	I	C	**R/A**

Task	Social media lead (you)	Designer / editor / writer	SEO	Team lead	Medical reviewer	Legal reviewer
Final publish approval	R	—	—	**A**	—	—
Replies (templated)	**R/A**	—	—	I	—	—
Replies (new or sensitive)	R	—	—	**A**	C	C
Crisis	R	—	—	**A**	C	C

38.2 Which content needs which review

Content type	Team lead	Medical	Legal
Food, movement, habits (no claims)	✅	—	—
Anything mentioning treatment, medications, side effects	✅	✅	✅
Prices, offers, eligibility	✅	—	✅
Testimonials, UGC, creator content	✅	✅	✅
Brand names in education	✅	✅	✅
Holiday/trend posts (no claims)	✅	—	—
New reply templates	✅	✅ (if medical)	✅

> 🍛 **Desi analogy: IT office ka code review**
>
> IT office mein koi developer seedha production pe code push nahi karta. Pehle peer review, phir QA, phir manager ka sign-off. **Health content bhi production code hai:** bina review push kiya toh bug patients tak pahunchega.

38.3 The weekly pipeline

Day	Stage	Output
Monday	Plan: pick topics from calendar, comment log, trends	Brief per post (topic, pillar, platform, CTA, UTM)
Tuesday	Create: scripts, captions, designs, edits	Drafts in the review folder
Wednesday	Review: team lead + medical/legal as needed	Comments; "approved" or "changes"
Thursday	Fix and schedule	Scheduled posts with UTMs
Friday	Report and learn	Weekly numbers; next week's ideas
Daily	Community management (Chapter 35)	Replies, escalations

Allow **3–5 business days** for medical/legal review; plan clinical content two weeks ahead. 🔵

38.4 The content brief (one per post)

Field	Example
Date / platform / format	Oct 30 · Instagram · Carousel
Pillar	Eat Well
Topic and angle	"5 high-protein breakfasts under 10 minutes"
Hook	"Breakfast in 10 minutes, 25 g protein"
Caption draft	(link to doc)
CTA	Save + link in bio to blog post
URL + UTM	`/blog/high-protein-breakfast?utm_source=instagram&utm_medium=social&utm_campaign=eat_well_oct26`
Review needed	Team lead only

Field	Example
Status	Draft → In review → Approved → Scheduled → Live

38.5 Approval log (keep it)

Post ID	Version	Reviewer	Decision	Date	Notes
IG-2026-10-30-01	v2	Team lead	Approved	2026-10-28	—
YT-2026-11-04-01	v3	Medical	Changes	2026-10-29	Remove "fast"

The log protects everyone: it shows what was approved, by whom, and when. 🔵

> **🟧 Ongo Weight Loss example**
>
> You confirmed the team lead approves, with a "full check" from the medical and legal reviewers. In practice: use one shared Google Sheet with tabs for Briefs, Approval Log and Comment Log; reviewers comment in Google Docs; nothing is scheduled until its row says "Approved". 🔵

38.6 Do's and Don'ts

✅ Do	❌ Don't
Plan clinical content two weeks ahead	Ask for same-day medical review
Keep an approval log	Rely on chat messages as approval
Re-approve if wording changes after review	Edit approved posts without re-review
Batch reviews weekly	Send reviewers one post at a time all day

38.7 Pros and cons of a formal workflow

✅ Pros	❌ Cons
Fewer compliance mistakes	Slower for trends
Clear ownership	Admin overhead
Records for audits	Needs reviewer availability

Tip for trends: keep a pre-approved bank of "no-claims" trend formats and captions so you can move fast without new review.

38.8 Where freshers go wrong in Chapter 38 topics

Mistake	Why it happens	Avoid it by	Fix it by
Changing a caption after approval	Small tweak feels harmless	Re-approval rule	Re-submitting
"Approved on WhatsApp" with no record	Speed	Approval log	Logging it
Missing review for a "harmless" side-effect tip	Underestimating claims	Review table	Pulling and reviewing

38.9 Thumb rules

👍 Treatment, prices, testimonials = team lead + medical + legal.

👍 No "Approved" row, no schedule.

👍 Changed after approval = not approved.

38.10 Notes to remember

📝 Allow 3–5 business days for medical/legal review.

📝 Status flow: Draft → In review → Approved → Scheduled → Live.

Chapter 38 Glossary

Term	Simple meaning
RACI	Responsible, Accountable, Consulted, Informed
Content brief	A one-page plan for a post
Approval log	A record of who approved what and when
Pipeline	The stages content passes through
Pre-approved bank	Content formats that don't need new review

Chapter 38 Quiz

1. Who gives final publish approval?

- A) The designer
- B) A follower
- C) Nobody
- D) The team lead

2. What needs medical and legal review?

- A) A holiday greeting with no claims
- B) Anything mentioning treatment or medications
- C) A walking tip
- D) A recipe without claims

3. How long should be allowed for medical/legal review?

- A) 3 months
- B) 3–5 business days
- C) None
- D) 5 minutes

4. What happens if wording changes after approval?

- A) Post anyway
- B) Nothing
- C) Delete the log
- D) Re-approval is needed

5. What does the "A" in RACI mean?

- A) Always
- B) Algorithm
- C) Accountable
- D) Audience

6. Which is valid proof of approval?

- A) Memory
- B) A guess
- C) A WhatsApp emoji
- D) A row in the approval log

7. What day does the pipeline review content?

- A) Sunday only
- B) Never
- C) Wednesday
- D) After posting

8. What helps with fast trends?

- A) Copying competitors
- B) Skipping review for claims
- C) A pre-approved bank of no-claims formats
- D) Posting brand names

9. Who can be responsible for an influencer's unproven claim?

- A) Only the follower
- B) Nobody
- C) Both advertiser and influencer
- D) Only the platform

10. In the code-review analogy, health content is…

- A) A draft nobody reads
- B) Optional
- C) A joke
- D) Production code that needs review

Sources

2. Ongo Weight Loss, approval process (team lead + medical/legal reviewers), October 2026 (internal) 🔵

Answer key, Chapter 38: 1-D · 2-B · 3-B · 4-D · 5-C · 6-D · 7-C · 8-C · 9-C · 10-D

LEVEL 4 · CHAPTER 39

Chapter 39: Metrics per Platform: All Metrics vs. Metrics That Matter

Every platform shows you dozens of numbers. A few of them predict growth and business results; the rest are for context. This chapter lists both, platform by platform.

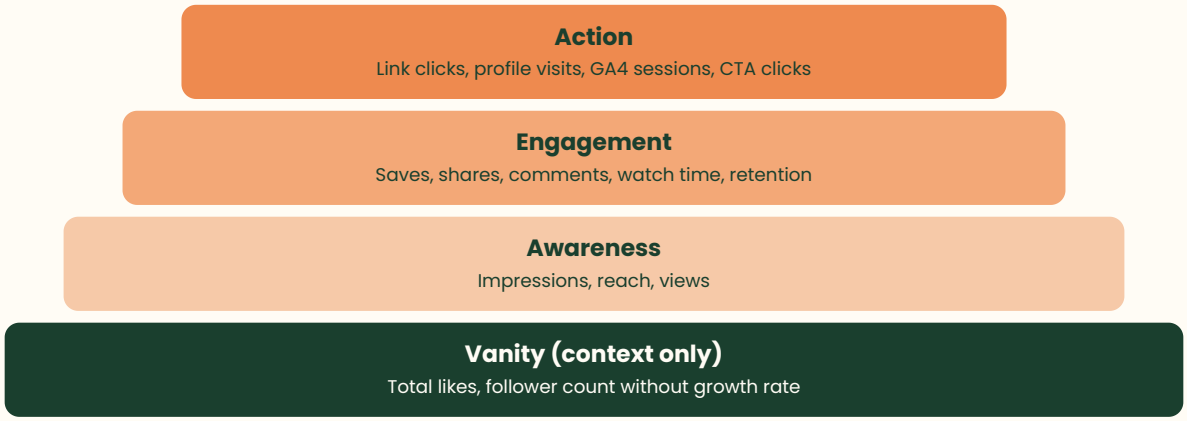

> 💡 **Trivia**
>
> YouTube says its recommendations aim for viewer **satisfaction, not just watch time**, using surveys, likes, dislikes and "not interested" feedback. [1] ● Official (YouTube)
>
> That's why "views" alone is never the whole story.

39.1 Three kinds of metrics

Kind	What it tells you	Examples
Awareness (are people seeing us?)	Reach and visibility	Impressions, reach, views
Engagement (do they care?)	Quality of attention	Saves, shares, comments, watch time, retention
Action (do they come to us?)	Business value	Link clicks, profile visits, website sessions, conversions
Vanity (feels good, predicts little alone)	Context only	Total likes, follower count without growth rate, video views without retention

> 🍛 **Desi analogy: cricket scorecard**
>
> Sirf "total runs" dekh ke match nahi samajhta. Strike rate, kitni balls, kis situation mein bane, sab dekhna padta hai. **Impressions "total runs" hain; saves, shares aur clicks "strike rate".**

The Metrics Ladder

Now: awareness. Next: engagement. Later: action.

39.2 Our KPI stages (as agreed)

Stage	Primary KPI	Secondary
Now (months 1–3)	Impressions / reach	Posting consistency, follower growth rate
Next (months 4–6)	Engagement rate, saves, shares, watch time	Comments, profile visits
Later (6+ months)	Website sessions from social (GA4), engaged sessions, CTA clicks	Eligibility starts attributed to social

39.3 YouTube

All metrics (Studio)	⭐ Metrics that matter	Why
Views, watch time, subscribers, impressions, impressions CTR, average view duration, average % viewed, retention curve, unique viewers, returning viewers, traffic sources, search terms, likes, dislikes, comments, shares, end-screen clicks, card clicks, Shorts "viewed vs swiped away"	**Impressions CTR**, **average % viewed**, **retention at 30 s**, **returning viewers**, **YouTube search traffic share**, **Shorts viewed vs swiped away**	Packaging, satisfaction and search demand predict growth

39.4 Instagram

All metrics (Insights)	⭐ Metrics that matter	Why
Views, reach, accounts reached, interactions, likes, comments, saves, shares, profile activity, profile visits, external link taps, follows, Reels plays, average watch time, skip rate, Stories exits/replies/taps forward	**Shares (sends)**, **saves**, **Reels average watch time / skip rate**, **non-follower reach %**, **link taps**	Instagram ranks on likelihood to reshare, watch through and engage

39.5 Facebook

All metrics	⭐ Metrics that matter	Why
Views, reach, interactions, reactions, comments, shares, link clicks, follows, video 3-second views, 1-minute views, average watch time, Page visits, messages	**Shares**, **link clicks**, **1-minute views**, **meaningful comments**	Facebook is our referral-friendly platform for the 30–64 audience

39.6 TikTok (when launched)

All metrics	⭐ Metrics that matter	Why
Video views, profile views, likes, comments, shares, followers, total play time, average watch time, watched full video %, traffic source (For You, Following, search, profile), viewer demographics	**Watched full video %**, **average watch time**, **shares**, **search traffic %**	Completion is a strong TikTok signal

39.7 Pinterest

All metrics	⭐ Metrics that matter	Why
Impressions, engagements, Pin clicks, outbound clicks, saves, total audience, engaged audience, video views	**Outbound clicks**, **saves**, **outbound click rate**	Pinterest is a traffic engine; clicks to the blog matter most

39.8 LinkedIn, Reddit, GBP and reviews

Platform	⭐ Metrics that matter
LinkedIn	Impressions among healthcare professionals, engagement rate, follower job functions, link clicks
Reddit	Helpful-answer upvotes, profile visits, referral sessions (GA4)
Google Business Profile (if eligible)	Calls, website clicks, direction requests, review count and rating
Trustpilot	Review count, average rating, reply rate

39.9 Formulas

Metric	Formula
Engagement rate (by reach)	(likes + comments + shares + saves) ÷ reach × 100
Save rate	saves ÷ reach × 100
Share rate	shares ÷ reach × 100
Follower growth rate	new followers this month ÷ followers at start × 100
Click-through rate	link clicks ÷ impressions × 100
Social-to-site rate	GA4 social sessions ÷ total social link clicks × 100

> 🟧 **Ongo Weight Loss example**
>
> On YouTube, Ongo Weight Loss's food/protein Shorts (721–1.5K views) outperform drug-topic Shorts. Don't stop at views: compare **viewed vs swiped away** and **subscribers gained** for each. If food Shorts also win on those, they become the pillar we scale. 🔵

39.10 Do's and Don'ts

✅ Do	❌ Don't
Report impressions now, engagement and site visits next	Report likes alone
Compare rates, not just totals	Compare a 10-follower account to a 2M one
Track the same metrics every week	Change metrics every report
Note context (holiday, trend, compliance pause)	Treat every dip as failure

39.11 Pros and cons of focusing on "metrics that matter"

✅ Pros	❌ Cons
Decisions based on predictors of growth	Smaller, less impressive numbers
Shorter reports	Needs explaining to stakeholders
Links social to business results	Some data needs GA4 setup

39.12 Where freshers go wrong in Chapter 39 topics

Mistake	Why it happens	Avoid it by	Fix it by
Celebrating views on a video with 10% retention	Big number	Retention check	Fixing the hook
Buying followers	Pressure for growth	FTC rule on fake followers	Never; removing bots
Reporting totals without time periods	Habit	Same weekly window	Adding dates

39.13 Thumb rules

👍 Reach shows you were seen; saves and shares show you were valued; clicks show you were trusted.

👍 Rates beat totals.

👍 One stage, one primary KPI.

39.14 Notes to remember

📝 Now: impressions. Next: engagement. Later: site visits and conversions.

📝 Engagement rate = engagements ÷ reach × 100.

Chapter 39 Glossary

Term	Simple meaning
Impressions	Times content was shown
Reach	Unique accounts that saw content
Retention	How much of a video people watch
CTR	Click-through rate
Vanity metric	A number that looks good but predicts little alone

Chapter 39 Quiz

1. What's the current primary KPI?

- A) Followers bought
- B) Revenue
- C) Likes only

- D) Impressions / reach

2. Which Instagram metric matters most for recommendations?

- A) Number of hashtags
- B) Bio length
- C) Total likes
- D) Shares (sends)

3. What's engagement rate by reach?

- A) Views – comments
- B) Followers ÷ posts
- C) Likes × followers
- D) Engagements ÷ reach × 100

4. Which Pinterest metric matters most?

- A) Followers only
- B) Outbound clicks
- C) Profile colour
- D) Board count

5. What does YouTube aim for?

- A) Viewer satisfaction, not just watch time
- B) Only likes
- C) Random selection
- D) Only views

6. Which is a vanity metric when alone?

- A) Save rate
- B) Retention at 30 s
- C) Total likes
- D) Outbound clicks

7. What's the TikTok metric to watch?

- A) Following count
- B) Profile photo
- C) Watched full video %

- D) Bio emojis

8. What comes after engagement in our KPI stages?

- A) Paid ads
- B) Follower purchases
- C) Nothing
- D) Website sessions and conversions from social

9. Why are rates better than totals?

- A) They're bigger
- B) They're secret
- C) They allow fair comparisons
- D) They never change

10. In the scorecard analogy, impressions are like…

- A) The umpire
- B) The pitch
- C) Strike rate
- D) Total runs

Answer key, Chapter 39: 1-D · 2-D · 3-D · 4-B · 5-A · 6-C · 7-C · 8-D · 9-C · 10-D

LEVEL 4 · CHAPTER 40

Chapter 40: UTMs, GA4 and Reporting to Team Leads

Platforms tell you what happened on the platform. GA4 tells you what happened on our website. UTMs are the bridge between the two.

> 💡 **Trivia**
>
> GA4's default channel grouping puts a session into **Organic Social** when the source matches a known social site, or when the medium is one of "social", "social-network", "social-media", "sm", "social network" or "social media" (and it's not paid). [1] 🟢 Official (Google Analytics Help)
>
> Use `utm_medium=social` and our social traffic lands in the right bucket every time.

40.1 What a UTM is

A UTM is a set of tags added to a link so GA4 knows where the visitor came from.

```
https://ongoweightloss.com/blog/high-protein-breakfast
  ?utm_source=instagram
  &utm_medium=social
  &utm_campaign=eat_well_2026_10
  &utm_content=carousel_breakfast_v1
```

Parameter	Meaning	Ongo Weight Loss convention
`utm_source`	The platform	`youtube`, `instagram`, `facebook`, `tiktok`, `pinterest`, `linkedin`, `reddit`, `threads`, `x`, `gbp`, `trustpilot`
`utm_medium`	The channel type	Always `social` for organic (paid will use `paid_social` in Book Six)

Parameter	Meaning	Ongo Weight Loss convention
`utm_campaign`	The theme or month	`pillar_yyyy_mm` (e.g. `eat_well_2026_10`), or an event (`thanksgiving_2026`)
`utm_content`	The specific post/placement	`format_topic_v#` (e.g. `reel_protein_v2`, `bio_link`, `yt_description`)

Rules: lowercase only; underscores, no spaces; never health terms, names, emails or any personal data in UTMs (Book Four, Ch. 32). 🔵

> 🍛 **Desi analogy: courier ka tracking number**
>
> Parcel pe tracking number na ho toh pata hi nahi chalta kahan se aaya, kahan atka. **UTM hamare har link ka tracking number hai.**

40.2 Where to put UTM links

Platform	Link placement
YouTube	Description links, pinned comment, channel links (UTM per video in descriptions)
Instagram	Link in bio (one UTM per bio link), Story link stickers
Facebook	Post links, Page website button
Pinterest	Pin destination URL (one UTM per Pin)
LinkedIn	Post links, company page website
Reddit	Only where community rules allow links; disclosed
TikTok	Bio link (when eligible)

Build UTMs in the shared **UTM Builder sheet** so spelling stays consistent (Appendix J). 🔵

40.3 What GA4 already tracks (from Book Four)

Our site's GA4 events (Book Four, Appendix C) let us see what social visitors do after they arrive:

Event	What it shows for social
`page_meta`	Which page group they landed on (blog, service, medication)
`cta_[pagegroup]_[action]`	CTA clicks (e.g. Get Started) by social visitors
`internal_link_click`	Did they move from blog to service pages?
`exit_to_portal`	Did they start the eligibility/portal flow?
`tool_complete_[tool]`	Did they complete a BMI or other tool?
`form_submit_[form]`	Contact or newsletter forms
`outbound_click_[context]`	Clicks leaving the site

No pixels, no PHI: we measure behaviour on public pages only, and the portal is out of scope. 🔵

40.4 GA4 reports to use

Question	GA4 path
How many sessions came from social?	Reports → Acquisition → Traffic acquisition → Session default channel group = Organic Social
Which platform sent the most?	Same report → change dimension to Session source
Which posts drove visits?	Explore → Free form → Session manual ad content (utm_content)
What did social visitors do?	Explore → filter channel = Organic Social → events (CTA, portal exit)
Which landing pages do social visitors see?	Engagement → Landing page, filtered by Organic Social

40.5 The weekly report to team leads (one page)

Section	Content
Headline	One sentence: what changed and why
KPI table	Impressions/reach per platform (this week vs last, % change)
Top 3 posts	Thumbnail, metric that matters, one learning each

Section	Content
Engagement	Saves, shares, comments, watch time trends
Website (GA4)	Organic Social sessions, engaged sessions, CTA clicks
Community	Comment volume, escalations, FAQ themes
Next week	3 actions

Monthly: add follower growth rate, competitor snapshot (Chapter 42) and experiment results (Chapter 41).

> 🟧 **Ongo Weight Loss example**
>
> The YouTube channel already has 134 videos. Add a UTM'd link to the relevant service or blog page at the top of each description, e.g. `?utm_source=youtube&utm_medium=social&utm_campaign=evergreen_2026&utm_content=yt_lipedema`. Within a month GA4 will show which videos send real visitors. 🔵

40.6 Do's and Don'ts

✅ Do	❌ Don't
Use the UTM Builder sheet	Type UTMs by hand each time
Lowercase, consistent names	Mix "Instagram", "IG", "insta"
Report the same KPIs weekly	Change formats every week
Keep reports to one page	Send raw platform exports

40.7 Pros and cons of UTMs

✅ Pros	❌ Cons
Clear source → site behaviour	Longer links (fine in bios)

✅ Pros	❌ Cons
Compare platforms and posts fairly	Needs discipline
Supports future conversion reporting	Internal links must never have UTMs

Important: never put UTMs on links **within our own website**; that overwrites the real source. 🔵

40.8 Where freshers go wrong in Chapter 40 topics

Mistake	Why it happens	Avoid it by	Fix it by
`utm_medium=Instagram`	Confusing source and medium	Convention table	Correcting to `social`
UTMs on internal site links	Copy-pasting	Rule above	Removing them
No UTM on bio links	Forgetting	Bio checklist	Adding now

40.9 Thumb rules

👍 Source = platform, medium = social, campaign = theme, content = post.

👍 Lowercase, consistent, no personal data.

👍 UTMs on external links only.

40.10 Notes to remember

📝 `utm_medium=social` puts sessions into GA4's Organic Social channel.

📝 Weekly one-page report; monthly adds growth, competitors and experiments.

Chapter 40 Glossary

Term	Simple meaning
UTM	Tags on a link that tell analytics where traffic came from
Channel grouping	GA4's buckets (Organic Social, Organic Search, etc.)
Session	A visit to the website
Engaged session	A visit with meaningful activity (GA4 definition)
Exploration	A custom GA4 report

Chapter 40 Quiz

1. What's `utm_medium` for organic social?

- A) paid
- B) organic_search
- C) social
- D) instagram

2. What should never be in a UTM?

- A) The post format
- B) Personal or health data
- C) The platform name
- D) The campaign theme

3. Where should UTMs never be used?

- A) Pin URLs
- B) Bio links
- C) YouTube descriptions
- D) Internal links on our own site

4. Which GA4 channel do social sessions land in with medium=social?

- A) Paid Search
- B) Direct

- C) Email
- D) Organic Social

5. What's `utm_source` for YouTube?

- A) Social
- B) Video
- C) YT_Channel
- D) youtube

6. Which event shows CTA clicks?

- A) `video_start`
- B) `scroll`
- C) `page_not_found`
- D) `cta_[pagegroup]_[action]`

7. What casing should UTMs use?

- A) UPPERCASE
- B) Mixed
- C) Any
- D) Lowercase

8. Where is the GA4 channel report?

- A) Admin → Billing
- B) Settings → Fonts
- C) Nowhere
- D) Acquisition → Traffic acquisition

9. How long is the weekly report?

- A) No report
- B) 50 pages
- C) Raw exports
- D) One page

10. In the courier analogy, a UTM is a…

- A) Delivery boy
- B) Stamp collection

- C) Gift wrap
- D) Tracking number

Chapter 41: Experiments and Growth Loops

Experts don't guess which post will work. They run small, fair tests, keep what wins, and build loops where one piece of content keeps creating the next.

> 💡 **Trivia**
>
> YouTube lets creators **test and compare up to three thumbnails** (and titles, as the feature expanded) on a video; it picks the winner by **watch time share**, not clicks alone. ● Industry summary of YouTube's "Test & compare" feature (2024–2026)
>
> Even YouTube judges a thumbnail by whether people keep watching.

41.1 The experiment loop

Step	Action	Example
1 · **Question**	What do we want to learn?	"Do face-on-camera hooks beat text-only hooks on Reels?"
2 · **Hypothesis**	What do we expect, and why?	"Face hooks will raise average watch time by 20% because people connect with people"
3 · **Test**	Change one thing only	4 Reels with a face hook vs 4 with text hooks, same topics and times
4 · **Measure**	Use the metric that matters	Average watch time, shares
5 · **Decide**	Keep, kill or retest	Keep if +15% or more across both weeks
6 · **Log**	Write it in the experiment log	So nobody repeats it

> 🍛 **Desi analogy: maa ki recipe**
>
> Maa ek baar mein ek hi cheez badalti hai: "is baar namak kam, baaki sab same." Agar namak, mirch aur tel teeno badal diye, toh pata hi nahi chalega swaad kis wajah se badla. **Ek test, ek badlaav.**

41.2 Twenty experiment ideas

#	Platform	Variable	Measure
1	YouTube	Thumbnail: face vs food	Test & compare watch-time share
2	YouTube	Title: question vs statement	Impressions CTR
3	YouTube	Chapters on vs off	Average % viewed
4	Shorts	First 2 s: text hook vs spoken hook	Viewed vs swiped away
5	Shorts	25 s vs 50 s length	Viewed vs swiped away, subs gained
6	Instagram	Carousel 5 vs 10 slides	Saves, shares
7	Instagram	Reel with captions burned-in vs auto	Watch time
8	Instagram	Posting time morning vs evening	Reach in first 24 h
9	Instagram	Collab post with a creator vs solo	Non-follower reach
10	Instagram	Story poll vs quiz sticker	Taps, replies
11	Facebook	Native video vs link post	Reach, link clicks
12	Facebook	Question post vs tip post	Comments
13	Pinterest	Recipe Pin: text overlay vs none	Outbound clicks
14	Pinterest	1 board vs 3 relevant boards	Impressions
15	Pinterest	Fresh image vs same image new title	Saves
16	LinkedIn	Provider post vs company page post	Impressions

#	Platform	Variable	Measure
17	All	CTA: "save this" vs "share this"	Saves vs shares
18	All	Spanish caption vs English only (Spanish-speaking content)	Reach, comments
19	All	Holiday-linked vs evergreen	Reach
20	GA4	Bio link to blog vs service page	Engaged sessions, CTA clicks

41.3 Growth loops (content that feeds more content)

Loop	How it works
Comment → content loop	Comment questions go into the log → become Shorts/Reels answers → reply to the original comment with the video → more questions
Long → short loop	One YouTube video → 5 Shorts/Reels → the best-performing Short points back to the long video
Search loop	YouTube/Pinterest posts rank in search → visits to blog → blog embeds the video → more views
Community loop	Weekly "Ask our provider" Q&A → answers as carousels → people tag friends → new questions
Creator loop	A creator collab brings new followers → they share their own (disclosed) content → more creators reach out

> 🟧 **Ongo Weight Loss example**
>
> Our first experiment: on YouTube Shorts, food/protein topics already beat drug topics. Test whether **"recipe in 30 seconds"** Shorts (5 videos) beat **"protein tip"** Shorts (5 videos) on viewed-vs-swiped and subscribers gained over two weeks. Log the result; scale the winner. 🔵

41.4 The experiment log

ID	Dates	Hypothesis	Variable	Result	Decision
EXP-01	Nov 3–16	Recipe Shorts beat tip Shorts	Format	(fill)	Keep / kill / retest

41.5 Do's and Don'ts

✅ Do	❌ Don't
Change one variable at a time	Change everything at once
Run tests for at least 2 weeks or 8 posts	Decide after one post
Write down the hypothesis first	Invent a reason after
Share learnings in the monthly report	Keep results in your head

41.6 Pros and cons of experimenting

✅ Pros	❌ Cons
Decisions based on evidence	Slower than guessing
Continuous improvement	Small accounts have noisy data
Shareable learnings	Needs discipline and a log

41.7 Where freshers go wrong in Chapter 41 topics

Mistake	Why it happens	Avoid it by	Fix it by
Declaring a winner after one viral post	Excitement	Minimum sample rule	Retesting

Mistake	Why it happens	Avoid it by	Fix it by
Testing a claims-heavy hook to "see what works"	Chasing reach	Compliance first	Testing only approved variants
No log	Busy	Log template	Back-filling

41.8 Thumb rules

👍 One test, one change, one metric.

👍 Two weeks or eight posts before deciding.

👍 Build loops, not one-off posts.

41.9 Notes to remember

📝 Every variant must already be compliance-approved.

📝 Comment → content is our cheapest growth loop.

Chapter 41 Glossary

Term	Simple meaning
Hypothesis	A testable prediction with a reason
Variable	The one thing changed in a test
A/B test	Comparing two versions
Growth loop	A process where output creates more input
Sample size	How many posts or views a test includes

Chapter 41 Quiz

1. How many variables should change in a test?

- A) One
- B) None
- C) Three
- D) All

2. What does YouTube's Test & compare judge by?

- A) Watch time share
- B) Likes only
- C) Colour
- D) Comments only

3. How long should a test run?

- A) One year
- B) At least 2 weeks or 8 posts
- C) One hour
- D) One post

4. What comes before testing?

- A) Nothing
- B) The result
- C) A written hypothesis
- D) A celebration

5. What's the comment → content loop?

- A) Buying comments
- B) Deleting comments
- C) Ignoring comments
- D) Questions become videos that answer them

6. Can claims-heavy hooks be tested?

- A) Yes
- B) If short
- C) No; only approved variants

- D) On TikTok only

7. What's the long → short loop?

- A) Deleting long videos
- B) One long video becomes several Shorts that point back
- C) Making only long videos
- D) Posting Shorts randomly

8. Where are results recorded?

- A) The experiment log
- B) A comment
- C) Nowhere
- D) A sticky note

9. What's our first suggested experiment?

- A) Buying followers
- B) Before/after photos
- C) Brand-name hashtags
- D) Recipe Shorts vs protein-tip Shorts

10. In the maa-ki-recipe analogy, she changes…

- A) Everything at once
- B) One ingredient at a time
- C) Only the plate
- D) Nothing ever

Sources

1. YouTube Help, How YouTube recommendations work 🟢
2. Ongo Weight Loss, YouTube Shorts audit, October 2026 (internal) 🔵

Answer key, Chapter 41: 1-A · 2-A · 3-B · 4-C · 5-D · 6-C · 7-B · 8-A · 9-D · 10-B

LEVEL 4 · CHAPTER 42

Chapter 42: Competitive Gaps and How We Win (Ethically)

You asked for "loopholes". In health, loopholes become warning letters. What we look for instead are gaps: places where competitors are absent, weak or careless, and where honest, useful content can win.

> 💡 **Trivia**
>
> Among the ~50 competitors we audited, **Ongo Weight Loss ranks #3 on YouTube by subscribers** (2.29K), behind only WW (187K) and Shed (7.12K). Most competitors with 50K+ Instagram followers have small or no YouTube channels. 🔵 Ongo Weight Loss audit, October 2026
>
> Our weakest-looking platform on paper (Instagram) is crowded; our "small" YouTube channel is already a top-three player.

42.1 Gap map (from our audit)

Platform	What competitors do	Gap	Our move
YouTube	Few channels; most under 1.5K subscribers except WW and Shed	Long-form, reviewed education is wide open	Make YouTube the anchor; fix risky titles; scale food/lifestyle and provider explainers
Instagram	Crowded: WW 2M, Noom 664K, Hers 341K, Hims 286K, Ro 116K, IVIM 115K	Hard to win on volume; easier on usefulness (saves)	Save-worthy carousels; Reels from YouTube; collab posts with creators
TikTok	Hims 474K, WW 273K, IVIM 68.4K; some use algospeak ("G L P-1")	Many rely on rule-bending	Stay out of drug content; win with food/habits when we launch

Platform	What competitors do	Gap	Our move
Pinterest	Only a handful present (Zealthy, Calibrate, Vibrant, WeightCare, Red Mountain, Balanced Hormone)	Recipes and habit content barely served by telehealth brands	Launch Pinterest with recipe and meal-prep Pins to the blog
Reddit	A few own subreddits (Mochi, Zealthy, Fella, Olympia)	Most brands absent or only promotional	Disclosed, genuinely helpful answers; no self-promo spam
LinkedIn	Mostly corporate	Provider-led education for professionals	Provider voices (when available)
Facebook	Many pages inactive	Our 30–64 audience lives here	Revive the Page with consistent, useful posts

> 🍛 **Desi analogy: mohalle ki dukaan**
>
> Gali mein paanch kirana dukaan hain aur sab sirf chips bechte hain. Smart dukaandaar woh nahi jo chips sasta karke ladai kare; woh hai jo **taaza sabzi** rakh de, jo koi nahi rakhta. **Gap dhoondo, ladai nahi.**

42.2 What competitors do that we will NOT copy

Tactic seen	Why we won't
Algospeak spellings ("G L P-1", "s3maglutide")	Policy evasion; TikTok/Meta rules (Chapter 33)
Brand drug names in titles and hashtags	Our launch-phase rule; FDA letters (Chapter 32)
Body-comparison before/afters	FTC, platform rules, ethics (Chapter 30)
Giveaways requiring sign-ups	Platform promotion rules; incentive concerns
Price wars ("cheaper than...")	Comparative claims need proof; prices change
Undisclosed creator content	FTC (Chapter 29)

Ethical note: what we **can** learn from others is format, timing and tone. IVIM's travel video (152K views) and Halloween "Boo Basket" show that lifestyle and seasonal content travel further than drug content; that's a lesson, not a loophole. 🔵

42.3 Our five winning angles

Angle	Why it wins
1 · Reviewed education on YouTube	Few competitors invest; YouTube search is long-lasting; feeds Google and AI answers
2 · Food and habits first	Allowed on every platform; our best-performing Shorts already prove it
3 · Pinterest + blog	Almost empty for telehealth; strong for recipes; drives site visits
4 · Spanish-language content	A large U.S. audience (Chapter 5) that was rarely the focus of the profiles we audited; confirm in each monthly snapshot
5 · Trust signals	LegitScript certification, provider reviews, honest pricing "from $179" (matching site)

42.4 Monthly competitor snapshot

Field	How
Followers per platform (top 10 rivals)	Public profiles, same day each month
Posting frequency	Count last 30 days
Top 3 posts by visible engagement	Note format and topic
New platforms or formats	Note launches
Risky tactics observed	Log, don't copy
Opportunities for us	One per month

Use **view-only** browsing; never follow, like or comment on competitors from the brand account during research. 🔵

> 🟧 **Ongo Weight Loss example**
>
> This month's opportunity: Pinterest. Create a business account, three boards ("High-Protein Recipes", "Meal Prep for Busy Weeks", "Walking and Movement"), and pin 15 recipe/habit Pins linking to the blog with UTMs. No drug content, no before/after. 🔵

42.5 Do's and Don'ts

✅ Do	❌ Don't
Look for gaps and unmet needs	Copy rule-bending tactics
Learn from formats and timing	Copy content or designs
Track competitors monthly	Obsess daily
Compete on usefulness and trust	Compete on claims or price wars

42.6 Pros and cons of a gap strategy

✅ Pros	❌ Cons
Win where others aren't	Gaps can close
Lower competition	Some gaps exist because demand is low
Ethical and durable	Requires patience

42.7 Where freshers go wrong in Chapter 42 topics

Mistake	Why it happens	Avoid it by	Fix it by
Copying a competitor's viral drug post	Envy	"Won't copy" table	Removing it
Liking competitor posts from the brand account	Curiosity	View-only rule	Unliking
Chasing Instagram follower parity	Big numbers	Gap map	Focusing on YouTube and Pinterest

42.8 Thumb rules

👍 Find the empty shelf; don't fight over the full one.

👍 Learn formats, never copy claims.

👍 Our rules are our moat: trust compounds.

42.9 Notes to remember

📝 Ongo Weight Loss is #3 on YouTube among audited competitors.

📝 Pinterest and Reddit are the least-served platforms by competitors.

Chapter 42 Glossary

Term	Simple meaning
Competitive gap	An unmet need competitors aren't serving
Algospeak	Misspellings used to dodge moderation
Moat	A lasting advantage
Share of voice	Our visibility compared with competitors
Snapshot	A monthly record of competitor activity

Chapter 42 Quiz

1. Where does Ongo Weight Loss rank on YouTube among audited competitors?

- A) Not present
- B) #3
- C) #50
- D) Last

2. Which platform is least served by competitors?

- A) Instagram
- B) Pinterest
- C) Facebook
- D) TikTok

3. Should we use algospeak?

- A) Yes
- B) No
- C) Only on TikTok
- D) Sometimes

4. What can we learn from competitors?

- A) Their designs to copy
- B) Formats, timing and tone
- C) Their claims
- D) Their passwords

5. What's a moat?

- A) A filter
- B) A thumbnail
- C) A hashtag
- D) A lasting advantage

6. How should competitor research be done?

- A) Report them
- B) Comment on their posts
- C) View-only; no likes or follows from the brand account
- D) Copy their posts

7. Which competitor content traveled furthest in the audit example?

- A) Brand-name hashtags
- B) Before/after photos
- C) Lifestyle and seasonal content
- D) Drug price posts

8. How often is the competitor snapshot?

- A) Every 5 years
- B) Hourly
- C) Monthly
- D) Never

9. Which is one of our winning angles?

- A) Price wars
- B) Undisclosed creators
- C) Algospeak
- D) Spanish-language content

10. In the kirana analogy, the smart shopkeeper…

- A) Copies the neighbour
- B) Stocks what nobody else has
- C) Fights over chips prices
- D) Closes the shop

Answer key, Chapter 42: 1-B · 2-B · 3-B · 4-B · 5-D · 6-C · 7-C · 8-C · 9-D · 10-B

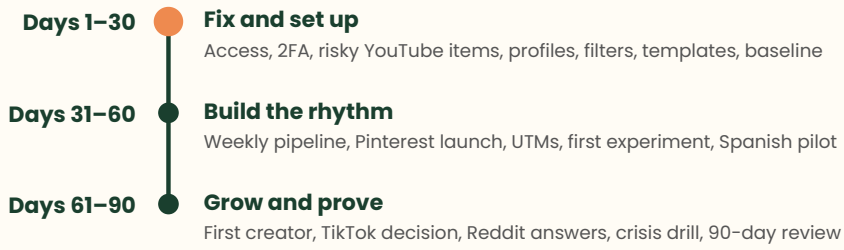

LEVEL 4 · CHAPTER 43

Chapter 43: The 30/60/90-Day Plan

Everything in this book, turned into a sequence. If you follow this plan, by day 90 Ongo Weight Loss will have clean accounts, a working weekly system, two growing anchor platforms and reports that team leads trust.

> 💡 **Trivia**
>
> Pew's 2025 survey found **YouTube (84%)** and **Facebook (71%)** are used by a majority of U.S. adults in every age group, while KFF found GLP-1 use is highest among adults **50–64 (22%)**. [1][2] ● Official (Pew, KFF)
>
> That's why the plan starts with YouTube and Facebook, not the trendiest app.

The 90-Day Plan

Fix, then rhythm, then growth.

43.1 Days 1–30: Fix and set up

Week	Tasks	Done when
1	Get admin access to all accounts (from team lead); set up 2FA and the shared password manager; add a backup admin (Chapter 19)	Every account has 2 admins + 2FA
1	Fix YouTube channel description (remove Wegovy®/Zepbound®); review risky first-person and brand-name titles with compliance; unlist or retitle (Chapter 6)	Risky items list closed
2	Rename Facebook Page to "Ongo Weight Loss"; update address/phone/hours to match the website; complete Instagram bio, link in bio with UTMs	Profiles consistent everywhere
2	Set up moderation: hidden words, blocked keywords, YouTube held comments (Chapter 35)	Filters on all platforms
3	Create the shared Sheet: briefs, approval log, comment log, UTM builder, KPI tracker; Canva Brand Kit	Templates live
3	Agree review SLAs with team lead and medical/legal reviewers (Chapter 38)	Written SLA
4	Baseline report: impressions/reach and followers per platform; GA4 Organic Social sessions	First report sent
4	Batch and schedule 2 weeks of content (YouTube 1 long + 3 Shorts/week; IG 3 posts + daily Stories; FB 3 posts)	2 weeks scheduled

43.2 Days 31–60: Build the rhythm

Week	Tasks	Done when
5–6	Run weekly pipeline (Mon plan → Thu schedule); daily community routine	4 weeks without gaps
5	Launch Pinterest business account; 3 boards; 15 Pins to blog	Pinterest live
6	Start experiment EXP-01 (recipe vs tip Shorts)	Log entry
6	Add UTM links to the top 20 YouTube video descriptions	GA4 shows YouTube source

Week	Tasks	Done when
7	Find 10 potential creators (Chapter 29); shortlist 3; draft brief and contract with legal	Shortlist approved
7	Spanish pilot: 4 reviewed Spanish posts (Chapter 5)	Posted and measured
8	First monthly report: impressions trend, top posts, experiment results, competitor snapshot	Sent to team leads

43.3 Days 61–90: Grow and prove

Week	Tasks	Done when
9	First creator collaboration (disclosed, reviewed)	Live with #ad
9	Decide on TikTok launch with team lead (food/habits only, Chapter 13)	Decision logged
10	Reddit: create a disclosed brand profile; answer 10 genuine questions where rules allow	10 helpful answers
10	First experience testimonial (consented, reviewed)	Posted
11	Crisis drill (Chapter 36)	Drill notes
12	90-day review: compare baseline vs now; move KPI focus from impressions to engagement; plan next quarter	Review deck sent

> 🪔 **Desi analogy: naya ghar basaana**
>
> Pehle mahine mein safai, bijli-paani ka connection, taale-chaabi. Doosre mahine mein roz ki dincharya. Teesre mahine mein padosiyon ko chai pe bulaana. **Pehle neev, phir dincharya, phir rishtey.**

43.4 Targets (directional, review at day 30)

Metric	Day 30	Day 60	Day 90
Posting consistency	90% of plan	95%	95%

Metric	Day 30	Day 60	Day 90
YouTube impressions (monthly)	Baseline	+20%	+40%
Instagram reach (monthly)	Baseline	+30%	+60%
Facebook reach (monthly)	Baseline	+25%	+50%
Pinterest impressions	—	Baseline	+50%
GA4 Organic Social sessions	Baseline	+20%	+40%
Compliance issues reaching live posts	0	0	0

These are starting targets, not promises; adjust them after the baseline. Small accounts can grow by large percentages from a low base. 🔵

> 🟧 **Ongo Weight Loss example**
>
> The fastest wins are in week 1–2: fixing the YouTube description, renaming the Facebook Page to "Ongo Weight Loss", and adding UTM links. None needs new content, and all three reduce risk or improve measurement immediately. 🔵

43.5 Do's and Don'ts

✅ Do	❌ Don't
Fix risks before growing	Post more on accounts with risky content
Measure a baseline first	Set targets without data
Add one platform at a time	Launch five platforms in week 1
Review at day 30, 60, 90	Wait 6 months to check

43.6 Pros and cons of a fixed 90-day plan

✅ Pros	❌ Cons
Clear priorities	Less room for surprises
Easy to report progress	Needs adjusting if resources change
Builds habits	Targets may need resetting

43.7 Where freshers go wrong in Chapter 43 topics

Mistake	Why it happens	Avoid it by	Fix it by
Skipping the week-1 fixes to start posting	Excitement	Plan order	Doing fixes first
Launching TikTok before rhythm is stable	Trend pressure	Week-9 decision	Pausing until then
No baseline	Forgetting	Week-4 report	Pulling last 30 days now

43.8 Thumb rules

👍 Fix, then rhythm, then growth.

👍 One new platform per month at most.

👍 Zero compliance issues is a target too.

43.9 Notes to remember

📝 Day 90: switch the primary KPI from impressions to engagement.

📝 YouTube + Facebook + Instagram first; Pinterest second; TikTok decided at week 9.

Chapter 43 Glossary

Term	Simple meaning
Baseline	Starting numbers before changes
SLA	Agreed response or review time
Milestone	A checkpoint in the plan
Rhythm	A consistent weekly routine
Directional target	A goal to guide effort, not a promise

Chapter 43 Quiz

1. What happens in days 1–30?

- A) Run paid ads
- B) Nothing
- C) Fix and set up
- D) Launch every platform

2. What's fixed first on YouTube?

- A) The channel description with brand names
- B) Nothing
- C) The banner colour
- D) Subscriber count

3. What should the Facebook Page be named?

- A) Ongo Weight Loss
- B) ONGO
- C) Ongo
- D) Weight Loss Page

4. When is Pinterest launched?

- A) Day 365

- B) Never
- C) Days 31–60
- D) Day 1

5. When is the TikTok decision?

- A) Week 9
- B) Never
- C) Today
- D) Week 1

6. Why do YouTube and Facebook come first?

- A) Majority use across all age groups
- B) They're paid
- C) They're trendy
- D) Random choice

7. What's the compliance target?

- A) Five per month
- B) Unlimited
- C) Zero issues reaching live posts
- D) No target

8. What happens at day 90?

- A) Buy followers
- B) Delete accounts
- C) Review and shift KPI focus to engagement
- D) Stop posting

9. What's needed before setting targets?

- A) A baseline
- B) A competitor's number
- C) A guess
- D) Nothing

10. In the naya-ghar analogy, the order is…

- A) Relationships, then cleaning

- B) No order
- C) Foundation, routine, relationships
- D) Party first

LEVEL 4 · CHAPTER 44

Chapter 44: The ZETA Model for Social Media

Zero-Error Tolerance Approach: the social media mistakes that must never go live, because they can't be taken back once someone screenshots them, or they put patients and the business at risk.

> 💡 **Trivia**
>
> The FTC's rule on fake reviews and testimonials allows civil penalties of up to **$51,744 per violation** (2024 figure). [1] 🟠 Industry (DWT)
>
> On social media, one post can be seen, shared and screenshotted thousands of times before you delete it.

44.1 The ZETA zones (social edition)

Zone	Meaning	Example
🟢 **Green**	Low-risk, reversible	A typo in a recipe caption; a weak hook
🟠 **Amber**	Fixable; report it	Missing UTM; wrong posting time; off-brand colours
🔴 **Red**	Irreversible, dangerous or non-compliant	Confirming a patient; brand drug name as our product; AI before/after

44.2 The Social Red List: never, ever

#	Never do this	Why
1	**Confirm or discuss** anyone's patient status or treatment in public or in social DMs	Privacy law; can't be un-said

#	Never do this	Why
2	Use **brand drug names** (Ozempic, Wegovy, Mounjaro, Zepbound, etc.) in commercial posts, titles, hashtags, CTAs or replies	Launch-phase rule; trademark and FDA risk
3	Call compounded medications **FDA-approved**, "generic", or "the same as" brands; attribute brand trial results to them	FDA letters flagged these exact claims
4	Post **AI-generated or edited before/after**, fake testimonials, fake reviews, or AI "patients"/"doctors"	FTC rule; deception
5	Name the **partner pharmacy**	Standing confidentiality rule
6	Post a **creator/influencer** collaboration without **#ad** disclosure	FTC endorsement rules
7	Give **personal medical advice** or dosing guidance in comments/DMs	Practice of medicine; patient safety
8	**Buy** followers, views, likes or reviews	FTC rule; platform bans
9	Publish **treatment, price, testimonial or creator content without the full check** (team lead + medical + legal)	Approval rule
10	Put **personal or health data** in AI tools, UTMs, screenshots or reports	PHI rules
11	Use **algospeak** to dodge platform moderation	Policy evasion; account penalties
12	Show **wrong prices** or prices that don't match the website	Misleading pricing

> 🍛 **Desi analogy: cricket mein no-ball**
>
> Bowler kitna bhi achha ho, front foot no-ball pe wicket cancel aur free hit. **Social media pe ek "no-ball" post ka screenshot hamesha ke liye reh jaata hai.** Red List wahi line hai: kabhi cross nahi karni.

44.3 Warning signs

You hear…	It usually means…
"Just reply 'yes, it's like Ozempic', people get it"	Red List #2–3

You hear…	It usually means…
"Let's AI-edit this photo so the result is clearer"	Red List #4
"She's happy, just thank her for being a patient"	Red List #1
"The creator doesn't want #ad, it looks less authentic"	Red List #6
"Spell it G L P 1 so TikTok doesn't catch it"	Red List #11
"It's just a small caption change, no need to re-review"	Red List #9
"Paste the DM into ChatGPT to draft a reply"	Red List #10

44.4 The ZETA publish gate (60 seconds)

Step	Check
Claims	No brand names as ours; "compounded, not FDA-approved" where treatment appears; no outcome promises
People	No identifiable patients without consent; no AI people unlabelled; no fake results
Disclosure	#ad for creators; disclaimers present
Price	Matches the website today
Approval	Row says "Approved" in the log; no edits after approval
Data	UTM correct; no personal data anywhere
Platform	Fits that platform's health rules (Chapter 33)

🟧 **Ongo Weight Loss example**

Our audit found three items close to the Red List on YouTube: brand names in the channel description (#2), first-person brand-drug titles such as "Switching from Ozempic to Mounjaro…" (#2–3), and an "Ozempic Face" thumbnail with AI-looking faces (#4). Fixing these is week 1 of the 90-day plan (Chapter 43). 🔵

📝 **Note to remember:** the worst ZETA mistake is hiding a ZETA mistake. If a Red List post goes live, take it down, screenshot it for the record, and tell the team lead the same day.

44.5 Do's and Don'ts

✅ Do	❌ Don't
Run the publish gate on every post	Skip it "just this once"
Report Red List issues the same day	Delete quietly
Keep the Red List pinned for designers, editors, writers and creators	Keep it only in this book
Review the Red List quarterly	Assume rules never change

44.6 Pros and cons of zero tolerance

✅ Pros	❌ Cons
Protects patients, the brand and LegitScript certification	Slower publishing
Clear, teachable rules	Some trends can't be joined
Builds long-term trust	Needs everyone's discipline

44.7 Where freshers go wrong in Chapter 44 topics

Mistake	Why it happens	Avoid it by	Fix it by
Thinking Stories "disappear so they're fine"	24-hour format	Same rules for Stories	Applying the gate
Letting a creator post unreviewed	Trusting them	Creator contract	Requesting edits/removal
Not reporting own mistake	Fear	Same-day rule	Reporting now

44.8 Thumb rules

👍 Twelve lines never to cross, on every platform, every format.

👍 Stories, replies and DMs follow the same rules as posts.

👍 Report fast; fix fast; learn.

44.9 Notes to remember

📝 The 60-second publish gate: claims, people, disclosure, price, approval, data, platform.

📝 Screenshots last forever; deletion doesn't undo a Red List post.

Chapter 44 Glossary

Term	Simple meaning
ZETA	Zero-Error Tolerance Approach
Red List	Mistakes that must never go live
Publish gate	The final check before posting
Civil penalty	A fine from a regulator
Algospeak	Misspellings to dodge moderation

Chapter 44 Quiz

1. What does ZETA stand for?

- A) Zero Engagement Target Analysis
- B) Nothing
- C) Zone Engagement Tracking App
- D) Zero-Error Tolerance Approach

2. Which is a Red List item?

- A) Confirming patient status
- B) A weak hook
- C) A recipe typo
- D) A late post

3. What's the FTC penalty per violation (2024 figure)?

- A) $5
- B) $500
- C) None
- D) Up to $51,744

4. Do Stories follow the same rules?

- A) No, they disappear
- B) Only on weekends
- C) Only on Facebook
- D) Yes

5. What does "spell it G L P 1 for TikTok" signal?

- A) Branding
- B) Accessibility
- C) Good SEO
- D) Algospeak (Red List #11)

6. What should be done if a Red List post goes live?

- A) Delete quietly
- B) Ignore it
- C) Take it down, screenshot, tell team lead same day
- D) Boost it

7. Which is an Amber item?

- A) Buying followers
- B) AI before/after
- C) Missing UTM
- D) Naming the pharmacy

8. What does the publish gate check?

- A) Only spelling
- B) Nothing
- C) Only colours
- D) Claims, people, disclosure, price, approval, data, platform

9. Can followers be bought?

- A) Yes
- B) If cheap
- C) Never
- D) Only bots

10. In the no-ball analogy, a Red List post…

- A) Is harmless
- B) Leaves a screenshot forever
- C) Earns a free hit for us
- D) Can always be undone

Answer key, Chapter 44: 1-D · 2-A · 3-D · 4-D · 5-D · 6-C · 7-C · 8-D · 9-C · 10-B

Back Matter

Appendix A: Platform Specs Cheat-Sheet

All sizes and limits are **changeable**. Check each platform's help centre before a campaign.

Platform	Format	Size / ratio	Length / limits	Notes
YouTube	Long video	1920×1080 (16:9)	Any length; chapters need 3+ timestamps, first at 0:00	Thumbnail 1280×720, under 2 MB
YouTube Shorts	Vertical video	1080×1920 (9:16)	Up to 3 minutes	Keep key text out of the bottom 20%
Instagram	Feed image / carousel	1080×1350 (4:5)	Up to 20 slides	Max 5 hashtags per post (rolling out from Dec 2025)
Instagram	Reels	1080×1920 (9:16)	Short is fine; hook in 1–3 s	Avoid watermarks, borders, mostly-text Reels
Instagram	Stories	1080×1920	15 s per frame (video auto-splits)	Link sticker for UTM links
Facebook	Feed image	1080×1350 or 1080×1080	Captions can be long	Link posts show a preview card (OG tags from Book Four)
Facebook	Reels	1080×1920	Short vertical	Cross-post from Instagram if appropriate
TikTok	Video	1080×1920	Up to 10 min upload in app (varies)	Drug content is 18+ and not For You eligible
Pinterest	Standard Pin	1000×1500 (2:3)	Title up to 100 chars; description up to 500	One destination URL with UTM
LinkedIn	Image post	1200×1200 or 1080×1350	~3,000 characters	Documents (PDF carousels) work well

Platform	Format	Size / ratio	Length / limits	Notes
Reddit	Text / image	—	Follow each subreddit's rules	Disclose brand affiliation
Threads	Text / image	1080×1350	500 characters	Topic tag (one)
X	Text / image	1600×900	280 characters (free)	Low priority for us

Appendix B: Hashtag and Keyword Resources (Free)

No tool or hashtag can guarantee "1000x views". What works is: the right topic, a strong hook, a keyword-rich caption, and a few accurate hashtags. Use these free resources to find the words people actually search. 🔵

Resource	What it gives you	How to use it
Platform search bars (YouTube, Instagram, TikTok, Pinterest)	Autocomplete = real searches	Type "high protein breakfast" and note suggestions
YouTube search + Studio "Research" tab	What your audience searches	Find gaps where few videos exist
Pinterest Trends (trends.pinterest.com)	Seasonal rise of topics	Plan recipes 4–6 weeks ahead of peaks
Google Trends	Topic interest over time and region	Compare "meal prep" vs "high protein meals"
TikTok Creative Center (Trends)	Trending hashtags, sounds	Food/habit trends only; check rules
Instagram search and hashtag pages	Related tags and top posts	Pick niche tags with active posts
Answer the Public / AlsoAsked (free tiers)	Question phrases	Turn questions into hooks
vidIQ / TubeBuddy (free tiers)	YouTube keyword scores	Titles and tags ideas
Google Search Console (Book Four)	Queries already bringing visitors	Make social versions of winning blog topics

Starter hashtag sets (no brand drug names):

Pillar	Examples (pick 3–5)
Eat Well	#highproteinmeals #mealprep #healthyrecipes #proteinbreakfast #easyhealthymeals
Move	#walkingworkout #beginnerworkout #strengthtraining #dailysteps
Treatment (education only, reviewed)	#glp1 #weightcare #telehealth #weightlossjourney
Real Life	#healthyhabits #mindfuleating #selfcare
Spanish	#recetassaludables #comidasaludable #saludybienestar

Never use brand drug hashtags (#ozempic, #wegovy, #mounjaro, #zepbound) or misspelled versions. 🔴

Appendix C: Holiday and Awareness Calendar (U.S.)

Dates **change yearly**; verify each one before planning. Use only "no-claims" content for holiday tie-ins. 🔵

Month	Days and months to consider	Content angle
January	New Year	Gentle, realistic goal-setting; no "new year, new body"
February	American Heart Month; Valentine's Day	Heart-healthy recipes; self-care
March	National Nutrition Month; World Obesity Day (early March)	Recipes, plate method, reviewed education
April	World Health Day (Apr 7)	Provider Q&A
May	Mental Health Awareness Month; Mother's Day	Stress, sleep and eating; caregiver self-care
June	Men's Health Month; Father's Day	Men's health check-ins
July	Independence Day	BBQ swaps, hydration, summer walks

Month	Days and months to consider	Content angle
August	Back to school/work routines	Meal prep for busy weeks
September	Healthy Aging Month; Labor Day; Hispanic Heritage Month begins (Sept 15)	Strength for 50+; Spanish content
October	Hispanic Heritage Month ends (Oct 15); Halloween	Treat swaps; family fun walks
November	American Diabetes Month; Thanksgiving	Mindful holiday plates; gratitude posts
December	Holidays; year-end	Holiday stress; realistic reflection

Poll and question-sticker ideas: "Which breakfast would you try? 🥚 or 🥣", "How many steps did you get today?", "What's your biggest meal-prep struggle?", "Myth or fact: carbs are the enemy?" (answer with a reviewed carousel). Never poll about weight, medications or doses. 🔵

Appendix D: Caption and Disclaimer Library

Caption formula: keyword first line → value → one CTA → disclaimer (if needed) → 3–5 hashtags.

Use	Sample caption	Why it works
Recipe carousel	"High-protein breakfast in 10 minutes 🍳 Swipe for 5 ideas with about 20–30 g protein each. Save this for busy mornings. Full recipes on our blog (link in bio). #highproteinmeals #mealprep #healthyrecipes"	Keyword first; clear value; save CTA; no claims
Provider explainer Reel	"What does GLP-1 actually do? Our provider explains in 45 seconds. Educational only; talk to your provider about your health. Compounded medications are not FDA-approved."	Education framing; disclaimers
Treatment info post (reviewed)	"Ongo Weight Loss offers compounded semaglutide and tirzepatide, prescribed by licensed providers when appropriate. Plans [price exactly as on the website, e.g. 'from $179']. Compounded medications are not FDA-approved. Learn more: link in bio."	Accurate; price matches site; disclaimer
Testimonial (consented)	"'Having someone to ask when I felt unsure made all the difference.' – Shared with permission. Individual experiences vary."	Experience, not numbers

Use	Sample caption	Why it works
Creator post	"#ad Paid partnership with Ongo Weight Loss. Here's my easy high-protein lunch..."	Disclosure first
Holiday	"Thanksgiving plate idea: half veggies, a palm of protein, and the dish you love most. Enjoy the day. 🧡 #thanksgiving #mindfuleating"	Kind, no restriction language

Disclaimers: see Chapter 32.2.

Appendix E: Reply Templates and Blocked Words

Situation	Template
Pricing	"Thanks for asking! You can see current plans and what's included here: [link]."
"Is this Ozempic/Wegovy?"	"Great question. Ongo Weight Loss offers compounded semaglutide and tirzepatide, which are not FDA-approved and aren't the same as brand-name products. A licensed provider decides what's right for you: [link]."
"How does it work?"	"Here's a quick overview of how it works: [link]. Happy to answer general questions here!"
Patient issue (shipping, account, side effects)	"Thanks for reaching out. For your privacy, please contact our care team at [contact] or through your patient portal so we can help securely."
Emergency language	"If this is an emergency, please call 911 now. You can also contact your provider right away." (+ escalate)
Praise	"Thank you so much! 🧡 Have you tried [related tip/video]?"
Misinformation	"Thanks for sharing. Current guidance from [source] says [fact]. Here's more: [link]." (once only)
Scam warning	"Heads up: Ongo Weight Loss will never ask for payment or medications sales in DMs. Please only use our official website."

Starter blocked/hidden words (update monthly): cheap ozempic, cheap wegovy, cheap semaglutide, dm me, dm for, whatsapp me, telegram, crypto, investment, forex, promo code dm, buy now dm, discount meds, no prescription, plus common misspellings of these. 🔵

Appendix F: Sample 7-Day Calendar

A sample week only; the real calendar is built weekly (Chapter 38). Platforms: YouTube (YT), Shorts (YS), Instagram (IG), Facebook (FB), Pinterest (PIN).

Day	Platform & format	Topic (pillar)	CTA	Review
Mon	YT long video	"Protein on a GLP-1 Plan: A Provider's Simple Guide" (Treatment, education)	Watch + blog link (UTM)	Team lead + medical + legal
Mon	IG Story poll	"Which breakfast would you try?" (Eat Well)	Vote	Team lead
Tue	YS + IG Reel + FB Reel	"3 high-protein breakfasts in 30 seconds" (Eat Well)	Save	Team lead
Tue	PIN ×3	Breakfast recipes (Eat Well)	Blog clicks	Team lead
Wed	IG carousel + FB image	"5 ways to walk more without trying" (Move)	Save/share	Team lead
Thu	YS + IG Reel	"Meet our provider: why I care about weight care" (Meet Us)	Follow	Team lead + legal
Thu	FB post	"What's one healthy habit you started this year?" (Community)	Comment	Team lead
Fri	IG carousel	"Myth vs fact: GLP-1 and muscle" (Treatment, education)	Save + link in bio	Team lead + medical + legal
Sat	IG Story quiz + PIN ×2	Meal-prep quiz; Sunday prep Pins (Eat Well)	Tap / save	Team lead
Sun	FB + IG	Weekly gentle reflection quote (Real Life)	Share	Team lead
Daily	All	Replies, hidden-word checks, escalations	—	Templates

Appendix G: 100-Competitor Social Presence Table

Snapshot from our audit on **30 October 2026** (public, logged-out views; numbers change). ✅ = linked or found; — = not found/not read.

No social links found or site not readable: Lavender Sky Health, SlimDown Rx, ReflexMD, Fifty 410, TeleFitMD, Trava, Strut, NextMed, SkinnyRx, BrightMeds, Fountain TRT, Reset Wellness, Core Age Rx, Sesame, Glow Diet, Enara, SlimRx, JoyMD, Push Health, Trimly, Bioverse, Alfie, Hale Meds. Morph Health's domain is for sale. The remaining numbers on your list (49, 53, 63–65, 67, 69, 70, 73–76, 79–81, 86, 89, 91–93, 95, 97, 99, 100) were not checked in this pass; add them in the first monthly snapshot (Chapter 42). 🔵

Appendix H: Case Appendices

Cases H1–H3 are **real findings** from our October 2026 audit. Cases H4–H8 are **training scenarios** based on common situations. 🔵

H1 · Real: risky YouTube titles and description

Situation: The Ongo Weight Loss channel description names Wegovy® and Zepbound®; titles include "I Tried Every GLP-1 Medication...", "Switching from Ozempic to Mounjaro..." and "I Missed My Wegovy Dose... (Doctor's Emergency Protocol)". **Risk:** Brand names as if we offer them; first-person claims implying patient experience; emergency framing. **Action:** Remove brand names from the description; compliance review of each title; retitle educational ones ("Missed a GLP-1 Dose? What to Ask Your Provider"); unlist those that can't be fixed; add disclaimers and UTM links. **Lesson:** Fix risk before growing reach.

H2 · Real: food Shorts beat drug Shorts

Situation: Food/protein Shorts get 721–1.5K views; drug-topic Shorts get fewer; onboarding "Step" videos get 39–161. **Action:** Make Eat Well the largest pillar (30%); test recipe vs tip formats (Chapter 41); move onboarding videos to a playlist linked from the website rather than promoting them on the channel. **Lesson:** The audience tells you what it wants; follow the data, within the rules.

H3 · Real: competitor lifestyle content travels further

Situation: IVIM's TikTok travel video ("traveling with GLP-1") reached 152K views; its Halloween "Boo Basket" was seasonal. IVIM also uses algospeak ("G L P-1"). **Action:** Learn the format (lifestyle, travel, seasonal), not the tactic (algospeak). Make a reviewed "Travel tips for staying on track" Reel focused on food and movement. **Lesson:** Copy formats, never rule-bending.

H4 · Scenario: "Is this just cheap Ozempic?"

Situation: A Reel comment asks this, with 40 likes. **Action:** Use the Appendix E template; pin it if helpful; hide follow-ups that sell drugs. **Lesson:** One accurate, calm reply educates hundreds of readers.

H5 · Scenario: a creator refuses #ad

Situation: A creator says "#ad hurts my engagement". **Action:** Explain FTC rules; disclosure is a contract requirement; if they refuse, don't work with them. **Lesson:** Disclosure is non-negotiable.

H6 · Scenario: side-effect complaint goes viral

Situation: A post claiming severe side effects tags Ongo Weight Loss and gets 2,000 shares. **Action:** Level 3 crisis: pause posts, screenshot, team lead + medical + legal; holding statement; private outreach by the care team; reviewed FAQ. **Lesson:** Patient safety first, statements second, promotion last.

H7 · Scenario: Spanish pilot

Situation: Four reviewed Spanish posts (recipes, how it works) during Hispanic Heritage Month. **Action:** Professional translation + medical review; Spanish captions and subtitles; measure reach and comments vs English equivalents. **Lesson:** Test new audiences with small, reviewed pilots.

H8 · Scenario: the only admin is away

Situation: The social lead is on leave and nobody else can log in to Instagram. **Action:** Prevent it: two admins on every account, company-owned emails, shared password manager, handover checklist (Appendix K). **Lesson:** Accounts belong to the company, not a person.

Appendix I: Consent and Creator Checklists

I.1 Testimonial / UGC consent

☐	Item
☐	Signed release: content, platforms, duration, right to edit (not to misrepresent)
☐	HIPAA authorisation if the person is a patient and health info is shared
☐	Confirmed 18+
☐	Unedited images/video (no AI or body edits)
☐	Typicality disclaimer planned
☐	Connection disclosed (paid, gifted, staff)
☐	Medical + legal review of the final edit
☐	Consent stored with the content file; revocation process explained

I.2 Creator / influencer

☐	Item
☐	Audience fit (U.S., adults, relevant interests); real engagement (no bought followers)
☐	Past content checked: no harmful diet content, no brand-drug promotion, no misinformation
☐	Written contract: disclosure (#ad + platform tool), no claims, review rights, removal rights, usage rights
☐	Brief with approved messages and the Red List (Chapter 44)
☐	Content reviewed before posting
☐	Disclosure checked after posting
☐	Performance tracked with a unique UTM

Appendix J: UTM Convention

Parameter	Values	Example
`utm_source`	youtube, instagram, facebook, tiktok, pinterest, linkedin, reddit, threads, x, gbp, trustpilot, creator_[handle]	`instagram`
`utm_medium`	social (organic only)	`social`
`utm_campaign`	pillar_yyyy_mm, or event_yyyy	`eat_well_2026_11`, `thanksgiving_2026`
`utm_content`	format_topic_v# or placement	`reel_protein_v2`, `bio_link`, `yt_lipedema`

Rules: lowercase; underscores; no personal or health data; never on internal site links; build every link in the UTM Builder sheet.

Appendix K: Account Setup and Handover Checklists

K.1 New account setup

☐	Step
☐	Use a company-owned email (e.g. social@ domain), never personal
☐	Username: consistent handle across platforms (check availability on all first)
☐	Display name: "Ongo Weight Loss"
☐	Business/professional account type; category Health/Medical or Telehealth where available
☐	Profile photo: logo (square, readable small); banner/cover per Chapter 23
☐	Bio: who we are, who it's for, trust signal, one CTA, UTM link
☐	Contact info matches the website exactly
☐	2FA on (authenticator app); backup codes stored in the password manager
☐	Second admin added (team lead)

☐	Step
☐	Moderation filters set (Appendix E)
☐	Link the account from the website footer and add to `sameAs` (Book Four)

K.2 Handover (when someone leaves or is away)

☐	Step
☐	All logins in the company password manager, up to date
☐	At least two admins on every account (Meta business portfolio, YouTube permissions, LinkedIn page admins, Pinterest business access)
☐	Scheduled posts listed in the calendar
☐	Open escalations and comment log handed over
☐	Remove departing person's access the same day they leave
☐	Recovery email and phone are company-owned

Glossary (A to Z)

Term	Simple meaning	Ch.

3. Holland & Knight, FDA and HHS action against telehealth compounded drug advertising (September 29, 2025)
4. Ongo Weight Loss, social audit, October 2026 (internal)

Useful, honest, consistent.

A helpful post, a kind reply, a clear disclaimer, a disclosed partnership, a patient's privacy protected, and a number that tells the truth about what worked. Organic growth is slow, and it compounds.

Edition: October 2026. Approvals, rules and prices change; every source is dated so you can recheck it.

Prepared by **Ashish Osten**, Team Lead, Ongo Weight Loss.
